

Customers who register for an account on the product Web site are given the option of being enrolled automatically to receive SAMHSA email updates. Any optional questions answered by the customer during the Web site registration process automatically are mapped to the profile generated for the email update system, thereby reducing the collection of duplicate information.

SAMHSA collects all customer information submitted for Web site registration and email update subscriptions electronically via a series of Web forms on the samhsa.gov domain. Customers can submit the Web forms at their leisure, or call SAMHSA's toll-free Call Center and an information

specialist will submit the forms on their behalf. The electronic collection of information reduces the burden on the respondent and streamlines the data-capturing process. SAMHSA places Web site registration information into a Knowledge Management database and places email subscription information into a database maintained by a third-party vendor that serves multiple Federal agencies and the White House. Customers can change, add, or delete their information from either system at any time.

The respondents are behavioral health professionals, researchers, parents, caregivers, and the general public.

SAMHSA proposes two changes to the information collection. The first

change is increasing the number of responses based on the average annual number of actual responses in 2011 and 2012. The second change is modifying the response options for "Organization Type" in the following ways: "Treatment Facility" will be changed to "Behavioral Health Treatment Facility", "Individual/Group Practice" will be changed to "Other Health Care Facility", and adding four new categories including "Military/Veterans Organization," "Criminal Justice/Courts," "Health Insurer," and "Human Resources/Employee Assistance Program."

SAMHSA estimates the burden of this information collection as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN

	Number of respondents	Annual frequency per response	Total annual responses	Hours per response	Total hours
Web Site Registration	38,605	1	38,605	.033 (2 min.)	1,286
Email Update Subscription	21,138	1	21,138	.017 (1 min.)	359
Total	59,743		59,743		1,645

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP) is authorized by Public Law 90–448 (1968) and expanded by Public Law 93–234 (1973). The National Flood Insurance Act of 1968 requires that the Federal Emergency Management Agency (FEMA) provide flood insurance. Title 44 CFR 60.3, Floodplain management criteria for flood-prone areas, ensures that communities participating in the NFIP, in Special Flood Hazard Areas (SFHAs), have basement construction at the lowest floor elevation or above the 100 year flood elevation, or Base Flood Elevation. This requirement is to reduce the risks of flood hazards to new buildings in SFHAs and reduce insurance rates. Title 44 CFR 60.6(c) allows communities to apply for an exception to permit and certify the

construction of flood proof residential basements in SFHAs. This certification must ensure that the community has demonstrated that the areas of special flood hazard, in which residential basements will be permitted, are subject to shallow and low velocity flooding and adequate flood warning time to notify residents of impending floods.

Collection of Information

Title: Residential Basement Floodproofing Certification.

Type of Information Collection: Revision of a currently approved information collection.
OMB Number: 1660-0033.
FEMA Forms: FEMA Form 086-0-24, Residential Basement Floodproofing Certificate.
Abstract: The Residential Basement Floodproofing Certification is completed by an engineer or architect and certifies that the basement floodproofing meets the minimum floodproofing specifications of FEMA. This certification is for residential structures located in non-coastal Special

Flood Hazard Areas in communities that have received an exception to the requirement that structures be built at or above the Base Flood Elevation (BFE). Residential structures with certification showing the building is flood proofed to at least 1 foot above the BFE are eligible for lower rates on flood insurance.
