Instructions: All submissions received must include the words “Department of Homeland Security” and the docket number for this action. Comments received will be posted without alteration at <http://www.regulations.gov>, including any personal information provided.

SUPPLEMENTARY INFORMATION: DHS established OBIM, formerly the US–VISIT Program, to meet specific legislative mandates intended to strengthen border security, address critical needs in terms of providing decision-makers with critical information, and demonstrate progress toward performance goals for national security, expediting of trade and travel, and supporting immigration system improvements. OBIM collects and disseminates biometric information (digital fingerprint images and facial photos) from individuals during their entry into the United States. This information is disseminated to specific DHS components; other Federal agencies; Federal, state, and local law enforcement agencies; and the Federal intelligence community to assist in the decisions they make related to, and in support of, the homeland security mission. Beginning on December 10, 2007, OBIM expanded the collection of fingerprints from two prints to ten. The new collection time of 35 seconds, an increase from the previous 15 seconds, is a result of this change, and includes officer instructions. Additionally, DHS published a final rule, entitled “United States Visitor and Immigrant Status Indicator Technology Program (US–VISIT); Enrollment of Additional Aliens

in US–VISIT; Authority To Collect Biometric Data From Additional Travelers and Expansion to the 50 Most Highly Trafficked Land Border Ports of Entry,” which became effective on January 18, 2009, and expanded the population of aliens subject to the requirement of having to provide biometrics in connection with their admission to the United States. *See* 73 FR 77473 (Dec. 19, 2008).

OMB is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
