

## National Transportation Safety Board

Washington, D.C. 20594

Office of Aviation Safety

August \_\_, 2013

Dear Sir or Madam:

Asiana Airlines records indicate you were a passenger on flight 214 on July 6, 2013. As you may know, the National Transportation Safety Board (NTSB) is an independent federal agency authorized by Congress to investigate and determine the probable cause of transportation accidents. The NTSB issues reports and makes recommendations to other federal and local agencies and to the aviation industry to prevent accidents and to prevent injuries caused by such accidents.

Enclosed is an NTSB passenger questionnaire, which contains information concerning how you can return the questionnaire to me. If the NTSB has an e-mail address at which we can send you correspondence, then you may have received, or might receive in the near future, an e-mail message containing the questionnaire. Completion of the questionnaire is voluntary, but we sincerely hope that you will take the time to complete it. Your completion of this detailed questionnaire will greatly assist the NTSB in evaluating the facts, conditions, and circumstances surrounding the accident.

Additionally, we are interested in obtaining copies of any photographs or video footage taken by passengers during or after the evacuation. These items often prove invaluable to our investigations. If you have any photographs or video footage you have not already provided to the NTSB, or would like to relate your experience via telephone, please contact me directly at

██████████.

Thank you in advance for your time and assistance.

Sincerely,

Jason T. Fedok  
Survival Factors Investigator
