

Early Career Doctorates Needed for NSF Research Interviews

If you earned a Ph.D. or other doctorate degree in the last 10 years you're eligible!

\$50 as an expression of appreciation for your participation

The National Science Foundation (NSF) is preparing for a national survey of early career doctorates in all fields, including non-science fields. Early career doctorates in all positions including postdocs, faculty, and non-faculty will participate in the survey. The study will provide NSF with information about the career paths and research opportunities for persons who earned their doctorate or doctorate-equivalent degree within the last 10 years.

In August and September 2013, RTI International*, a local research organization in Research Triangle Park (RTP), will be conducting one-on-one interviews with early career doctorates to evaluate survey questions. The interview will take about 90 minutes after which participants will receive \$50 as an expression of appreciation.

Please register at the link below or contact RTI International for more information. We will select up to 32 participants from the registrants.
