	As the MILIODE study representative has already mentioned the number of the study is to
SC2.	As the MIHOPE study representative has already mentioned, the purpose of the study is to learn more about families who enroll in home visiting programs and how those programs provide different kinds of services to children and families.
	I will ask you some questions and type in your answers. This interview should take about an hour to complete. There are no right or wrong answers to these questions. The things you tell me are very important, so please be as accurate as possible.
	You may stop me at any time, and you may ask me to go back to earlier questions to change your answers. If I ask you something that you are uncomfortable answering, just tell me and I will move on to the next question.
	Everything we talk about today is completely private. No one from the home visiting program will see or hear your answers. All of the study results will be reported for groups of parents; no results will be analyzed or reported for individuals.
	Your participation is completely voluntary. If you choose not to complete this interview, it will not affect your or your child's participation in home visiting services. When we finish, Mathematica will send you a \$25 gift card to thank you for your help.
	If you have any questions at any time during the interview, please feel free to ask them. Do you have any questions before we begin?
