Appendix H: HPOG-NIE Employer Survey

Health Profession Opportunity Grants (HPOG) Employer Survey

[Name of employer]:

Thank you for agreeing to be interviewed for the Employer survey of the Health Profession Opportunity Grants (HPOG) national evaluation. The evaluation is sponsored by the Administration for Children and Families (ACF) within the U.S. Department of Health and Human Services (HHS), and is being conducted by Abt Associates and the Urban Institute. The Employer survey seeks information about your hiring needs and practices for filling healthcare positions; and your perceptions of the HPOG program and of its graduates as job candidates and employees.

We ask you to answer the interview questions as accurately as possible, and to feel free to ask me, the interviewer, to repeat a question or define a term.

Your answers will be kept private. However, because of the relatively small number of organizations participating in the study, there is a possibility that a response could be correctly attributed to you. Only the HPOG evaluation team will have access to the information you provide through this survey. Your name will not be listed in any reports published, and comments will not be attributed to you. Your responses to these questions are also completely voluntary. The survey interview should take approximately 30 minutes to complete. Thank you in advance for your assistance in completing this survey and providing important information to the study.

[\[Survey roadmap and instructions will be inserted about here for online respondents.\]](#)

NOTES TO REVIEWERS

- ***This survey is for employers that have been identified by HPOG grantees as having hired HPOG graduates or having been contacted by HPOG with the purpose of trying to place HPOG participants in healthcare jobs.***
- ***We will be making every effort in our initial contacts to identify a respondent at that employer who has familiarity with this HPOG connection. The survey instrument assumes the person answering has some (perhaps limited) knowledge of the HPOG grant or local HPOG program in this placement capacity. We are assuming we will NOT administer the survey to someone who has no knowledge of HPOG.***
- ***Employers that are ALSO active partners with HPOG (e.g., involved in the design and/or operations of the local HPOG program) will answer the Stakeholder/Network survey as well.***
- ***The survey is designed for administration by either telephone with an interviewer, or as a web-based survey. Most employers will likely need to be contacted to have the survey administered by phone, with the exception of employers who are completing the web-based Stakeholder/Network survey. The latter will be able to complete the web-based Employer survey as part of the Stakeholder/Network survey.***

HPOG Employer Survey

Health Professions Opportunity Grants (HPOG) Employer Survey

As you may know, {invite.Local HPOG} is participating in a national evaluation of the Health Profession Opportunity Grants (HPOG), sponsored by the Administration for Children and Families (ACF) within the U.S. Department of Health and Human Services (HHS). The evaluation is being conducted by Abt Associates and the Urban Institute. It is studying all HPOG-funded education and training programs across the country, and examining how they help low-income individuals, including Temporary Assistance for Needy Families (TANF) recipients, secure well-paying healthcare jobs.

The evaluation also seeks information from employers like yourself who have either hired {invite.Local HPOG} graduates or been asked about doing so, about your hiring needs and practices for filling healthcare positions, and your views of the local workforce development programs and placement firms, including {invite.Local HPOG} that offer job candidates.

Your answers will be kept private. Only the evaluation team will have access to the information you provide through this survey. Your name will not be listed in any reports published, and comments will not be attributed to you. Instead, your information will be combined with information provided by others. However, because of the relatively small number of organizations participating in the study, there is a possibility that a response could be correctly attributed to you. Your responses to these questions are also completely voluntary. We hope you will choose to complete all of the questions on the survey, but you may choose to skip any question you do not feel comfortable answering. The survey should take approximately 30 minutes to complete. Thank you in advance for your assistance in completing this survey and providing important information to the study.
