Why is the Family and Early Care and Education Provider Relationship Quality Study Being Done?

The demand for child care and education for children under 6 years old has grown a great deal over the last three decades. With the increased enrollment in early care and education programs, researchers became interested in learning about how the quality of the relationships between children's families and their teachers/child care providers affect children, their parents, and those teaching and caring for children.

The purpose of this study is to test a new survey that will be used by teachers, child care providers, early learning programs, researchers, and policy makers to assess the quality of early education and child care environments.

For More Information:

To find out more about the study, visit the Office of Planning, Research, and Evaluation's website at:

Family and Early Care and Education Provider Relationship Quality Study

U.S. Department of Health and Human Services,
Administration for Children and Families,
Office of Head Start, and
Office of Planning, Research and Evaluation

OMB Control Number: 0970-0355

Expiration Date: 1/31/2015

About the Project

What is the Family and Early Care and Education Provider Relationship Quality study about?

The goal of this project is to develop a new survey of the quality of the relationship between families and providers of early care and education for children 5 years of age and younger. The survey will examine this relationship from both parents' and providers' perspectives. The results will help early educators, child care providers, and policy makers improve the quality of children's care and early learning environments.

Who will be able to participate?

Head Start program staff and teachers, teachers, child care providers, program directors, and parents will be asked to participate in this study. The surveys given to each participant will ask how about how early care and education providers and parents work together to educate and care for children.

Do I have to participate?

Your participation in this study is voluntary. By participating, you will help improve the care and early education that young children in the U.S. receive.

Will anyone else see my answers?

No, all of your answers will be kept private to the extent permitted by law. Your answers will not be disclosed or used for any purpose other than this research.

Examples of topics covered

Providers:

- How often you talk with parents about their children.
- How often you talk with parents about your rules, expectations, and classroom plans.
- The physical environment of the program in which you work.

Parents:

- How often you talk with your child's early care and education provider about topics such as your child's day.
- How often you and your provider set goals for your child.
- The physical environment of the program your child attends.

Program Directors:

- Enrollment information (e.g., the number and ages of children enrolled).
- Your program's physical environment and information and services your program may offer parents.

Who is Conducting the Study?

The study is sponsored by the Office of Head Start (OHS) and the Office of Planning, Research, and Evaluation (OPRE), both of which are part of the Administration for Children and Families in the U.S. Department of Health and Human Services. Westat and Child Trends, two research firms in the Washington, DC metropolitan areas, are conducting the study.

The **Office of Head Start** is a national program that promotes school readiness through educational, health, nutritional, social and other services to enrolled children and families. (

<http://www.acf.hhs.gov/programs/ohs/>)

The **Office of Planning, Research, and Evaluation (OPRE)** is responsible for advising the Assistant Secretary for Children and Families on increasing the effectiveness and efficiency of programs to improve the economic and social well-being of children and families. (
