

Survey of Earned Doctorates Preliminary Data: 2012

THESE DATA ARE CONFIDENTIAL. These data are Federal government data protected from disclosure by the National Science Foundation Act of 1950, as amended, section 14(i), 42 USC 1873(i). Your institution is granted access to data from your own graduates, provided that **you use these data internally for statistical and institutional research purposes only, as authorized by the National Science Foundation Act, as amended.** Your institution shall not release, distribute, or share any of these micro-data records, in any format, with individuals or agencies outside of your institution. The NSF Act includes serious penalties for breach of confidentiality and for unauthorized use. **We are requiring the signature of your institution's graduate dean (or other appropriate official empowered to enter into this legal agreement) on this form to affirm your institution's commitment to safeguard the confidentiality of these data.** If you wish to use statistical research results in presentations or reports outside your institution, you must forward the results to NSF for assurance that they do not disclose individually identifiable data; you may also need to consult with your institution's IRB. These data you receive may also be protected by the FERPA and should be handled with appropriate security measures. The following statement shall appear in all reports or presentations that use these data: "The use of NSF data does not imply NSF endorsement of the research methods or conclusions."

DATA NOTE: Per the agreement between the Survey of Earned Doctorates and your institution, these data are preliminary and are subject to change. The Survey of Earned Doctorates staff performs a number of data verification and cleaning steps to preliminary data prior to entering those data into the Doctorate Records File. Data cleaning may result in some of the data elements in this file being changed in the final Doctorate Records File. The verification process may result in some of the records that are present in this data file being excluded from the final Doctorate Records File. The Survey of Earned Doctorates accepts no responsibility for conclusions that may be drawn from preliminary data.

By signing your name you are affirming that your institution will use the data for statistical and institutional research purposes only and will not share data outside of your institution.
