Kelley-McDonough Low-Effect Habitat Conservation Plan for the Morro Shoulderband Snail, Community of Los Osos, San Luis Obispo County, California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comment.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), have received an application from John Kelley and Denise McDonough for a 10-year incidental take permit under the Endangered Species Act of 1973, as amended. The application addresses the potential for "take" of the federally endangered Morro shoulderband snail that is likely to occur incidental to the construction, maintenance, and occupation of a single-family residence on an existing legal single-family-zoned parcel in the unincorporated community of Los Osos, San Luis Obispo County, California. The applicants would implement a conservation program to minimize and mitigate project activities that are likely to result in take of the Morro shoulderband snail as described in their plan. We invite comments from the public on the application package that includes the Kelley-McDonough Low-Effect Habitat Conservation Plan for the Morro Shoulderband Snail. This proposed action has been determined to be eligible for a Categorical Exclusion under the National Environmental Policy Act of 1969, as amended (NEPA).

DATES: To ensure consideration, please send your written comments by April 5, 2013.

ADDRESSES: You may download a copy of the habitat conservation plan, draft environmental action statement and low-effect screening form, and related documents on the Internet at <http://www.fws.gov/ventura/>, or you may request copies of the documents by U.S. mail or phone (see below). Please address written comments to Diane K. Noda, Field Supervisor, Ventura Fish and Wildlife Office, U.S. Fish and Wildlife Service, 2493 Portola Road, Suite B, Ventura, California 93003. You may alternatively send comments by facsimile to 805-644-3958.

FOR FURTHER INFORMATION CONTACT: Julie M. Vanderwier, Fish and Wildlife Biologist, at the above address or by calling 805-644-1766.

SUPPLEMENTARY INFORMATION:

Background

The Morro shoulderband snail (=banded dune snail; *Helminthoglypta walkeriana*) was listed by the Service as endangered on December 15, 1994 (59 FR 64613). Section 9 of the Act and its implementing regulations (16 U.S.C. 1531 *et seq.*) prohibit the take of fish or wildlife species listed as endangered or threatened. "Take" is defined under the Act to include the following activities: "to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct" (16 U.S.C. 1532); however, under section 10(a)(1)(B) of the Act, we may issue permits to authorize incidental take of listed species. "Incidental take" is defined by the Act as take that is not the purpose of carrying out of an otherwise lawful activity. Regulations governing incidental take permits for threatened and endangered species are provided in the Code of Federal Regulations at 50 CFR 17.32 and 17.22. Issuance of an incidental take permit must not jeopardize the existence of federally listed fish, wildlife, or plant species.

John Kelley and Denise McDonough (hereafter, the applicants) have submitted a low-effect habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) to address take of Morro shoulderband snail that is likely to occur as the result of direct impacts to up to 0.18 acre (8,000 square feet) of highly disturbed habitat invaded by nonnative species that is occupied by the species. Take would be associated with the construction, maintenance, and occupation of a single-family residence on an existing parcel legally described as County of San Luis Obispo Assessor Parcel Number 074-471-002 and located at 2285 Bay Vista Lane in western portion of Los Osos, an unincorporated community of San Luis Obispo County, California. The applicants are requesting a permit for take of Morro shoulderband snail that would result from HCP "covered activities," which include the construction, maintenance, and occupation of a single-family residence and associated landscaping/infrastructure.

The applicants propose to minimize and mitigate take of Morro shoulderband snail associated with the covered activities by fully implementing the HCP. The following measures would be implemented to minimize the effects of the taking: (1) Pre-construction and concurrent construction monitoring surveys for Morro shoulderband snail
