Balances

17 What were the receivable and payable balances between the U.S. Reporter and the foreign affiliate?

- Base data on the books of the U.S. Reporter.
- · Include current and long-term items, indebtedness resulting from a capital lease, and the net book value of equipment under a long-term operating lease.
 - If leases between the U.S. Reporter and the foreign affiliate are capitalized, then include the outstanding capitalized value as an intercompany balance. Lease payments should be disaggregated into the amount that is (i) a reduction in the intercompany balance, to be reported in items A or B, and (ii) interest to be reported in 18.
 - If leases between the U.S. Reporter and the foreign affiliate are operating leases for more than one year that have not been capitalized, include the net book value. Lease payments should be disaggregated into the amounts that represent (i) the return of capital, consisting of the depreciation component for long-term operating leases, which should be reflected as a reduction in items A or B, and (ii) rent or net rent, which is not covered by this survey.
- The current quarter's opening balance should be equal to the prior quarter's closing balance; therefore, if it is necessary to translate the balance into U.S. dollars, use the same exchange rate to translate the opening balance for the current guarter as was used to translate the closing balance of the prior guarter.
- Derivatives contracts Exclude the value of outstanding financial derivative contracts or any payments or receipts resulting from the settlement of these contracts. For example, the settlements of interest rate derivatives should NOT be reported as interest or as another type of transaction on this form. Derivatives contracts are covered by the Treasury International Capital (TIC) Form D, Report of Holdings of, and Transactions in, Financial Derivatives Contracts.
