

requires an emissions characterization and a literature search for information on the health effects of those emissions. Voluminous Tier 1 data for gasoline and diesel fuel were submitted by API and others in 1997. Tier 1 data have been submitted for biodiesel, water/diesel emulsions, several atypical additives, and renewable gasoline and diesel fuels. Tier 2 requires short-term inhalation exposures of laboratory animals to emissions to screen for adverse health effects. Tier 2 data have been submitted for baseline diesel, biodiesel, and water/diesel emulsions. Alternative Tier 2 testing can be required in lieu of standard Tier 2 testing if EPA concludes that such testing would be more appropriate. EPA reached that conclusion with respect to gasoline and gasoline-oxygenate blends, and alternative requirements were established for the API consortium for baseline gasoline and six gasoline-oxygenate blends. Alternative Tier 2 requirements have also been established for the manganese additive MMT manufactured by the Afton Chemical Corporation (formerly the Ethyl Corporation). Tier 3 provides for follow-up research, at EPA's discretion, when remaining uncertainties as to the significance of observed health effects, welfare effects, and/or emissions exposures from a fuel or fuel/additive mixture interfere with EPA's ability to make reasonable estimates of the potential risks posed by emissions from a fuel or additive. To date, EPA has not imposed any Tier 3 requirements. Under regulations promulgated pursuant to Section 211 of the Clean Air Act, (1) submission of the health-effects information is necessary for a manufacturer to obtain registration of a motor-vehicle gasoline, diesel fuel, or fuel additive, and thus be allowed to introduce that product into commerce, and (2) the information shall not be considered confidential.

Form Numbers: None.

Respondents/affected entities: Manufacturers of motor-vehicle gasoline, motor-vehicle diesel fuel, and additives for those fuels.

Respondent's obligation to respond: Mandatory per 40 CFR 79.

Estimated number of respondents: 2.

Frequency of response: On occasion.

Total estimated burden: 19,200 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$2 million per year, includes \$0.5 million annualized capital or operation & maintenance costs.

Changes in Estimates: There is a decrease of 2,000 hours in the total estimated respondent burden compared

with the ICR currently approved by OMB. This decrease is due to the conclusion of a testing program included in the previous ICR.

Dated: February 13, 2013.

Pursuant to section 3506(c)(2)(A) of the Paperwork Reduction Act (PRA), EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: EPA would like to continue to collect annual compliance reports from obligated parties, quarterly reports for all EPA Moderated Transaction System (EMTS) users, generation and assignment of Renewable Identification Numbers (RINs) quarterly reports from biofuels producers and importers and third party disclosure reports from

biofuel feedstock producers by way of the Agency's Central Data Exchange (CDX). The recordkeeping and reporting of this regulation will allow EPA to monitor compliance with the RFS program. We inform respondents that they may assert claims of business confidentiality (CBI) for information they submit in accordance with 40 CFR 2.203.

Form Numbers:

RFS0103: RFS2 Q1 2012 Activity Report
 RFS0104: RFS2 Activity Report
 RFS0201: RFS1 RIN Transaction Report (only if RFS1 RINs were bought, sold, retired, or reinstated)
 RFS0600: RFS2 Renewable Fuel Producer Supplemental Report (if applicable)
 RFS0701: RFS2 Renewable Fuel Producer Co-products Report
 RFS0801: RFS2 Renewable Biomass Report
 RFS0901: RFS2 Production Outlook Report
 EMTS: RFS2 RIN Transaction Report
 EMTS: RFS2 RIN Generation Report (Equivalent to RFS0400)
 RFS0301: RFS2 2010 Annual Compliance Report
 RFS0302: RFS2 2011 Annual Compliance Report
 EMTS: RFS2 RIN Transaction Report

Respondents/affected entities:

Producers of Renewable Fuels, Importers, Obligated Parties, Parties who own RINS (including foreign RIN owners).

Respondent's obligation to respond: mandatory Sections 114 and 208 of the Clean Air Act (CAA), 42 U.S.C. 7414 and 7542.

Estimated number of respondents: 2,092,731.

Frequency of response: Quarterly.

Total estimated burden: 6,379,263 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$60,459,623 (per year), includes \$ 320 annualized capital or operation & maintenance costs.

Changes in Estimates: EMTS was introduced at the onset of the RFS2 program and was not a feature of RFS1. For the new EMTS system, all parties who owned RINs were required to re-register, disclose feedstock sources, prepare quarterly reports on RIN activity and submit annual compliance reports (obligated party only). Re-submittal provisions utilized in RFS1 are no longer required, resulting in a decrease in total responses for this ICR. The total responses for industry dropped from 4,525,625 to 2,092,731 a difference of 2,432,894 responses. Currently, biofuels producers and importers submit required quarterly reports along with

their third party disclosure on feedstock producers to EPA. All users of the EMTS system are required to submit quarterly RIN reports.

The number of respondents or users of the EMTS system has more than doubled from 1,059,326 to 2,092,731 an increase of 1,639,992 users due to the additional response burden for mapping foreign and domestic plantation/forest land owners and foreign biofuel feedstock producers which were not reflected in the previous ICR reporting period. With an increase in the number of respondents, total burden hours have increased by more than 4 million costing the industry \$60,459,623; however, a decrease of \$47,882,366 was realized. The reduction in the total cost for this renewal is due to the fact that the EMTS system is automated and more efficient and helps users to prepare reports instantly, reducing the amount of time and the cost associated with responding, even with more than a million added users. This notable factor increased the industry burden hours, but will lower the total cost of this information collection request if renewed.
