Eobrs are a violation of my business. I should not have to purchase a machine that connects to my truck just to satisfy the Department of Transportation. The paper log books have worked just fine for my business without any violations of my HOS. The paper log books cost \$25 per year as an expense that is reasonable. I should not have to purchase a nanny box at any cost to my business since it is not needed. I also feel this violates my privacy as my truck will constantly be tracked via GPS satellites. I should also not have to race against a clock beeping at me telling me to pull over in the middle of a free way so I don't get a log violation. This would be alot more hazardous to the motoring public.
