Agricultural Prices

ISSN: 1937-4216

Released October 31, 2013, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, United States Department of Agriculture (USDA).

## Special Note

USDA's National Agricultural Statistics Service is updating the price index methodology beginning with the January 2014 Agricultural Prices release. Methodological changes include updating the current base reference (1990-1992) to 2011; increasing vegetable, fruit, and nut commodity coverage; reclassification of the prices received commodity groups; and updating monthly commodity market weights.

USDA's National Agricultural Statistics Service is suspending a number of statistical surveys and reports resulting from reduced funding. Suspended commodity programs impacting the Agricultural Prices report are non-citrus fruit, tree nuts, and vegetables. Check the NASS website at www.nass.usda.gov for any future updates to these programs

## October Farm Prices Received Index Up 1 Point

The preliminary All Farm Products Index of Prices Received by Farmers in October, at 187 percent, based on $1990-1992=100$, increased 1 point ( 0.5 percent) from September. The Crop Index is down 3 points ( 1.5 percent) but the Livestock Index is unchanged. Producers received higher prices for wheat and lower prices for corn, soybeans, and potatoes. In addition to prices, the overall index is also affected by the seasonal change based on a 3-year average mix of commodities producers sell. Increased monthly movement of soybeans, corn, cottonseed, and cotton offset the decreased marketing of wheat, milk, hogs, and hay.

The preliminary All Farm Products Index is down 23 points (11 percent) from October 2012. The Food Commodities Index, at 189, increased 8 points ( 4.4 percent) from last month but decreased 7 points ( 3.6 percent) from October 2012.

## Prices Paid Index up 1 Point

The October Index of Prices Paid for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW) is 218 percent of the 1990-1992 average. The index is up 1 point ( 0.5 percent) from September but unchanged from October 2012. Higher prices in October for concentrates, feeder cattle, feeder pigs, and nitrogen offset lower prices for feed grains, complete feeds, diesel, and gasoline.

## Prices Received by Farmers

The October All Farm Products Index is 187 percent of its 1990-1992 base, up 0.5 percent from the September index but 11 percent below the October 2012 index.

All crops: The October index, at 203, decreased 1.5 percent from September and is 15 percent below October 2012. Index decreases for feed grains \& hay, oilseeds, and potatoes \& dry beans more than offset the index increases for commercial vegetables, food grains, fruits \& nuts, and upland cotton.

Food grains: The October index, at 237, is 3.9 percent above the previous month but 11 percent below a year ago. The October price for all wheat, at $\$ 7.09$ per bushel, is up 29 cents from September but $\$ 1.29$ below October 2012.

Feed grains \& hay: The October index, at 199, is down 15 percent from last month and 32 percent below a year ago. The corn price, at $\$ 4.49$ per bushel, is down 91 cents from last month and $\$ 2.29$ below October 2012. The all hay price, at $\$ 177$ per ton, is up $\$ 1.00$ from September but down $\$ 14.00$ from last October. Sorghum grain, at $\$ 7.34$ per cwt, is 76 cents below September and $\$ 5.06$ below October last year.

Cotton, Upland: The October index, at 129 , is up 4.9 percent from September and 12 percent above last year. The October price, at 77.9 cents per pound, is up 3.3 cents from the previous month and 8.1 cents above last October.

Oilseeds: The October index, at 225, is down 3.0 percent from September and 8.5 percent lower than October 2012. The soybean price, at $\$ 12.60$ per bushel, decreased 70 cents from September and is $\$ 1.60$ below October 2012.

Fruits \& nuts: The October index, at 212, is up 2.4 percent from September but 5.4 percent lower than a year ago. Price increases for lemons and oranges more than offset the lower price for grapefruit.

Commercial vegetables: The October index, at 206, is up 23 percent from last month and 36 percent above October 2012.

Potatoes \& dry beans: The October index, at 152 , is down 7.9 percent from last month but 12 percent above October 2012. The all potato price, at $\$ 8.01$ per cwt, is down 77 cents from September but up 99 cents from last October. The all dry bean price, at $\$ 39.00$ per cwt, is down 10 cents from the previous month but $\$ 1.30$ above October 2012.

Livestock and products: The October index, at 163, is unchanged from last month but up 0.6 percent from October 2012. Compared with a year ago, prices are higher for broilers, hogs, and calves. Prices for milk, turkeys, cattle, and market eggs are down from last year.

Meat animals: The October index, at 164 , is down 0.6 percent from last month but 1.9 percent higher than last year. The October hog price, at $\$ 69.70$ per cwt, is down $\$ 1.00$ from September but $\$ 7.70$ higher than a year ago. The October beef cattle price of $\$ 122$ per cwt is down $\$ 1.00$ from last month and October 2012.

Dairy products: The October index, at 155 , is up 0.6 percent from a month ago but 6.1 percent lower than October last year. The October all milk price of $\$ 20.30$ per cwt is up 20 cents from last month but down $\$ 1.30$ from October 2012.

Poultry \& eggs: The October index, at 168, is down 1.2 percent from September but 3.7 percent above a year ago. The October market egg price, at 83.6 cents per dozen, increased 1.3 cents from September but is 0.1 cents below October 2012. The October broiler price, at 53.0 cents per pound, is down 1.0 cent from September but 4.0 cents above a year ago. The October turkey price, at 70.1 cents per pound, is up 2.2 cents from the previous month but down 6.8 cents from a year earlier.

## Reliability of Prices Received Estimates

Definition: Prices received represent sales from producers to first buyers. They include all grades and qualities. The average commodity price from the survey multiplied by the total quantity marketed theoretically should give the total cash receipts for the commodity.

Survey procedures: Primary sales data used to determine grain prices were obtained from probability samples of about 1900 mills and elevators. These procedures ensure that virtually all grain moving into commercial channels has a chance of being included in the survey. Generally, States surveyed account for 90 percent or more of total United States production. Livestock prices are obtained from packers, stockyards, auctions, dealers, and market check data from AMS-USDA, private marketing organizations, and state commodity groups and agencies. Inter-farm sales of grain and livestock are not included since they represent very small percentages of the total sales. Grain marketed for seed is also excluded. Fruit and vegetable prices are obtained from sample surveys and market check data from AMS-USDA, private marketing organizations, state agencies, and universities.

Summary and estimation procedures: Survey quantities sold are expanded by strata to state levels and used to weight average strata prices to a state average. State prices are then weighted to a United States price based on expanded sales. Recommendations are prepared by the State Field Offices and reviewed by the Agricultural Statistics Board in Washington, D.C. State recommendations are reviewed for reasonableness with survey data, other States, and recent historic estimates.

Revisions: For most items, the current month's preliminary price represents a 3-5 day period around the 15 th of the month. Previous month's prices represent actual dollars received for quantities sold during the entire month. Revisions are published in monthly issues of Agricultural Prices.

Reliability: United States price estimates based on probability surveys generally have a sampling error of less than one percent for the major commodities such as corn, wheat, soybeans, cotton, and rice. Current methods of summarization for non-probability commodities are not designed directly to calculate sampling errors. However, analytical measures approximate the United States relative sampling errors at around five percent. Any non-sampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these non-sampling errors.

## Prices Paid by Farmers

The October Index of Prices Paid for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW), at 218 (1990-1992=100), is up 0.5 percent from September but unchanged from October 2012.

Production index: The October index, at 230, is unchanged from last month but decreased 0.9 percent from last year. Higher prices in October for concentrates, feeder cattle, feeder pigs, and nitrogen offset lower prices for feed grains, complete feeds, diesel, and gasoline.

Feed: The October index, at 255 , increased 0.4 percent from September but decreased 8.9 percent from last October. Since September, higher prices for concentrates and hay \& forages offset lower prices for feed grains, complete feeds, and supplements.

Livestock and poultry: The October index, at 184, increased 5.1 percent from last month and 13 percent from last year. Since September, prices for feeder cattle, feeder pigs, and milk cows are higher. The October feeder cattle price, at $\$ 162.00$ per cwt, is up $\$ 6.40$ per cwt from the September price. October feeder pigs averaged $\$ 174.00$ per cwt, up $\$ 30.00$ per cwt from September.

Fertilizer: The October index, at 282, is up 0.4 percent from September but 13 percent below October a year ago. Since September, higher prices for nitrogen offset lower prices for potash \& phosphate and mixed fertilizer.

Chemicals: The October index, at 160, increased 0.6 percent from September and 3.9 percent from last October. Compared with last month, prices for herbicides, insecticides, and fungicides/other are higher.

Fuels: The October index, at 359, is down 1.6 percent from a month earlier and 3.0 percent below October 2012. Compared with last month, prices are lower for diesel and gasoline but higher for LP gas.

Machinery: The October index, at 263, is unchanged from September but is 1.5 percent above last October.
Consumer price index: The September 2013 Consumer Price Index, as issued by the Bureau of Labor Statistics, for all urban consumers (CPI-U) increased 0.1 percent before seasonal adjustment to a level of 234.149 (1982-1984=100). The August index is 233.877 . For the 12 month period ending in September, the overall index increased 1.2 percent.

Feed Price Ratios - United States: October 2013 with Comparisons

| Feed price ratio ${ }^{1}$ | October 2012 | September 2013 | Preliminary October 2013 |
| :---: | :---: | :---: | :---: |
| Broiler-feed: pounds of broiler grower feed equal in value to 1 pound of broiler, live weight ${ }^{2}$ $\qquad$ | 2.9 | 3.6 | 3.9 |
| Market egg feed: pounds of laying feed equal in value to 1 dozen eggs ${ }^{3}$ | 5.6 | 6.4 | 7.4 |
| Hog-corn: bushels of corn equal in value to 100 pounds of hog, live weight | 9.1 | 13.1 | 15.5 |
| Milk-feed: pounds of $16 \%$ mixed dairy feed equal in value to 1 pound of whole milk $\qquad$ | 1.74 | 1.88 | 2.09 |
| Steer and heifer-corn: bushels of corn equal in value to 100 pounds of steer \& heifers, live weight $\qquad$ | 18.7 | 23.5 | 28.5 |
| Turkey-feed: pounds of turkey grower equal in value to 1 pound of turkey, live weight ${ }^{5}$ | 4.9 | 5.0 | 5.6 |

${ }^{1}$ Effective January 1995, prices of commercial prepared feeds are based on current United States prices received for corn, soybeans, alfalfa hay, and all wheat.
${ }^{2}$ The price of commercial prepared broiler feed is based on current United States prices received for corn and soybeans. The modeled feed uses 58 percent corn and 42 percent soybeans.
${ }^{3}$ The price of commercial prepared layer feed is based on current United States prices received for corn and soybeans. The modeled feed uses 75 percent corn and 25 percent soybeans.
${ }^{4}$ The price of commercial prepared dairy feed is based on current United States prices received for corn, soybeans, and alfalfa hay. The modeled feed uses 51 percent corn, 41 percent alfalfa hay, and 8 percent soybeans.
${ }^{5}$ The price of commercial prepared turkey feed is based on current United States prices received for corn, soybeans, and wheat. The modeled feed uses 51 percent corn, 28 percent soybeans, and 21 percent wheat.

Prices Received Used to Calculate Feed Price Ratios - United States: October 2013 with Comparisons [Price data source for livestock and poultry commodities is United States Department of Agriculture's Agricultural Marketing Service]

| Item | October 2012 | September 2013 | Preliminary October 2013 |

## Reliability of Prices Paid Estimates

Definition: Prices paid by farmers represent the average costs of inputs purchased by farmers and ranchers to produce agricultural commodities. Conceptually, the average price when multiplied by quantity purchased should equal total producer expenditures for the item.

Survey procedures: The prices paid data are obtained from establishments that sell goods and services to farmers and ranchers. Annually, about 8,500 firms are randomly selected from lists by type of item sold with an average response rate in the range of 75-80 percent. Firms are asked to report the price for the specified item "most commonly bought by farmers" or that was the "volume seller". Approximately 135 items are surveyed each March to represent all production input items purchased. The survey reference period for most items is the five business days centered at the 15 th of the month. Separate prices paid surveys are conducted for agricultural chemicals, fuels, feed, fertilizer, machinery, and seed.

Summary and estimation procedures: The annual March Prices Paid Survey is summarized as a non-probability survey. Average prices reported are aggregated to the region and United States level using weights available from expenditure data and other administrative sources. Price recommendations are prepared by the State Field Offices and Headquarters for review by the Agricultural Statistics Board in Washington, D.C. Also, the change in price level for individual items surveyed are combined to the regional and United States levels, and are published as prices paid indexes referenced to a specific base period. Prices paid indexes for new autos and trucks, building materials, farm supplies, motor supplies, and marketing containers are updated based on price changes measured in selected Bureau of Labor Statistics (BLS) indexes.

Revisions: Any revisions are published in the monthly and in annual issues of Agricultural Prices. The basis for revision must be supported by additional data that directly affect the level of the estimate. More revisions are likely for March when separate prices paid surveys are conducted, in lieu of BLS indexes, by the USDA to measure price change.

Reliability: Current methods of summarization for the March data are not designed directly to calculate sampling errors. However, analytical measures approximate the United States relative sampling errors for major items around 10 percent. Any non-sampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these non-sampling errors.

Program change: Effective January 1, 1995, the National Agricultural Statistics Service updated the weights and changed the construction of its prices paid and received by farmers' indexes. A Federal Register Notice dated October 28, 1994 discussed these program modifications.

A 1990-1992 reference and base period replaced the 1977 reference and 1971-1973 base weight period. Five-year moving average weights replaced the current fixed 1971-1973 base period weights. The 1910-1914=100 price indexes, required by statute for computing parity prices, were linked forward based on the changes in the new 1990-1992=100 indexes. The new indexes were constructed by multiplying the ratios of the current prices to the base period prices by the moving average weights (adjusted for seasonal marketing patterns for the prices received indexes).

## Information Contacts

## General

Troy Joshua, Chief, Environmental, Economics and Demographics Branch ................................................ (202) 720-6146
Below are the commodity specialists to contact for additional information.

## Crop Prices Received

## Access to NASS Reports

For your convenience, you may access NASS reports and products the following ways:
> All reports are available electronically, at no cost, on the NASS web site: http://www.nass.usda.gov
> Both national and state specific reports are available via a free e-mail subscription. To set-up this free subscription, visit http://www.nass.usda.gov and in the "Follow NASS" box under "Receive reports by Email," click on "National" or "State" to select the reports you would like to receive.

For more information on NASS surveys and reports, call the NASS Agricultural Statistics Hotline at (800) 727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass @ nass.usda.gov.

The U.S. Department of Agriculture (USDA) prohibits discrimination against its customers, employees, and applicants for employment on the bases of race, color, national origin, age, disability, sex, gender identity, religion, reprisal, and where applicable, political beliefs, marital status, familial or parental status, sexual orientation, or all or part of an individual's income is derived from any public assistance program, or protected genetic information in employment or in any program or activity conducted or funded by the Department. (Not all prohibited bases will apply to all programs and/or employment activities.)

If you wish to file a Civil Rights program complaint of discrimination, complete the USDA Program Discrimination Complaint Form (PDF), found online at http://www.ascr.usda.gov/complaint filing cust.html, or at any USDA office, or call (866) 632-9992 to request the form. You may also write a letter containing all of the information requested in the form. Send your completed complaint form or letter to us by mail at U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, by fax (202) 690-7442 or email at program.intake@usda.gov.

[^0]:    ${ }^{1}$ Cows and steers \& heifers.
    ${ }^{2}$ Barrows \& gilts and sows.

[^1]:    (NA) Not available.
    ${ }^{1}$ Marketings based on a survey of cotton buyers in the major producing States - Alabama, Arizona, Arkansas, California, Georgia, Louisiana, Mississippi, North Carolina, Tennessee, and Texas.
    ${ }^{2}$ Purchases by private firms and rice (rough equivalent) shipped by cooperatives.

[^2]:    (D) Withheld to avoid disclosing data for individual operations.
    (S) Insufficient number of reports to establish an estimate.
    ${ }^{1}$ Some processed sales included in fresh sales.

[^3]:    Seasonally adjusted price as percentage of parity price.
    ${ }^{2}$ Wholesale extracted. Adjusted base price derived from state annual averages prices weighted by production. For 1982 through 1985 the national averages are the support prices.
    ${ }^{3}$ Equivalent packinghouse-door returns for California, New York, Oregon, and Washington. Price at point of first sale for other states.

[^4]:    See footnote(s) at end of table.

[^5]:    (D) Withheld to avoid disclosing data for individual operations.
    (NA) Not available.

[^6]:    (D) Withheld to avoid disclosing data for individual operations.
    (NA) Not available.
    (S) Insufficient number of reports to establish an estimate.

    Second year.

[^7]:    - Represents zero.

[^8]:    ${ }^{1}$ Simple average required for parity regulations. Weighted 1990-1992 average equals 100 . Average is year-to-date for current year.

[^9]:    ${ }^{1}$ Simple average required for parity regulations. Weighted 1910-1914 average equals 100 . Average is year-to-date for current year.

[^10]:    See footnote(s) at end of table.

[^11]:    ${ }^{1}$ Simple average and is year-to-date for current year.
    ${ }^{2}$ For the 1990-92=100 base period, the Services \& Rent Index is separated.
    ${ }^{3}$ Feed, livestock \& poultry purchases, and seed.
    ${ }^{4}$ Fertilizer, agricultural chemicals, fuels, supplies \& repairs, autos \& trucks, machinery, building materials, and services \& rent.

[^12]:    ${ }^{1}$ Simple average and is year-to-date for current year.
    ${ }^{2}$ For the 1990-1992=100 base reference period, the Services \& Rent Index is separated.
    ${ }^{3}$ Ratio of index of prices received to index of prices paid for commodities, services, interest, taxes, and wage rates.
    ${ }^{4}$ Ratio of the index of prices received after adjustment for government payments to the index of prices paid for commodities, services, interest, taxes, and wage rates.

[^13]:    ${ }^{1}$ Simple average and is year-to-date for current year.

[^14]:    ${ }^{1}$ Simple average and is year-to-date for current year.
    ${ }^{2}$ For the 1990-92=100 base period, the Services \& Rent Index is separated.
    ${ }^{3}$ Feed, livestock \& poultry purchases, and seed.
    ${ }^{4}$ Fertilizer, agricultural chemicals, fuels, supplies \& repairs, autos \& trucks, machinery, building materials, and services \& rent.
