

Appendix G: DRS In-Depth Interview: Agency Directors

Public reporting burden for this collection of information is estimated to average 60 minutes per response, including the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. This information collection is voluntary. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: Reports Clearance Officer (Attn: OMB/PRA 0970-XXXX), Administration for Children and Families, Department of Health and Human Services, 370 L'Enfant Promenade, S.W., Washington, D.C. 20447.

Evaluation of the Head Start Designation Renewal System

In-Depth Interview Guide Multi-Purpose Agency Director

(60 minutes)

INTRODUCTION

Thank you for agreeing to meet with us today. I'm [INTERVIEWER NAME] and this is my colleague [ASSISTANT NAME], and we're researchers from the Urban Institute, a non-profit policy research organization in Washington, DC.

As part of a research study funded by the Office of Planning Research and Evaluation in the U.S. Department of Health and Human Services, we are visiting 15 Head Start grantees from across the country. The goal of these visits is to learn about grantees' perceptions of the Head Start Designation Renewal System, or DRS. We will combine the information we gather across programs to understand how Head Start programs are responding to the DRS and what their strengths and needs are.

During our visit to your program, we will be meeting with program leaders and members of your policy council and governing body to get different perspectives. Our meeting with you today will last about 60 minutes. The structure will be rather open-ended, meaning we have a list of specific questions to cover but we welcome any responses you may have.

There are no right or wrong answers. The purpose of the interview is to learn about your interpretation and reactions to the DRS. You should answer based on what it means to you, your program, and your community.

(Note to Researchers: Participants may mention sequestration. Sequestration and the DRS are not connected to each other, but obviously they are experiencing the effects at the same time. You should note all of what is said, but you should clarify that the DRS and sequestration are not part of the same initiative.)

INFORMED CONSENT

Before I begin my questions, I'd like to give you a copy of a consent form that describes our study procedures and your rights as a participant. If you agree to the study procedures, I'll ask you to sign and date your copy.

[NOTES TO FACILITATORS: Give copy of consent form to participant. Participant must sign and return one copy and may keep the second copy.]

- I'll point out that your participation in this study is completely voluntary. You may choose to not answer any question and may stop the interview at any time. Participation has no bearing on your Head Start grant.
- Everyone who works on this study has signed a *Staff Confidentiality Pledge* prohibiting disclosure of anything you say during the interview that would allow someone outside the research team, including government staff and officials, to identify you. The only exception is a researcher may be required by law to report suspicion of immediate harm to yourself, children, or others.
- Your name and other identifying information, such as the program's name and specific location, will be removed from the notes we take during the conversation.
- We value the time and information you will share with us today and want to make sure we accurately capture all the details. With your permission, we will audio record the session and take notes (written and/or on a laptop computer). Those notes will not include your name. The recording will serve as a back-up tool to ensure we capture all your comments in as close to your words as possible. Once the project is complete, all recordings will be destroyed. During the discussion, if you would like to stop the recording while you make a particular comment, please let us know and we will do so.

Before we get started, do you have any questions about the study, our study procedures, or the Urban Institute?

[If anyone objects to recording the discussion, the researcher who is not leading the interview will need to take thorough notes.]

1. To start, would you please tell me your official job title, how long you've worked in this position, and a little bit about your organization?
 - a) Tell me about the ways in which you are involved in managing your Head Start Program.
2. What do you see as the key strengths of your Head Start program?
3. Our conversation today will center on your perceptions and experiences with the Head Start Designation Renewal System, or DRS. As you may know, Head Start programs that meet certain conditions are now required to compete for renewed funding. Are you familiar with this new approach to Head Start grants? *(If no, give brief summary of DRS and adjust questions accordingly).*
 - a) How did you first learn about the DRS?
 - b) What did you think of the DRS when you first heard about it?
 - c) Have your impressions changed at all over time? How so?
 - d) What are your primary sources of information for learning about and understanding the DRS?
4. Are there aspects of the DRS that you find confusing or would like to know more about?
5. How do you see the DRS affecting your Head Start program?
 - a) Has the DRS made you think differently about your program or your approach to service delivery? What are you thinking about differently and why?
 - b) What kinds of positive effects, if any, has the DRS had on your program?
 - c) What kinds of negative effects, if any, has the DRS had on your program?
6. How, if at all, has the DRS affected your relationships with community partners?
7. Grantees may have different perspectives on the DRS depending on how their program has performed in the past or how concerned they are about being designated for competition. Where do you think your program fits?
 - a) *Probe if not covered by response:* How concerned are you that your program might meet one of the conditions for competition?

- b) If your program was designated for competition, what steps, if any, would you take?
8. Some communities we've seen have a large number of early care and education providers that could potentially apply for available Head Start funding. In other communities, few eligible providers or organizations exist. What are your thoughts on your community? (*Probe: Are there other organizations in your area that you think might apply for Head Start funding if it becomes available? What do you think of these providers/organizations?*)
9. Thinking back to before the DRS was implemented to now, what kinds of changes, if any, have you made in response to the DRS? *Optional probe: Have you made any changes to your classroom operations or staffing, management, or governance activities as a result of the DRS? Tell me about those changes.*
- a) Can you provide a few specific examples of the changes made? (*Probe: professional development, attention to specific performance standards, other service delivery changes, management approach/activities, governance activities, community partnerships, working with consultants*)
 - b) Are you planning any other changes for the near future that are in response to the DRS? What changes, and why?
 - c) How, if at all, do you think these changes are related to your Head Start program quality?
10. From your perspective, what kinds of resources or support does the program need to improve or maintain program quality?
11. Those are almost all of my questions. Before we wrap up, I want to ask you about two things. Overall, for the broader Head Start community, what do you think is the most problematic aspect of the DRS and what do you think is the most beneficial? (*Probe for both beneficial and problematic aspects*).

I don't have any additional questions for you. Is there anything I didn't ask that you want to tell me about the DRS?

This has been a really great discussion. Thank you very much for your time.
