A structural measure reflects the environment in which providers care for patients. Structural measures assess characteristics linked to the capacity of the provider to deliver quality healthcare. CMS believes requesting structural measures information will encourage facilities to increase the use of tools, ultimately improving the quality of care provided to Medicare beneficiaries.

These screen shots are for the Web-Based Data Collection function, which is expected to go live as part of the Hospital Reporting tool set by June 27, 2013. These screen shots are mock-ups of the expected functionality, which is still in development, and may not be fully representative. A paper-based form will also be submitted in the PRA package.
