Reporter ID	
--------------------	--

- **Report the number of employees** on the payroll at the end of FY 2012 including part-time employees, but excluding temporary and contract employees not included on your payroll records. A count taken at some other date during the reporting period may be given provided it is a reasonable estimate of employees on the payroll at the end of FY 2012. If the number of employees at the end of FY 2012 (or when the count was taken) was unusually high or low due to temporary factors (e.g., a strike), enter the number of employees that reflects normal operations. If the number of employees fluctuates widely during the year due to seasonal business variations, report the average number of employees on the payroll during FY 2012. Base such an average on the number of employees on the payroll at the end of each pay period, month or quarter. If precise figures are not available, give your best estimate.
- **Report employee compensation** expenditures made by an employer in connection with the employment of workers, including cash payments, payments in-kind, and employer expenditures for employee benefit plans including those required by statute. Base compensation data on payroll records. Report compensation which relates to activities that occurred during the reporting period regardless of whether the activities were charged as an expense on the income statement, charged to inventories, or capitalized. DO NOT include data related to activities of a prior period, such as those capitalized or charged to inventories in prior periods. DO NOT include compensation of contract workers not carried on the payroll of this U.S. Reporter. Total employee compensation consists of **wages and salaries** of employees and employer expenditures for all **employee benefit plans**.
 - **Wages and salaries** include gross earnings of all employees before deduction of employees' payroll withholding taxes, social insurance contributions, group insurance premiums, union dues, etc. Include time and piece-rate payments, cost of living adjustments, overtime pay and shift differentials, bonuses, profit-sharing amounts, stock-based compensation, and commissions. Exclude commissions paid to independent personnel who are not employees. Include direct payments by employers for vacations, sick leave, severance (redundancy) pay, etc. Exclude payments made by, or on behalf of, benefit funds rather than by the employer. Include employer contributions to benefit funds. Include in-kind payments, valued at their costs, that are clearly and primarily of benefit to the employees as consumers. Do not include expenditures that benefit employers as well as employees, such as expenditures for plant facilities, employee training programs, and reimbursement of business expenses.
 - **Employee benefit plans** include employer expenditures for all employee benefit plans including those mandated by government statute, those resulting from collective bargaining contracts and those that are voluntary. Include Social Security and other retirement plans, life and disability insurance, guaranteed sick pay programs, workers' compensation insurance, medical insurance, family allowances, unemployment insurance, severance pay funds, etc. Also, include deferred post-employment and post-retirement expenses per FASB ASC 715 (FAS 106). Part IV – Exports and Imports By the U.S. Reporter

Goods only valued f.a.s. at the port of exportation; do not include services. See *Instruction Booklet, Part V.*

IMPORTANT NOTES

Report exports and imports of goods by the U.S. Reporter in FY 2012. Report all goods that physically left or entered the U.S. customs area. Report data on a "shipped" basis, i.e., on the basis of when and to (or by) whom the goods were shipped. This is the same basis as official U.S. trade statistics to which these data will be compared. Do **not** record a U.S. import or export if the goods did not physically enter or leave (i.e., were not physically shipped to or from) the United States, even if they were charged to the U.S. Reporter by, or charged by the U.S. Reporter to, a foreign person.

U.S. Reporters normally keep their accounting records on a "charged" basis, i.e., on the basis of when and to (or by) whom the goods were charged. The "charged" basis may be used if there is no material difference between it and the "shipped" basis. If there is a material difference, the "shipped" basis must be used or adjustments made to data on a "charged" basis to approximate a "shipped" basis. The data should include goods only; they should **exclude** services.

Capital goods — Include capital goods but exclude the value of ships, planes, railroad rolling stock, and trucks that were temporarily outside the United States transporting people or goods.

Consigned goods — Include consigned goods in the trade figures when shipped or received, even though they are not normally recorded as sales or purchases, or entered into intercompany accounts when initially consigned.

In-transit goods — Exclude from exports and imports the value of goods that are in-transit. In-transit goods are goods that are not processed or consumed by residents in the intermediate country(ies) through which they transit; the in-transit goods enter that country(ies) only because that country(ies) is along the shipping lines between the exporting and importing countries. In-transit imports are goods en route from one foreign country to another via the United States (such as from Canada to Mexico via the United States), and in-transit exports are goods en route from one part of the United States to another part via a foreign country (such as from Alaska to Washington State via Canada).

Packaged general use computer software — Include exports and imports of packaged general use computer software. Value such exports and imports at the full transaction value, i.e., the market value of the media on which the software is recorded and the value of the information contained on the media. Do not include exports and imports of customized software designed to meet the needs of a specific user. This type of software is considered a service and should not be included as trade in goods. Also do not include negotiated leasing fees for software that is to be used on networks.

Natural gas, electricity, and water — Report **ONLY** the product value of natural gas, electricity, and water that you produce or sell at wholesale as exports and imports of goods. **DO NOT** report the service value (transmission and distribution).

52 On what basis were the trade data in the section prepared? — Mark (X) one.

- 4101 ¹ "Shipped" basis.
- ¹ ² "Charged" basis without adjustments, because there is no material difference between the "charged" and "shipped" bases.
- ¹ ³ "Charged" basis with adjustments to correct for material differences between the "charged" and "shipped" bases.

Part III — Financial and Operating Data of U.S. Reporter

Section B — Distribution of Sales or Gross Operating Revenues (34 — 36)

34 Sales of goods — Goods are normally economic outputs that are tangible. Report as sales of goods:

- Mass produced media, including exposed film, video tapes, DVDs, audio tapes, and CDs.
- Books. NOTE: Book publishers — To the extent feasible, report as sales of services all revenues associated with the design, editing, and marketing activities necessary for producing and distributing books that you both publish and sell. If you cannot unbundle (i.e., separate) these revenues from the value of the books you sell, then report your total sales as sales of goods or services based on the activity that accounts for a majority of the value.
- Energy trading activities where you take title to the goods. NOTE: If you act in the capacity of a broker or agent to facilitate the sale of goods and you do not take title to the goods, report your revenue (i.e., commissions) as sale of services in **35**.
- Magazines and periodicals sold in retail stores. NOTE: Report subscription sales as sales of services in **35**.
- Packaged general use computer software.
- Structures sold by businesses in real estate.
- Revenues earned from building structures by businesses in construction.
- Electricity, natural gas, and water. NOTE: Revenues derived from transmitting and/or distributing these goods, as opposed to revenues derived from the sale of the actual product, should to the extent feasible, be reported as sales of services in **35**.

35 Sales of services — Services are normally economic outputs that are intangible. Report as sales of services:

- Advertising revenue.
- Commissions and fees earned by companies engaged in finance and real estate activities.
- Mass produced audiovisual media that are delivered electronically, including film, music, manuscripts, or other digital content.

- Premiums earned by companies engaged in insurance activities. NOTE: Calculate as direct premiums written (including renewals) net of cancellations, plus reinsurance premiums assumed, minus reinsurance premiums ceded, plus unearned premiums at the beginning of the year, minus unearned premiums at the end of the year.
 - Commissions earned by agents or brokers (i.e., wholesalers) who act on behalf of buyers and sellers in the wholesale distribution of goods. NOTE: Agents or brokers do not take title to the goods being sold.
 - Magazines and periodicals sold through subscriptions. NOTE: Report magazines and periodicals sold through retail stores, as sales of goods in **34**.
 - Newspapers.
 - Pipeline transportation.
 - Software downloaded from the Internet, electronic mail, an Extranet, an Electronic Data Interchange network, or some other online system.
 - Computer systems design and related services.
 - Negotiated licensing fees for software to be used on networks. Licensing fees associated with rights to reproduce or distribute software.
 - Electricity transmission and distribution, natural gas distribution, and water distribution.
- Report the source of real estate rental income in **31** through **33** based on the location of the property.

36 Investment income — Report dividends and interest generated by finance and insurance activities as investment income. NOTE: Report commissions and fees as sales of services in **35**.

Finance or insurance companies that include investment income in gross operating revenues should report the source of such investment income in **31** through **33** based on the location of the issuer of the financial instrument whether publicly issued or privately placed. If the location of the issuer is unknown, then substitute the nationality of the issuer. If both the location and nationality of the issuer are unknown, and an intermediary (e.g., trustee, custodian, or nominee) is used to manage the investment (financial instrument or real estate) use the country of location of the intermediary.
