I have concerns about the constitutionality of being tracked and monitored. In 7 years of operating my own authority I have seen much abuse of the rules already by the people enforcing them and the agencies trying to cover it up. I would think the agencies enforcing the rules should be examined first before adding more burden to the small operators of buying more unneeded equipment to fix a non-existent problem. I believe the FMCSA is in need of downsizing as they serve only the function of creating more unneeded rules to justify its existence. The interstate commerce clause doesn't give the FMCSA the right to invade our privacy and violate constitutional rights. Companies will always find ways to circumvent the rules the only ones to suffer will be the little carriers. GO AWAY FMCSA!
