USDA Food & Commodity Connection

USDA feels very strongly about not allowing spamming in our community. As such, we have developed our own anti-spamming policy protect our customers and future customers from such tactics.

Spam is ...

Spamming is defined as, "...flooding the Internet with copies of the same message, in an attempt to force the message on people who

not otherwise choose to receive it. Most 'Spamming' is commercial advertising, often for dubious products, get-rich-quick schemes, or quasi-legal services. 'Spamming' costs the sender very little to send - most of the costs are paid for by the recipient or the carriers rather than the sender."

"There are two principal types of 'Spamming', and they have different effects on Internet users. Usenet 'Spamming' is a single message sent to 20 or more Usenet newsgroups. Usenet 'Spamming' is aimed at 'lurkers'; people who read newsgroups but rarely or never post and give their address away. Usenet 'Spamming' robs users of the utility of the newsgroups by overwhelming them with a barrage of advertising or other irrelevant posts. Furthermore, Usenet 'Spamming' subverts the ability of system administrators and owners to manage the topics they accept on their systems."

"E-mail 'Spamming' targets individual users with direct mail messages. Scanning Usenet postings, stealing Internet mailing lists, or searching the Web for addresses often creates E-mail 'Spamming' lists. E-mail 'Spamming' typically cost users money out-of-pocket to receive. Many people - anyone with measured phone service - read or receive their mail while the meter is running creating additional costs. Also, it costs ISP's and online services to transmit "Spammed" information, and these costs are transmitted directly to subscribers."

Our spam policy encompasses not simply E-mail, but also Usenet newsgroups, message boards, chat rooms and instant messaging systems. Some of these media are not considered spamming in the traditional Internet sense, however we feel they are methods of abusing the Internet to deliver to unknown users unsolicited information. Additionally, we do not want our message to be distributed by the handing out of pamphlets, leaflets and flyers or by any other means that infringes upon the private property, rules, regulations or laws of any third party.

What happens to spammers?

Individuals who are caught spamming will immediately be suspended from the web site.

Reporting Spammers

Report spam by e-mail to our abuse monitoring team <u>USDA Food Quality Assurance</u>. We promise to investigate claims as soon as possible and to take appropriate action based on our findings.

Under United States law, it is unlawful "to use any telephone facsimile machine, computer, or other device to send an unsolicited advertisement" to any "equipment which has the capacity (A) to transcribe text or images (or both) from an electronic signal received over a regular telephone line onto paper." The law allows individuals to sue the sender of such illegal "junk mail" for \$500 per copy. Most states will permit such actions to be filed in Small Claims Court. Here is the text of the federal law:
