SUPPLEMENTARY INFORMATION: The BLM prepared the Wyoming Greater Sage-Grouse Draft LUP Amendments/Draft EIS to address a range of alternatives focused on specific conservation measures across the Wyoming range of the Greater Sage-grouse (GRSG). This Draft LUP Amendments/Draft EIS is one of 15 separate planning efforts that are being undertaken as part of the BLM and USFS National Greater Sage-grouse Planning Strategy. The Draft LUP Amendments/Draft EIS may amend the RMPs for the BLM Casper, Kemmerer, Newcastle, Pinedale, Rawlins and Rock Springs field offices, as well as the LRMPs for the Bridger-Teton and Medicine Bow National Forests and the Thunder Basin National Grassland. Current management decisions for resources are described in the following RMPs/LRMPs:

- Casper RMP (2007)
- Kemmerer RMP (2010)
- Newcastle RMP (2000)
- Pinedale RMP (2008)
- Rawlins RMP (2008)
- Green River RMP (1997) (being revised under the Rock Springs RMP)
- Bridger-Teton National Forest LRMP (1990)
- Medicine Bow National Forest LRMP (2003)
- Thunder Basin National Grassland LRMP (2002)

The EIS planning area includes approximately 40 million acres of BLM, National Park Service, USFS, U.S. Bureau of Reclamation, State, local, and private lands located in northwestern, southwestern, southeastern, and northeastern Wyoming in 11 counties (Albany, Carbon, Converse, Fremont, Lincoln, Natrona, Niobrara, Sublette, Sweetwater, Uinta and Weston). Within the EIS decision area, the BLM and the USFS administer approximately 16

million surface acres and 16 million acres of Federal oil and gas mineral (subsurface) estate. Surface management decisions made as a result of this Draft LUP Amendments/Draft EIS will apply only to the BLM- and the USFS-administered lands in the decision area. The decision area is defined as those BLM- and USFS-administered lands and Federal mineral estate within three categories of habitat identified by the Wyoming Game and Fish Department:

- **Core Habitat**—Areas identified as having the highest conservation value for maintaining sustainable GRSG populations, including breeding, late brood-rearing and winter concentration areas.
- **General Habitat**—Areas of seasonal or year-round habitat outside of priority habitat.
- **Connectivity Habitat**—Areas identified as broader regions of connectivity important to facilitating the movement of GRSG and maintain ecological processes.

The formal public scoping process for the LUP Amendments/EIS began on December 9, 2011, with the publication of a Notice of Intent in the **Federal Register** (76 FR 77008), and ended on March 23, 2012. The BLM held five scoping open houses in January and February 2011. The BLM used public scoping comments to help identify planning issues that directed the formulation of alternatives and framed the scope of analysis in the Draft LUP Amendments/Draft EIS. The scoping process was also used to introduce the public to preliminary planning criteria, which set limits on the scope of the Draft LUP Amendments/Draft EIS.

Major issues considered in the Draft LUP Amendments/Draft EIS include special status species management (GRSG specifically), energy and mineral development, lands and realty (including transmission), livestock grazing, fire, wild horses, vegetation management, special management areas (ACEC nominations), socioeconomic (particularly impacts to local communities) and invasive species.

The Draft LUP Amendments/Draft EIS evaluates five alternatives in detail, including the No Action Alternative (Alternative A) and four action alternatives (Alternatives B, C, D, and E). The BLM identified Alternative E as the preferred alternative. Identification of this alternative, however, does not represent final agency direction, and the Proposed LUP Amendments/Final EIS may reflect changes or adjustments based on information received during public comment, from other new information, or from changes in BLM policies or priorities. The Proposed LUP
