We don't need electronic logs in our trucks. It is an unnecessary expense at a time when the economy is still limping along. I have a good friend who is on electronic logs for the first time in his 20 plus years in the industry. He is ALWAYS pushing the envelope in order make a living. He drives when tired due to having the electronic log in his truck. His company will usually set loads where he barely has enough time to get his load delivered. It is extremely stressful for him. I have spoken to others who have had similar experiences.

There is no good reason to force an entire industry to install electronic logs in our trucks to satisfy the desires of a handful of anti trucking advocates. I can buy a year of paper logs for less than the monthly charge to have an electronic log in one of my trucks.

Forcing drivers and carriers to install electronic logs in trucks make our roads less safe. Drivers push longer than they should in order to comply with the electronic nanny. Many of our better and more experienced drivers are leaving this industry due to all the excessive regulations. Many are leaving due to the forced installation of electronic logs. This legislation would never have passed had it not been inserted in the highway bill at the last minute. It had to be hidden in order to be passed. It could not pass on it's own. There must be a reason why so many in this industry don't want the electronic logs. Common sense would tell us

Submitter Name: Michael Goodman

Mailing Address: 4206 South Terrace

City: Chattanooga

Country: United States

State or Province: TN

Postal Code: 37412

Fax Number: 423-722-4852

Organization Name: M Goodman & Co USA Inc

Submitter's Representative:

Michael Goodman

that this is a bad piece of legislation which should never be implemented. For many drivers it is like having a dot officer sitting in the passenger seat constantly monitoring their every move.

One attraction of this industry has been the freedom that it affords. That is becoming less and less with this type of legislation. It is also forcing carriers to fill seats with drivers that they might not otherwise have considered. Lets use common sense and get rid of this unnecessary and useless legislation.
