

APPLICATION FOR SAFETY ACT DEVELOPMENTAL TESTING AND EVALUATION DESIGNATION

To encourage the development of anti-terrorism technologies, the SAFETY Act is implementing regulations to provide for the issuance of Developmental Testing and Evaluation Designations (DT&E Designations) for promising anti-terrorism technologies. DT&E Designation facilitates the deployment of these anti-terrorism technologies in the field either for testing and evaluation purposes or in response to exigent circumstances by providing, on a limited basis, the liability protections offered by the SAFETY Act. Depending on the nature and/or the maturity of the Technology, operational or other conditions may be included among SAFETY Act liability protections. DT&E Designations are intended to provide the Department with added flexibility in making the SAFETY Act liability protections available to firms that are developing promising anti-terrorism technologies.

(DT&E Designation Form on following page)

Privacy Act Notice: DHS Authority to Collect This Information: 6 U.S.C. §§ 441–444 (the “SAFETY Act”) and 6 C.F.R. Part 25, 71 Fed. Reg. 33147, 33159. **Principal Purposes:** DHS collects telephone numbers, addresses, and financial and insurance information for the purpose of contacting individuals seeking liability protections on issues related to the application for SAFETY ACT developmental testing and evaluation designation process. **Routine Uses and Sharing:** In general, DHS will not use this information for any purpose other than DHS personnel contacting the individual. However, DHS may release this information of an individual on a case-by-case basis as described in the S&T SAFETY Act System of Records Notice (SORN), which can be found at: www.dhs.gov/privacy. **Disclosure:** Submission of this information is voluntary and an individual may opt not to provide the requested information or to provide only some of the information DHS requests. If an individual chooses to opt not to provide some or all of the requested information, DHS may not be able to process the individual’s request.

PRA Burden Statement: An agency may not conduct or sponsor an information collection and a person is not required to respond to this information collection unless it displays a current valid OMB control number and an expiration date. The control number for this collection is 1640-0001 and this form will expire on 03/31/2013. The estimated average time to complete this form is 60 hours per respondent. If you have any comments regarding the burden estimate you can write to Department of Homeland Security, Science and Technology Directorate, Washington, DC 20528.

APPLICATION FOR SAFETY ACT DEVELOPMENTAL TESTING AND EVALUATION DESIGNATION

APPLICATION TYPE

TE1. Type of Application. This application is a(n) *(choose one)*:

- Initial Filing
- Application following a Pre-Application Consultation Application ID #: _____
- Resubmission of a Previous Application. Application ID #: _____

TE1.1. Public Web site Listing

If your Technology is awarded SAFETY Act coverage, you have the opportunity to be listed on the SAFETY Act Web site as a Designated Seller of anti-terrorism technologies. [For example, if you apply for Designation and Certification and receive Designation, your Technology will be listed under Designated Technologies. Or, if you are granted DT&E Designation, regardless of which protection you applied for, you will be so listed on the Web site. Note: By statute, all Certified Technologies will be displayed in the Approved Products List for Homeland Security on the Web site.]

- I wish to have this Technology listed on the public Web site under the appropriate classification.
- I do not wish to have this Technology listed on the public Web site under the appropriate classification.

REGISTRATION INFORMATION

TE2. Registration Status *(choose one)*:

- My initial registration is included with this application.
- I am updating or correcting previous registration information.
- My previously provided registration information is still accurate.

TE2.1. Seller Name: _____

OVERVIEW OF THE ANTI-TERRORISM TECHNOLOGY

TE3. Non-proprietary Summary

TE3.1. Name of your Technology: _____

TE3.2. Company and Technology Description. Provide an overview of your company, including the place of incorporation, a description of your

business, and a brief, two line description of the Technology that is the subject of this application that is appropriate for public viewing.

- TE4.** Summary of your Technology. Please provide a brief (no more than two page) description of your Technology, listing all components that you wish to have evaluated as part of your SAFETY Act application. . If your Technology is a product or device, please describe the Technology in detail, including its principal elements, systems, and components. If your Technology is a service, please describe the nature of the service, the actions, activities, planning, training, and/or expertise involved in providing the service and how the service is designed to counter terrorist threats.

DEVELOPMENTAL TESTING AND EVALUATION DESIGNATION

Respond to all items in this section in one attachment to this application. Additional supporting material may be attached as an appendix to your application.

- TE5.** Description of your Technology. One of the most important parts of the application process is defining the scope of your Technology. In this section, define your Technology with a sufficient degree of specificity. This description will serve as the basis for the Department’s analysis of your Technology for SAFETY Act purposes. The content of the response you provide in this section, together with any additional information you may be asked to provide, may be used to finalize the definition and scope of your Technology as it will appear in a Developmental Testing and Evaluation Designation.

- TE6.** Nature of Test Scenario. Please provide an outline of the test plan for the subject Technology. The outline may include the nature of the test, the entity that will conduct the test, relevant time frames, proposed test methodology, location of the test, summary rationale for conducting the test, and any other information that you wish to provide.
- TE7.** Deployment and Operation. Describe the sequence of steps involved in deploying and operating your Technology.
- TE8.** Magnitude of Risk. Please provide an assessment of the magnitude of risk to the public from the type of terrorist activities your Technology would counter. Please describe, to the extent practicable, the scope of the injury, property and other damage, economic loss, loss of life, or other harm that could result from such terrorist activity. Please describe how the Technology has been deployed to date and how it can counter terrorist activities. If the Technology has not yet been deployed, summarize the prototype testing or other testing that has been conducted to date.
- TE9.** Please describe how your plans for selling, deploying, or maintaining your Technology would be affected if the Department does not issue Developmental Testing and Evaluation (DT&E) Designation. Please describe how the Technology will be deployed in the future if SAFETY Act DT&E Designation is issued.
- TE10.** Effectiveness and Utility. Provide information supporting the potential for your Technology to be effective in countering potential acts of terrorism.

If POCs are provided as sources of information or testimonials, check below to indicate that you have contacted them and that they are expecting to hear from DHS related to your Technology. Also, indicate below what information we should expect from each POC.

The POCs are expecting contact from DHS. The information the POC can provide or verify is:

- TE11.** Summarize your Technology’s qualifications for SAFETY Act Developmental Testing and Evaluation Designation. Include any other information the Department should consider in evaluating your anti-terrorism technology. Please include information relating to interest by governmental entities in testing or provisionally deploying your Technology.

If POCs are provided as sources of information or testimonials, check below to indicate that you have contacted them and that they are expecting to hear from

DHS related to your Technology. Also, indicate below what information we should expect from each POC.

The POCs who are expecting contact from DHS. The information the POC can provide or verify is:

TE12. Insurance Data

If POCs are provided as sources of information or testimonials, check below to indicate that you have contacted them and that they are expecting to hear from DHS related to your Technology. Also, indicate below what information we should expect from each POC.

The POCs are expecting contact from DHS. The information the POC can provide or verify is:

- TE12.1.** Please provide the information below for any and all current liability insurance policies that you hold and are available to satisfy otherwise compensable third-party claims arising out of, relating to, or resulting from an act of terrorism were your Technology deployed in defense against, response to, or recovery from such an act:
- a. Primary Named Insured (as it appears on your insurance policy).
 - b. Additional named insured relevant to the Technology Sellers.
 - c. Type of policy(ies) (e.g., Comprehensive General Liability, Errors and Omissions, Aviation, Product Liability, SAFETY Act Liability, etc.) and any relevant endorsements.
 - d. Policy Dates. (Start and end)
 - e. Insurer.
 - f. Per-occurrence limits.¹
 - g. Aggregate limits.

¹ Please indicate whether the policy(ies) has a different limit or deductible/self-insured retention for terrorist acts than the general policy limit and, if so, provide both.

- h. Annual Premium(s).²
- i. Deductible(s) or Self-insured retentions.
- j. Exclusions (*please note and explain any pertinent insurance exclusions or cancellation terms that would potentially dilute or eliminate the availability of coverage of any of the policies identified in subparagraph "c" above*).
- k. Does your insurance policy(ies) cover the type of developmental test and evaluation and activities anticipated in this application? If yes, please describe.
- l. Please describe the type and limits of terrorism coverage for this policy. Please elaborate on the applicability of the policies identified in subparagraph "c" to address the foreseeable risks associated with the deployment of the Technology including those risks arising from the deployment of the Technology in advance of or response to an act of terrorism. Please also indicate whether the identified policy(ies) provides coverage under the Terrorism Risk Insurance Act (TRIA) of 2002, as amended, or other insurance policy(ies) provisions or endorsements.
- m. Please describe whether the relevant policy(ies) covers SAFETY Act claims and whether the policy(ies) has a dedicated limit that applies to SAFETY Act claims only or has a shared limit (i.e., shared with non-SAFETY Act claims). Please indicate whether you have received a written interpretation letter from either the carrier or insurance broker indicating whether the policy covers SAFETY Act claims; if so, please provide a copy of such document.
- n. Is your Technology indemnified by a third-party organization or entity (including the U.S. Government) for the test and evaluation described in this application? If so, please describe the key terms and conditions and limits of indemnification.

TE12.2. Unavailability of Insurance

- a. If you do not currently carry insurance for the Technology that would be applicable in the event of an act of terrorism, please indicate the reasons. If you have attempted to purchase insurance but it is not available on the world market, please indicate the specific and related inquiries you have made. (You may submit written communications from insurance companies or brokers explaining why your Technology cannot be insured.)
- b. If you have endeavored to purchase insurance but have not done so because you have concluded that the cost of insurance premiums would

² Insurance premium: If possible, please indicate what percentage of the premium is allotted to coverage for acts of terrorism.

unreasonably distort the price of the Technology, please describe those efforts to find appropriate insurance and state why you have concluded that the cost of insurance for your Technology would unreasonably distort its sales price. In this context, you may need to provide an explanation with relevant documentation (e.g., insurance quotes with limits, premiums, exclusions, and other key items plus other relevant financial and market data). **Note: The Department recognizes that the discussion of requisite insurance with an Applicant may require a number of communications while an application is pending. Thus, the question of whether a given premium would “distort the sales price” of a Technology might not arise when the application is submitted. If the question does arise later in the process, the Applicant may submit appropriate information at that time.**

TE12.3. Insurance Point of Contact

Provide a point of contact, including telephone number and e-mail address for someone authorized to discuss your company’s insurance information with the Department. This point of contact may be the same person identified in your registration statement and may be your counsel, insurance expert, or any other person with appropriate information.

TE12.4. Revenue Projection

In order for us to determine the amount of insurance that would not unreasonably distort the sales price of your Technology, we need you to provide us with three (3)-year projected (prospective) revenue estimates for your Technology - all assuming that your Technology is approved under the SAFETY Act. The three-year period should include your current fiscal year, if incomplete, and two subsequent years.

If you do not have current year sales for your Technology, please provide us with three (3)-year projected revenue data.

The revenue data needs only to pertain to your Technology and the numbers need only be summarized data (that is, we do not require the revenue sources to be itemized). The revenue data should be matched with summarized cost data (e.g., cost of goods sold); as with the revenue data, we do not require breakdown of data by cost centers.

TE12.5. Deployment

Please establish how the deployment of your Technology as an anti-terrorism technology would expose you to extraordinarily high liability and what this liability might be. This can be accomplished by developing a plausible scenario that establishes how the Technology could be the proximate cause of third-party claims in the event of an act of terrorism. Please make the scenario and third-party liability claims specific to the deployment and use of your Technology.

TE13. Financial Data

Certain financial information regarding your company and projected/prospective technology revenue is particularly relevant to the application process. This is especially true when questions arise as to whether insurance costs for specified coverage limits unduly distort the price of your Technology. We may request additional information from the Applicant, if necessary, during the application process.

- TE13.1.** Please provide a copy of the Seller's financial statement for the most recent fiscal year. For public companies, the most recent SEC annual report (Form 10-K) and SEC quarterly report (Form 10-Q), together with any amendments thereto, should suffice. For non-publicly traded companies, you may choose to include the following information for the most recent fiscal year: income statement, statement of cash flow, and balance sheet as well as pro forma financial statement. OSAI will seek additional and more specific information only when necessary for a particular application.

ADDITIONAL ATTACHMENTS

Provide all supporting documentation.

DECLARATION FOR WRITTEN SUBMISSIONS

I declare, to the best of my knowledge and belief, that the information provided in response to the questions set forth in this Application for SAFETY Act liability protections is true, factual, and correct, and that I am an authorized agent of the Applicant.

Prepared By: _____ Title (if applicable): _____

Signature: _____ Date: ___/___/20__

The signature of the Preparer must be notarized below:

State of: _____ County of: _____

Subscribed and sworn before me this _____ day of _____

My Commission Expires on: _____

Instructions for Completing the Developmental Testing and Evaluation Designation Application Form:

Application Type

Item TE1. Type of Application

If you have not previously filed an Application for SAFETY Act liability protections for this Technology or have not filed a request for Pre-Application Consultation, check “Initial Filing.”

If you have filed a request for Pre-Application Consultation regarding this Technology but have not previously filed an Application for SAFETY Act liability protections, check the second box: “Application following a Pre-Application Consultation.”

If you have previously applied for SAFETY Act liability protections for this Technology, check the third box: “Resubmission of Previous Application.” This case applies if any previous applications for this Technology were withdrawn, found to be incomplete, or were declined. Previously incomplete or declined applications will not affect the evaluation of your current application; this information is requested for administrative and record-keeping purposes only.

Registration Information

Item TE2. Registration Information

Please check the appropriate box relating to your registration status.

Item TE2.1. Name of Applicant/Seller

Enter your Seller name as listed on your registration form.

Overview of the Anti-Terrorism Technology

Item TE3. Non-Proprietary Summary

Item TE3.1. If this is the first application for this Technology, assign a name to your Technology. This is the name that will appear on Developmental Testing and Evaluation Designation that may be issued.

Item TE3.2.

The purpose of this item is to help the Department recognize potential conflicts of interest and to avoid disclosing your application information to inappropriate evaluators. The Department is committed to protecting your sensitive business data from improper disclosure.

Provide a brief description of your company, including place of incorporation, a description of your business, and the Technology that is the subject of the

Application. When describing your company, focus on identifying any affiliates that will be involved with your Technology (e.g., parent companies, subsidiaries, joint venture partners, holding companies, etc.). When describing your Technology, focus on providing information that will help the Department identify which Subject Matter Experts (SMEs) would be best qualified to evaluate your Technology. This description should be no more than two sentences long and should be appropriate for placement on a public Web site if your application is approved.

The purpose of the company description and Technology description is to help the Department recognize potential conflicts of interest and avoid disclosing your application information to inappropriate evaluators. The Department is committed to protecting your sensitive business data from improper disclosure. Do not include any sensitive or proprietary information in this summary. If you wish to include information on substantially similar QATTs or provide information regarding who your major competitors are with respect to the subject Technology, you may do so.

Item TE4. Nature of Your Technology

Please describe the nature of your Technology in two pages or less. The SAFETY Act applies to a broad range of anti-terrorism technologies. In your response to the question please describe whether your application is for an anti-terrorism product, service, combination of products and services, information technology, or some other form of intellectual property. If your Technology is a product or device, please describe the Technology in detail, including its principal elements, subsystems, and components. If your Technology is a service, please describe the nature of the service, the actions, activities, planning, training, and/or expertise involved in providing the service and how the service is designed to counter terrorist threats. If your Technology is an “integrator” of various products, services, or legacy systems, indicate how the Technology will integrate the various component parts.

Developmental Testing and Evaluation Designation

Under the SAFETY Act, the Secretary of the Department of Homeland Security will consider enumerated, non-exclusive criteria when evaluating a Technology for potential Developmental Testing and Evaluation Designation. The Act gives the Secretary discretion in determining whether to issue a Developmental Testing and Evaluation for a Technology.

This section of the Application requests information that is necessary to evaluate your Technology. Attach your responses to this section as one attachment. Not all questions will be applicable to all types of technology. If a particular request or question does not seem relevant to your Technology, do not leave a question blank or merely refer to a previous response; explain why you do not think it is relevant in your response for that item.

This section must be presented in a narrative format, referring to each section below. The ATT Details section should be written so that the reader may clearly understand what your Technology is, what it does, and how it operates. The narrative sections should consist of your claims about the capabilities, and effectiveness of your Technology in an anti-terrorism context. It is important that all of your claims are supported by relevant documentation in some manner. Depending on the nature of your technology, e.g., product vs. service, that support would normally include such items as case examples, test data, audits, assessments, reports, specification sheets, operating manuals, instructors manuals, performance reports, procedural manuals, and the like. It is vital that you cross reference the supporting documentation to each claim you make in order that our reviewers understand what material you wish us to evaluate. You should provide a Table of Contents listing as a separate attachment which itself, lists your numbered attachments or exhibits.

Item TE5. Description of your Technology

One of the most important parts of the application process is precisely defining the scope of your Technology for evaluation and Designation. In order for the Secretary to issue liability protections to your Technology, you must define with specificity what that Technology is – that is, what you provide to your customers when you sell that Technology, what it does, how it works, and what aspects of it are invariable from deployment to the next. Note: embellishments, marketing materials, and elements which cannot be substantiated in the rest of the application should not be included. In response to this section, include the following:

- Company name, business structure, additional sellers, and states of incorporation, as applicable;
- Name of the Technology;
- Nature of the Technology;
- Purpose or intent of the Technology;
- Description of how the Technology works;
- A statement of where the Technology is intended to be utilized, e.g., in the private sector, for the Federal government, for the military, etc.;
- A brief description (no more than two lines) of the type of terrorist attacks or attempted terrorism acts the Technology is expected to counter; and,
- The principal elements, systems, or components provided to customers (indicating, which components, if any, are optional)

The above elements as you provided in your Application will be translated into a concise description by the Office of SAFETY Act Implementation, as in the following example:

(Name of company, and any subsidiaries), a (State of Incorporation) company, provides the (Name of technology) which is designed to (Purpose of the technology). (Name of Technology) e.g., does this by (Briefly describe how it works) for (Place of deployment or type of customer).

The Technology is used for the following anti-terror purpose(s) (type of threat). The Technology includes the following elements:

- *(list e.g., hardware and software)*
- *(list – e.g., integration services)*
- *(list- e.g., training and consultation)*

After developing your description, you should refer back to key sub-components or services when developing support for your ability to provide each part of your Technology. Your description should answer the following questions:

- How and where may your Technology be used? If your Technology is a device, address what training, if any, is necessary to use your Technology. If your Technology is a service, describe what types of facilities you might serve and how your Technology is tailored to providing anti-terrorism services at those locations.
- Explain the underlying principles or properties that allow your Technology to perform its functions and achieve its purposes. If your Technology consists of devices, explain the operational principles of those devices. If your Technology consists of services, explain how those services are implemented to ensure consistent quality wherever they are delivered and whether these services conform to recognized industry standards. If your Technology consists of software, explain the key features and algorithms. If your Technology consists of some other kind of product, explain how you produce that product. This information will help the Department understand the precise scope of the Technology for which you are applying for SAFETY Act coverage.
- What are the important elements that make up your Technology? That is, what are the component processes, devices, software, or other contributing activities and technologies that will be included in your specification? How are they defined or delineated? Be aware that any ancillary components of your Technology that are identified in your specification (e.g., manuals, training, maintenance, etc.) should be supported in subsequent sections by sufficient information to evaluate them. What parts of your business, if any, are explicitly not included in this specification for purposes of this application?

Examples of component systems and activities of your Technology might include:

- Equipment
- Software
- Software design
- Personnel training and qualifications

- Staffing
- Algorithms
- Consulting services
- Systems integration services
- Decision support systems or services
- Maintenance contracts
- Periodic upgrades, post-deployment reviews
- Testing services
- Quality control features

If your Technology is primarily service-based, focus on describing the various activities and sub-processes that contribute to the overall delivery of your service(s). This information will help the Department understand the precise scope of your Technology.

In addition to describing what you do, you should also describe any elements, processes, or activities that complement or interact with your Technology but that are not specifically part of the Technology in this application and may be supplied by the end-user. These might include other technologies you sell, activities performed by your customers, technologies provided by other vendors, or parts of the public infrastructure. This information will help the Department understand the precise scope of Technology you are establishing in this specification. If your Technology helps to integrate new components with legacy systems, please indicate that.

Item TE6. Nature of Test Scenario

Please provide us with a test plan or a detailed test strategy. The test plan or strategy should include the nature of the test (e.g., field study, lab study, pilot program participation), the entity that will conduct the test (e.g., internal, private third-party, Government sponsor), time frame and discussion of the adequacy of the length of the test, proposed test methodology, location of the test, and summary rationale for conducting the test. Please include information relating to Government or Government-sponsored testing of your Technology. Your test strategy or plan should also address the expected outcomes of the test, how the test metrics collected will demonstrate the effectiveness of your Technology, and the expected test product (report, briefing, etc.).

Keep in mind that the purpose of a DT&E Designation is to allow you to collect information that will support the effectiveness of your Technology in a Designation application. What do you expect to be able to deliver to the Department at the end of your DT&E Designation that will allow us to make a determination about the effectiveness of your Technology? If you are providing services or support services, will you be developing process documents? How will you implement these plans?

Item TE7. Deployment and Operation

Describe the steps involved in the course of developing, producing and providing your Technology to a customer. Using the Technology Description developed above, you should provide **documented support** of your capability to provide all elements of your Technology in these areas.

It is useful to begin by describing the sequence of steps involved in providing your Technology to a customer, from initial contact to final deployment. Focus your description on the process of producing and deploying your Technology, as opposed to the end result or the nature of any specific tangible deliverable. Where possible, include the estimated time required for each activity or step.

If your Technology involves physical products, your discussion might include elements such as:

- Manufacturing capabilities (where will the Technology be manufactured, are facilities in place, is there a manufacturing plan in place?)
- Production, including quality assurance, factory acceptance tests, manufacturing standards, and the like.
- Installation and configuration plans, to include site acceptance tests
- Operation plans, operator instructions, and the like
- Training, including any user manuals or terms of use
- Maintenance and any maintenance records
- Monitoring
- Upgrade policies
- Warranties and service contracts
- Post-deployment quality control

Where your Technology includes software or information technology, please include information such as:

- Software lifecycle development plans, including any verification, validation, and accreditation (VV&A)
- Software upgrade policies
- Network architecture information
- Network security information
- Network stress testing
- Customer input into user access

Where your Technology involves services, your description might include (as relevant):

- Customer requirements analysis
- Determining scope of effort

- Operation plans, including items such as post orders, statements of work, and management plans
- Implementation plans
- Post-delivery support
- Process and Procedure Documents
- Quality Control, to include any independent or third-party audits, managerial oversight at the local and corporate level, policy revisions, lessons learned, etc.

Please see “Additional Attachments” below for instructions on supporting documents and classified materials submission.

Item TE8. Magnitude of Risk

Please provide an assessment of the magnitude of risk to the public from the type of terrorist activities your Technology would counter. Your response should identify the types or categories of potential terrorist activities your Technology is intended to address. Your response should also present, to the extent practicable, estimates of the scope of the injury, property or other damage, economic loss, loss of life, or other harm, including financial harm, that could result from such terrorist activity. Additionally, please also describe how the Technology has been deployed to date, if applicable to counter terrorist threats.

Item TE9. Impact of SAFETY Act Designation

Please describe how your plans for selling or deploying your Technology would be affected should the SAFETY Act’s system of risk and litigation management not be made available. Please describe how the Technology will be deployed in the future if SAFETY Act Developmental Testing and Evaluation Designation is issued.

Item TE10. Effectiveness and Utility

You should support each element, sub-component, or model listed in the Technology Description provided in response to TE.5. If you apply the same information to multiple elements, sub-components, or models, please indicate why this is reasonable.

The information you provide here should include the primary material supporting your belief that your Technology can be a valuable counter terrorism tool. The kind of documentation you provide will depend on the nature of your Technology.

If your Technology is primarily a device or software product, then your documentation should emphasize available developmental and operational test data that indicate the likely operating performance of that device or software. This could include performance in past deployments, independent test results, field tests (e.g. performance against simulated attacks), internal test data, customer studies, scientific studies of the techniques involved, industry reports, Government or military publications, or any other documentation that suggests or supports the potential usefulness of your Technology. Please attach copies of any such reports, publications, or evidence by using the additional attachment sections that would

facilitate analysis and evaluation of your Technology by Subject Matter Experts (SMEs).

If your Technology is primarily a service, your documentation should emphasize the quality of the process whereby that service is delivered and include any available evidence of successful similar past deployments. In particular, you should provide or cite information that documents any of the following:

- The quality of the services you provide.
- Your specification for the processes you use to provide those services.
- The repeatability of your processes for providing those services.
- Your methods for monitoring your adherence to your processes.
- Your means for measuring the success of a particular deployment of your services.
- Your reputation as a provider of these services.

The Department will not ordinarily conduct any tests of your Technology for purposes of SAFETY Act evaluation or compare your Technology directly to other similar technologies. Reviewers will evaluate your Technology against the criteria for Developmental Testing and Evaluation Designation primarily on the basis of the information you provide. Accordingly, the information you provide in response to this question should be as comprehensive as possible.

Please provide an overview narrative of your Technology, including references and summaries of supporting documentation. If you reference any material that is not publicly available, it should be included as an attachment to your application. If you refer to information provided elsewhere in your application, cite it by internal title, item number, and the name of the attachment. Even though your entire application will be treated as confidential, you should (but are not required to) specially mark those portions of your application which contain proprietary and/or business confidential information.

Please see “Additional Attachments” below for instructions on supporting documents and classified materials submission.

If POCs are provided as sources of information or testimonials, please indicate that you have contacted them and that they are expecting to hear from DHS related to your Technology. Also, please be advised that:

1. The SAFETY Act may make contact with persons that you list as having information to support the claims in your Application; however it is your responsibility to make sure that you have provided all information to support your Application at the time of submission. Do not simply include a listing of your customers for DHS to contact. We suggest that you obtain written testimonials from your customers.

2. If you believe that third-parties will be able to provide additional supporting information for which you do not have access (such as for example, classified reports, audits, vulnerability assessments, or other reports or data), remember to:
 - a) Be sure that the contact information you provide to us is current.
 - b) Notify your references that you have submitted a SAFETY Act application and that we may contact them.
 - c) Make sure that you are giving us the contact that will be able to provide the best information on the nature of the past sale or deployment, and on how your technology actually worked.
 - d) You may also supply contact information for third-parties, e.g., government officials, who might supply customer testimonials. These individuals should be able to supply actual knowledge of how your technology works and of its utility. We suggest that you obtain this information in writing.
 - e) For procurements, list the name and contact information for the procurement officer or similar person in charge of the contract, proposal, or Request for Proposal.

Item TE11. Summary of Developmental Testing and Evaluation Qualifications

If you wish, you may use this item to summarize in broad terms why you believe your Technology qualifies for SAFETY Act Developmental Testing and Evaluation Designation. Please provide whatever additional information that would be helpful to the Department in analyzing and evaluating your Technology. If you are providing attachments, please provide a Table of Contents.

If POCs are provided as sources of information or testimonials, please indicate that you have contacted them and that they are expecting to hear from DHS related to your Technology. Also, indicate what information we should expect from each POC.

Item TE12. Insurance Data

Document any and all current insurance coverage that would be available to satisfy otherwise compensable third-party claims arising out of, relating to, or resulting from an act of terrorism were your Technology deployed in defense against, response to, or recovery from such act and found to have caused harm. Please state whether such policy includes TRIA coverage, as amended, or other insurance policy(ies) provisions or endorsements that cover acts of terrorism. Please specify any relevant exclusions or cancellation provisions that would limit the availability of the current policies to satisfy third-party claims.

If POCs are provided as sources of information or testimonials, please indicate that you have contacted them and that they are expecting to hear from DHS related to your Technology. Also, indicate what information we should expect from each POC.

Item TE12.1. Current Insurance

For item TE12.1.a, provide the name of the company identified as the primary insured for the relevant current policy. If you are an additional insured instead of the primary policy holder, please identify the primary insured and each other firm identified as an additional named insured in item TE12.1.b.

In item TE12.1.k., specify the type of terrorism coverage that is provided under the specified policy(ies) (e.g., Terrorism Risk Insurance Extension Act, as amended, other coverage, no terrorism exclusion). Please specify the overall and per-occurrence limits that would apply to the terrorism coverage.

Item TE12.2. Unavailability of Insurance

The SAFETY Act provides that a Seller may not be required “to obtain liability insurance of more than the maximum amount of liability insurance reasonably available from private sources on the world market at prices and terms that will not unreasonably distort the sale price of Seller’s anti-terrorism technologies.” If you are unable to obtain appropriate insurance, please provide information concerning your attempts to obtain insurance coverage for your Technology (e.g., written communications from insurance companies or brokers explaining why your Technology cannot be insured). If insurance is available for terrorism events but at rates which would distort the sales price of your Technology, document the price of that insurance and provide information to support how it would affect the price of your Technology. You may wish to contact OSAI with questions concerning what information would be most helpful to provide in response to this item.

Note: The Department recognizes that the discussion of requisite insurance with an Applicant may require a number of communications while an application is pending. Consequently, the question of whether a given premium would “distort the sales price” of a Technology might not arise when the Application is submitted. If the question does arise later in the process, the Applicant may submit appropriate information at that time.

Item TE12.3. Insurance Point of Contact

Provide a point of contact, including telephone number and e-mail address for someone authorized to discuss your company’s insurance information with the Department. This point of contact may be the same person identified in your registration statement and may be your counsel, insurance expert, or any other person with appropriate information.

Item TE12.4. Revenue Projection

In order for us to determine the amount of insurance that would not unreasonably distort the sales price of your Technology, we need you to provide us with three (3)-year projected (prospective) revenue estimates for your Technology – all assuming

that your Technology is approved under the SAFETY Act. The three-year period should include your current fiscal year, if incomplete, and two subsequent years.

If you do not have current year sales for your Technology, please provide us with three (3)-year projected revenue data.

The revenue data needs only to pertain to your Technology and the numbers need only be summarized data (that is, we do not require the revenue sources to be itemized). The revenue data should be matched with summarized cost data (e.g., cost of goods sold); as with the revenue data, we do not require breakdown of data by cost centers.

Item TE12.5. Deployment

Please establish how the deployment of your Technology as an anti-terrorism technology would expose you to extraordinarily high liability and what this liability might be. This can be accomplished by developing a plausible scenario that establishes how the Technology could be the proximate cause of third-party claims in the event of an act of terrorism. Please make the scenario and third-party liability claims specific to the deployment and use of your Technology.

Item TE13. Financial Data

Certain financial data may be used in for analyzing the appropriate amount of insurance coverage for your particular Technology. This is particularly true when questions arise as to whether insurance costs unduly distort the price of your Technology. Accordingly, you may be asked to provide certain financial data to OSAI as part of your application. Even in such a case, OSAI will not demand financial information when it is not necessary for a particular application, and will not disclose sensitive or proprietary information outside the application process. Applicants may wish to provide financial data relating exclusively to the Technology.

Item TE13.1. It may be helpful to attach your latest financial statement. If you are a public company, your latest SEC 10-K annual report and SEC 10-Q quarterly report together with any amendments thereto should suffice. If your company is not publicly traded, you may include the following information for the most recent fiscal year: income statement, statement of cash flow, balance sheet, and pro-forma financial statement. OSAI may seek additional and more specific information but only when necessary for a particular application.

Additional Attachments

In the process of answering the questions above, you might find it useful to attach additional documents in support of your answers. These items can be included in your application by using the “Additional Attachments” feature. When answering the items above, it is appropriate to refer to attachments by name and or number. Examples of common attachments might include, but are not limited to, the following: test reports demonstrating the effectiveness of the Technology, operating

manuals, training manuals, project/program management plans, quality assurance plans, quality control plans, copies of company certifications, results from pilot studies, testimonials from customers, and warranties.

Submitting Documents as Attachments:

Documents in support of your Application should be uploaded as Attachments together with a separate numbered Table of Contents document. Attachments should be individually labeled and or otherwise clearly identified. For ease of use, we prefer that documents are uploaded individually, rather than in a “Zip” file. Do not submit the ATT Details Narrative document in write-protected format since that information must be accessible to us for use in the creation of OSAI Program documentation. Ideally, attachments should be cross referenced in your narrative response, with clear indications of the purpose of the Attachment. It is usually unnecessary to upload third-party material, such as government training presentations, regulations or standards documents. You may refer to these documents in your narrative and provide an open-source link. For additional assistance in uploading documentation, or for further questions, please call the SAFETY Act Help Desk.

Submitting classified or sensitive data or information:

In cases where the effectiveness data, e.g., audits or testing, that you wish to have evaluated is classified or sensitive and is held by a third party; the Department will attempt to assist you in obtaining this information, however, you MUST facilitate the transfer of that data to the SAFETY Act office PRIOR to the submission of your Application. This means that you must notify the custodian of records for your customer of your Application to the SAFETY Act and that Department requires access to those records. Once you have completed this step, you must provide the Department with the name and contact information of the holder of these records. When a date has been set for the transfer of information, you may submit your Application. For further assistance call the SAFETY Act Help Desk.

Declaration for Written Submissions

An authorized agent of the Applicant must, in the presence of a Notary, sign and date this form before submitting it to OSAI. For electronic or Web submissions, follow the instructions provided at safetyact.gov.
