

The 2014 Supporting Statement for OMB 0596-0217 Federal and Non-Federal Financial Assistance Instruments

A. Justification

- 1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection. Attach a copy of the appropriate section of each statute and regulation mandating or authorizing the collection of information.**

The Forest Service instruments included in this request are necessary to the Agency's Federal Financial Assistance (FFA) awards (i.e., grants and cooperative agreements) and Non-Federal Financial Assistance program. Authorities and Statutes with description related to this collection can be found under the supplementary documents.

Federal Financial Assistance (FFA) Collection: To carry out specific Forest Service activities, Congress created several authorities to assist the Agency in its mission. These authorities allow the Forest Service to utilize Federal Financial Assistance (FFA) awards (i.e., grants and cooperative agreements) to support agency specific activities and appropriations. Included in this collection are forms related to the Award Letter, Certification Letters, FFA related Standard Forms (SF), and information related to Pre-Award and Post-Award activities, which include but not limited to, the project description, project scope, financial plan, statement of work, and cooperator business information.

Regulations related to Forest Service FFA awards are as follows: Regulations related to Forest Service FFA awards are the most current version of the Office of Management and Budget's (OMB) Circular of Uniform Administrative Requirements, Cost Principles, and Audit Requirements as well as the terms and conditions of the Federal award. A list of Legal Authorities can be found in the appendix at the end of this document.

Non-Federal Financial Assistance: Paperwork Reduction Act, 44 USC 3512(a)(1), as implemented at 5 CFR 1320.6(a)(1), states that agency-specific agreement forms must be approved by OMB and display the OMB control number to be binding on our partners. In order to create, develop, and administer agreements that do not fall under the Federal Grants and Cooperative Agreements Act (FGCAA) and properly administer them, whether funded or non-funded, the Forest Service requires the collection of information from the cooperating parties from the pre-award to the close-out stage. The scope of the information collection includes but not limited to: the project type, project scope, financial plan, statement of work, and cooperator business information. Included in this collection are updates to instrument provisions to improve the Agency's Non-Federal financial assistance program and comply with recent acts of Congress and Executive Orders. The list of instruments associated with this request, the information collected, and from whom the information is collected can be found in *Appendix A: Forms, Information Collected, and Respondent*. The improved instruments gather the same information that is currently being collected and do not increase the burden to cooperators. A list of Forest Service's authorities exempt from FGCAA and/or Chapter 63 of title 31 can be found in the attached supplemental documents.

2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.

In this request, Forest Service seeks approval for the continued use of information collections and new information collections related to grant and agreement administrative procedures which are required for approval by OMB under the Paperwork Reduction Act of 1995 and OMB's implementing regulations in 5 CFR 1320 Controlling Paperwork Burdens on the Public.

New information collections include the following forms: 1) Financial Capability Questionnaire form; 2) Financial Capability Checklist forms; 3) Equipment Justification and Certification Statement form; 4) Mandatory Post-Award monitoring of recipients financial controls using Financial Capability Checklist for all Grants and Cooperative Agreements; 5) Certification Regarding Lobbying form; and 8) variations of approved OMB agreement templates and common forms to reduce burden on our partners.

a. What information will be collected reported or recorded? (If there are pieces of information that are especially burdensome in the collection, a specific explanation should be provided.)

The Information collected from cooperators includes:

- Contact information;
- Employer ID Numbers (EINs), Taxpayer Identification Numbers (TIN), Data Universal Numbering System (DUNS), & System of Award Management (SAM);
- Project description or statement of work, such as activities to be performed, expected outcomes, monitoring activities, or work products;
- Financial plans (such as contribution types and amounts, EFT and billing information, list of contractors/sub recipients);
- Performance and Financial Reports; and
- Other related administrative information.

b. From whom will the information be collected? If there are different respondent categories (e.g., loan applicant versus a bank versus an appraiser), each should be described along with the type of collection activity that applies.

Statutory authority authorizing the grant or agreement program outlines which type of organization may participate in the grant or agreement program. Organizations include and information is collection from non-profits and for-profit organizations; institutions of higher education; Federal, state, local, and Native American Tribal governments; individuals; foreign governments and organizations.

c. What will this information be used for, provide ALL uses?

The information will be used to develop, implement, and administer Forest Service's Non-Federal Financial Assistance program and Federal Financial Assistance (FFA) awards (i.e., grants and cooperative agreements). Additionally, the attached Appendix A further clarifies Forest Service's Catalog of Federal Domestic Assistance (CFDA) numbers, program titles, and authorizing legislation for Federal Financial Assistance (FFA) awards.

d. How will the information be collected (e.g., forms, non-forms,

The 2014 Supporting Statement for OMB 0596-0217 Federal and Non-Federal Financial Assistance Instruments

electronically, face-to-face, over the phone, over the Internet)? Does the respondent have multiple options for providing the information? If so, what are they?

Respondents have multiple options for responding, including forms, non-forms, or optional templates. The partner or recipient may provide the information electronically, face-to-face, over the phone, and over the internet. Typically, the information will be collected via phone calls, e-mails, postal mail, and person-to-person meetings. Electronic responses are encouraged.

The following are the list of Forms or Templates that are administered under this collection which include administration forms, Federal-financial assistance award letters, and agreement templates:

REPORTING REQUIREMENTS AND ADMINISTRATION FORMS

Performance Reports: Cooperators may use their own format of their choosing or may use the Cooperator Performance Report (Optional Template), FS-1500-23. For grants and cooperative agreements, grantees may be required to submit a project performance report on a quarterly, semiannual, or annual basis. The report will compare actual accomplishments to objectives, provide explanations if objectives are not obtained, and outline ways to correct problem situations. It may also outline objectives and timetables for the next reporting period.

Final Project Performance: The final project development report must be submitted within 90 days after project completion and include a detailed project funding and expense summary, and a summary of the project's installation/construction process, including recommendations for development of similar projects by future applicants to the program.

Modification Form and Supporting Documents

FS-1500-19: Modification Form

Description: Instrument used when the Forest Service and Cooperator mutually agree to modify terms and conditions of an existing agreement between the two parties. For grants and cooperative agreements, the grantee must obtain prior Forest Service approval for any change to the costs, scope, or contractor or vendor of the approved project. Failure to obtain prior approval of any such change could result in suspension, termination, and recovery of grant funds. Requests for changes must be submitted in writing to the Agency.

Information Collected: Information related to changes in project description/statement of work, such as activities to be performed, expected outcomes/work products; adding/de-obligating funds; changes to terms and conditions of the award/agreement; other related administrative information such as updates to the financial plans.

Options for providing the information: Respondents have multiple options for responding including forms, non-forms, electronically, face-to-face, over the phone, and over the Internet. However, both the Cooperator and the Forest Service must sign the FS-1500-19, Modification Form in hardcopy, binding the parties to the bilaterally agreed to modification to the agreement or award.

FINANCIAL MANAGEMENT SYSTEM REVIEW QUESTIONNAIRE AND CHECKLIST:

- FS-1500-22: Financial Capability Questionnaire (NEW FORM)
- FS-1500-22A: Financial Capability Checklist – State Government Agencies (NEW FORM)
- FS-1500-22B: Financial Capability Checklist (NEW FORM)

Note: Forest Service developed these forms to reach management decision on several OIG Recommendations from the American Recovery and Reinvestment Act - Forest Service Hazardous Fuels Reduction and Ecosystem Restoration Projects on Non-Federal Lands audit (Report No. 08703-0005-SF, Issued March 2013).

Description: Instruments are used to outline the requirements necessary to accept and spend federal funds and to collect administrative and financial information and documentation required by the Forest Service to assess a partner's financial capabilities to manage Federal funds. Forest Service will utilize these checklists to assist and to post-award monitor recipients of Federal financial assistance by outlining both the financial and the internal policies necessary to accept and spend Federal dollars.

Information Collected: Financial Capability Questionnaire collects documents and cooperator's responses to elements of their financial capabilities, accounting system, and integral policy to assess whether their organization has the internal systems and policies that are consistent with the minimum requirements outlined in the administrative regulation to properly spend federal funds. The Questionnaire will be implemented on a defined population of cooperators to self-certify that their systems meet the minimum requirements outlined by associated OMB circular and uniform administration requirements.

The Financial Capability Checklist will be provided to every cooperator during the pre-award process to clearly define the proper controls that must be in place for a cooperator to properly discharge the public trust which accompanies the authority to expend public funds. As the list outlines the requirements of OMB's regulations, there is no time burden associated with this checklist as the cooperator is responsible for assessing that their systems

The 2014 Supporting Statement for OMB 0596-0217 Federal and Non-Federal Financial Assistance Instruments

and policies are consistent with OMB's regulations. Furthermore, the checklist provides valuable information to the cooperator. The organization receiving the checklist is requested to designate an individual from the entity to sign on behalf of the entity that they received the checklist, to record the designated person's position title within the entity, and cite date of their signature.

Similar OMB approved forms: The following are approved OMB forms related to the proposed new forms:

- a) OMB No. 1121-0021: U.S. Department of Justice's Office of Justice Programs' *Accounting System And Financial Capability Questionnaire*;
- b) OMB No. 2030-0020: Environmental Protection Agency's *Administrative Capability Questionnaire*; and
- c) OMB No. 3095-0072: National Archives and Records Administration's *Accounting System and Financial Capability Questionnaire*.

Authority to Conduct Reviews: Federal agencies have general authority to conduct business management system reviews which these forms and checklist attempt to formalize. OMB A-102 § .20(c) states that, "an award agency may review the adequacy of the financial management system of any applicant for financial assistance as part of a pre-award review or at any time subsequent to award." Furthermore, 2 CFR 215.53(e) and A-102 § .42(e)(1) stipulate that the awarding agency, its Inspector General, the Comptroller General of the United States, or any of their duly authorized representatives have a right to the timely and unrestricted access of recipients' books and records to audit and examine them.

GRANT EQUIPMENT JUSTIFICATION AND CERTIFICATION STATEMENT

FS-1500-34: Grant Equipment Justification and Certification Statement
(NEW FORM)

Note: The Forest Service developed this form in response to OIG audit recommendations. OIG Recommendation can be found in American Recovery and Reinvestment Act - Forest Service Hazardous Fuels Reduction and Ecosystem Restoration Projects on Non-Federal Lands audit (Report No. 08703-0005-SF, Issued March 2013).

Description: This form will be completed by a cooperator and approved by the Forest Service prior to purchase of equipment with Federal funds.

Information Collected: The cooperator provides information regarding contemplated purchase of equipment with Federal funds. The form requires information on the specific piece of equipment, and a justification of purchase over lease or rental. The cooperator signs the form, and the Forest Service will concur with signature if appropriate.

Options for providing the information: Respondents have multiple options for responding including forms, non-forms, electronically, face-to-face, over the phone, and over the Internet. Typically, the information may be collected in e-mail, postal mail, or signature on the form. Electronic responses are encouraged.

FORMS REMOVED FROM INFORMATION COLLECTION

SF-PPR family of forms

Reason for Removal: Forms no longer approved by OMB under the Paperwork

The 2014 Supporting Statement for OMB 0596-0217 Federal and Non-Federal Financial Assistance Instruments

Reduction act. Will utilize the proposed Optional Performance Report Form to collect elements required under the regulations or allow for the cooperator to utilize their own form or template.

FS-1500-20: Grants and Agreement Cover Sheet

Reason for Removal: This is an internal document and is not completed by the public. Burden associated with the document is already assessed in agreement form burden estimates.

e. How frequently will the information be collected?

Cooperators voluntarily enter into these agreements. Any party may initiate conversations to enter into these agreements at any time. The performance period for these agreements can range from 1 day to 5 years. Once an agreement is established, the frequency will typically be once per year based on the number of years for performance. In the case of financial and performance reporting information collections, the frequency may be quarterly. Subsequent modifications, which can be initiated by either party, may increase the frequency based on the number of modification entered into.

f. Will the information be shared with any other organizations inside or outside USDA or the government?

The information will not be shared with other organizations outside USDA or other Agencies except as required under Freedom of Information Act and the Federal Accountability and Transparency Act or as agreed to jointly by the Cooperator and the Forest Service, in writing.

g. If this is an ongoing collection, how have the collection requirements changed over time?

This is an ongoing collection. Many of the authorities authorizing the agreements have been made permanent by Congress which allows for minimal changes to requirements. However, collection requirements can change based on external agency requirements, such as external requirements based on Office of Management and Budget and Treasury Department direction and internal audits recommendation to improve process and procedures.

3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g. permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also describe any consideration of using information technology to reduce burden.

Respondents to the Forest Service's request for information collection may respond to information collection requests by either: handwritten or manually typed documentation submitted via any mail delivery service; electronic documentation submitted via internet, including emails; by electronic submission via fax; by voice over telephonic device, such as a telephone or voice over internet provider, or *in persona* discussions with the Forest Service; or any other commonly used means of communication available to both parties. Forms may be located on a National office, region, R&D station, laboratory, Area, unit,

The 2014 Supporting Statement for OMB 0596-0217
Federal and Non-Federal Financial Assistance Instruments

or Job Corps website.

The decision to use a specific means of collection is based on the availability of technology and informal agreement of both parties; as agreed upon in any signed agreement by both parties; and/or as specifically provided by written, procedural rules made publicly available by the Forest Service unit to the Respondent. Use of modern information technology to reduce burden is encouraged by both parties, whenever possible.

4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item 2 above.

Forest service has carefully reviewed the collection for duplication. The collection includes master agreements templates which permits the overarching agreement to be established between a partner and the Forest Service. Under this agreement, units from both parties may execute Supplemental Project Agreements (SPAs) which decreases duplication of information and increases consistency of project implementation.

As the information collected is unique for specific projects and for specific agreements, the information collected is not available from any other source. FS has identified duplication in the post award meetings, whereby in response to USDA Office of the Inspector General recommendations, recipients are required to attend a post award meeting for each award that they receive, regardless if the cooperator has already attended a similar meeting.

5. If the collection of information impacts small businesses or other small entities, describe any methods used to minimize burden.

The Forest Service minimizes the burden to all cooperators by materially assisting in the drafting of the agreements, after both informal and formal discussions. Additionally, other than the duplication of post award meetings described above, the Forest Service does not request the same information twice, unless a problem arises related to any previous request. Furthermore, the Forest Service only seeks information required to carry out the basic administrative functions and to establish the scope of the project(s) related to the agreements.

The Forest Service provides a number of customer service products available to assist the cooperator, such as: a comprehensive website, which provides regulatory and policy information, forms, procedural information, etc.; points of contact with the agency, including the name, address, email, and phone number for the agreements specialist, the program manager, and other relevant project contacts; and, a toll free telephone number to the agency's budget and finance center in Albuquerque, NM for finance related issues. The majority of our small business partners typically work with the Forest Service under contracts and procurement instruments and not under grants or agreements.

6. Describe the consequence to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.

Without the ability to collect the information requested by a respondent, the Forest Service would not be able to conduct any of the activities falling under the

The 2014 Supporting Statement for OMB 0596-0217

Federal and Non-Federal Financial Assistance Instruments

authorities and instruments listed above. The agency would not be able to develop projects, make or receive payment, monitor projects, identify financial and accounting errors, etc. There are no technical or legal obstacles to reducing burden.

7. Explain any special circumstances that would cause an information collection to be conducted in a manner:

- **Requiring respondents to report information to the agency more often than quarterly;**

Respondents are asked to report more often than quarterly when substantive changes occur to their information, timely provide information as agreed to by both parties in an agreement, and mutually agree with the agency to enter into a modification to the original agreement.

- **Requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;**
- **Requiring respondents to submit more than an original and two copies of any document;**
- **Requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records for more than three years;**

Financial records, supporting documents, statistical records, and all other records pertinent to an award or agreement shall be retained for a period of three years from the date of submission of the final expenditure report or, for awards that are renewed quarterly or annually, from the date of the submission of the quarterly or annual financial report, as authorized by the Federal awarding agency. The only exceptions are the following.

1. If any litigation, claim, or audit is started before the expiration of the 3-year period, the records shall be retained until all litigation, claims or audit findings involving the records have been resolved and final action taken.
2. Records for real property and equipment acquired with Federal funds shall be retained for 3 years after final disposition.
3. When records are transferred to or maintained by the Federal awarding agency, the 3-year retention requirement is not applicable to the recipient.
4. Indirect cost rate proposals, cost allocations plans, etc. as specified.

- **In connection with a statistical survey, that is not designed to produce valid and reliable results that can be generalized to the universe of study;**
- **Requiring the use of a statistical data classification that has not been reviewed and approved by OMB;**
- **That includes a pledge of confidentiality that is not supported by authority established in statute or regulation, that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or**

Federal and Non-Federal Financial Assistance Instruments

- **Requiring respondents to submit proprietary trade secret, or other confidential information unless the agency can demonstrate that it has instituted procedures to protect the information's confidentiality to the extent permitted by law.**

There are no other special circumstances. The collection of information is conducted in a manner consistent with the guidelines in 5 CFR 1320.6.

- 8. If applicable, provide a copy and identify the date and page number of publication in the Federal Register of the agency's notice, required by 5 CFR 1320.8 (d), soliciting comments on the information collection prior to submission to OMB. Summarize public comments received in response to that notice and describe actions taken by the agency in response to these comments. Specifically address comments received on cost and hour burden.**

The Federal Register 60-day Notice for the renewal of this information collection was published on December 18, 2012, Vol. 77, No. 243 page 74825-74826. The Forest Service received one unrelated comment, and no response was warranted.

Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and record keeping, disclosure, or reporting format (if any), and on the data elements to be recorded, disclosed, or reported.

Consultation with representatives of those from whom information is to be obtained or those who must compile records should occur at least once every 3 years even if the collection of information activity is the same as in prior periods. There may be circumstances that may preclude consultation in a specific situation. These circumstances should be explained.

Title: Conservation Director

Organization: Wildlife Forever

Contact Information: 2700 Freeway Blvd. #1000, Brooklyn Center, MN 55430

Phone: 763-253-0222; Email: pconzemius@wildlifeforever.org

Date Contacted: 3.14.2013

Comment Summary:

- a. The availability of data

Mr. Conzemius is happy with the current process in place and believes the partnership agreements that the Forest Service utilizes facilitates a collaborative working relationship. Additionally, since these are partnership, Forest Service is very much involved in assisting his organization in understanding requirements.

- b. The frequency of information that is collection

Mr. Conzemius believes that the frequency of collected information is about right. Believes that the Forest Service is by far the best to report to compared to the other Federal and State agencies which he has worked with. He believes this is due to the use of the partnership agreements

The 2014 Supporting Statement for OMB 0596-0217
Federal and Non-Federal Financial Assistance Instruments

- rather than Grants and Cooperative Agreements which have repetitive information collection requirements.
- c. Clarity of instructions and record keeping responsibilities,
There are no issues with the instructions and recording responsibilities.
 - d. Discloser Concerns
No issues as there is no proprietary information exchanged in the agreement.
 - e. Reporting format (if any)
Believes the reporting format and frequency under a partnership agreement is very accommodating for a small, non-profit like Wildlife Forever. Finds grants more ridged, enforces static reporting, and does not permit the flexibility and collaboration as the Forest Service Partnership agreements do.
 - f. The data elements to be recorded, disclosed, or reported
Mr. Conzemius believes that the overall burden associated with entering into agreements with the Forest Service is minimal. He accredits this to the efforts of Forest Service's Mike Rodgers and his Grants & Agreements Staff in Region 9 who assist him and his staff by relieving many of paperwork burden through clear correspondence and providing guidance on what is necessary to be completed and when.
 - g. Other related
He would like to see better communication within Forest Service across regions and the National office. He believes this will increase collaboration with his organization and others similar to his to expand collaborative work on and off of National forests and grasslands.
 - h. Thoughts on proposed new form to assess a partner's Financial Capabilities, Accounting Systems, and Internal Policy
Mr. Conzemius has completed these types of forms before and believes that for his small organization they are very burdensome and should not be applied to small, non-profits. He hopes that these types of forms do get implemented on Forest Service's partnership agreements as these types of arrangements are collaborative agreements and not like grants.

Comment Summary:

a. The availability of data;

Yes. The information was adequate as our organization has experience with grants and agreements with the Forest Service and other Federal agencies. Our organization received documents prior to award that were very helpful in describing the requirements (i.e. OMB circulars and cost-principles as well as Forest Service policies and procedures.)

Furthermore, Mr. Cullumbine highly recommends continued use of webinars and suggests the creation of a new grantee handbook to assist new organization in working with Federal grants and agreements.

b. The frequency of information that is collection;

The 2014 Supporting Statement for OMB 0596-0217 Federal and Non-Federal Financial Assistance Instruments

Mr. Cullumbine believes that a semi-annual and annual reporting requirement is reasonable. He believes that for an experience organization quarterly requirement would be burdensome on his organization.

- c. *Clarity of instructions and record keeping responsibilities;*
Mr. Cullumbine believes that it is "Fairly clear." He desires more opportunities for the Forest Service to review his organization's awards and agreements for policy compliance
- d. *Discloser Concerns;*
Mr. Cullumbine does not have concern. His organization did receive an audit under the ARRA program. His organization was concerned over the different pots of money and the difference in requirements. For instance, a major question was concerning the application of Davis Bacon Act and Service Contract Acts which took a Department of Labor specialist input to clarify the issue. In general, he desires clear and explicit information on what is required and not required under an award or agreement especially when receiving varying Federal dollars.
- e. *Reporting format (if any);*
Mr. Cullumbine strongly suggests the development of a data depository which has an electronic business process element to organize and correspond with cooperators and partners to ensure that performance reports and final reports are submitted, received, and approved in a timely manner.
- f. *The data elements to be recorded, disclosed, or reported;*
Very relevant and do not believe that you could decrease the information being requested.
- g. *Other related;*
See weakness and grey area in how the SF 424 family of forms documents matching contributions. Mr. Cullumbine suggests the development of a standardized matching spreadsheet and a matching tracking sheet. This would bring transparency to what is being recorded as match and the ability to review matching elements as reasonableness.
- h. *Thoughts on proposed new form to assess a partner's Financial Capabilities, Accounting Systems, and Internal Policy*
May be burdensome on the number of times the form is requested. Mr. Cullumbine does believe that training, manuals, and new awardee handbook may be more available for recipients. He does not have an issue is signing the document.

- a. *The availability of data:*
Agreements are typically Collection Agreements where the State of California is providing grant money for projects on National Forest Lands. Entering into these agreements with the Forest Service is mostly hassle

The 2014 Supporting Statement for OMB 0596-0217 Federal and Non-Federal Financial Assistance Instruments

- free but believe that the Forest Service could improve reporting time and information related to project execution and reporting.
- b. *The frequency of information that is collection:*
Believe that the frequency of information is sufficient which is typically on a quarterly cycle.
 - c. *Clarity of instructions and record keeping responsibilities,*
Believe at the bill of collection level, the Forest Service could improve on providing timely records regarding projects. For instance, it is occasionally time consuming waiting for responses from Forest Service subunits (i.e. forests) related to: time spent by Forest Service staff on a designated project, contract information, vehicles uses, etc. Suggests that information could be better organized or sorted to provide the State information based on the State's reporting requirements which could lead to better transparency.
 - d. *Discloser Concerns:*
No concerns.
 - e. *Reporting format (if any):*
Presently, both parties utilize the State's form and format for the agreement as well as the State's bill of collection form and format. Forest Service's mandatory provisions which are incorporated in the agreement are not deemed excessively burdensome.
 - f. *The data elements to be recorded, disclosed, or reported:*
Desire to have data elements better categorized and sorted for the State to collect pertinent information for the bill of collection and performance measures.
 - g. *Other related:*
Hope to work collaboratively with the Forest Service to improve data collection and reporting on projects.
 - h. *Thoughts on proposed new form to assess a partner's Financial Capabilities, Accounting Systems, and Internal Policy:*
Proposed form will not be used to assess this organization as they are not receiving Federal funds but rather providing funds to the Forest Service. In regards to project audits, they did mention that they verify and check Forest Service submitted bill of collection forms, audit agreements, conduct site visits, and assess close-out documents.

Federal Contact: *Financial Capability Questionnaire*

On 2/12/2013, we contacted Federal employees at National Archives and Records Administration (NARA) concerning their implementation, policy, and best practices of their *Administration's Accounting System and Financial Capability Questionnaire approved under OMB Control Number 3095-0072*. This discussion lead to improvements of the document which we believe improved the application of the form.

Other Commination: Forest Service maintains close contact with recipients and partners throughout the execution of the award or agreement. Both program personal and Grants and Agreement specialists place emphasis on fulfilling of project objectives and that the cooperator understands and follows the appropriate guidelines and regulations. Furthermore recipients and partners are encouraged to work with the Forest Service in pre-award, during the award, and at close-out to ensure the project is performed successfully. This communication leads to new policies and procedures which improves communication and decreases the burden on the cooperator.

9. Explain any decision to provide any payment or gift to respondents, other than re-enumeration of contractors or grantees.

No financial incentive, payment or gift, will be used to garner responses.

10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.

Confidentiality Provisions: Forest Inventory and Assessment & Cooperative R&D Agreements Instruments used for Forest Inventory and Assessment contain a confidentiality provision in the agreements, as permitted under the Food Security Act of 1985 (7 U.S.C. 3318, and 3319, Pub. L. 99-198). In Cooperative Research and Development agreements, a confidentiality provision exists, as permitted by the Federal Technology Transfer Act of 1986 (15 U.S.C. 3710a, Pub. L 96-480).

All other assurances of confidentiality, found in agency related agreement provisions, are standardized and based on the Freedom of Information Act (5 U.S.C. § 552, as amended by Public Law No. 104-231, 110 Stat. 3048) and FSM 1580, et. al.

11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior or attitudes, religious beliefs, and other matters that are commonly considered private. This justification should include the reasons why the agency considers the questions necessary, the specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.

Federal and Non-Federal Financial Assistance Instruments

There are no questions of a sensitive nature, such as those pertaining to sexual behavior, attitudes, religious beliefs, or other matters commonly considered private.

12. Provide estimates of the hour burden of the collection of information. Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated.

- **Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. If this request for approval covers more than one form, provide separate hour burden estimates for each form.**

Provide a description of the method used to estimate cost and any other expense that would not have been incurred without this collection of information.

The response to this question covers the actual costs the agency will incur as a result of implementing the information collection. The estimate should cover the entire life cycle of the collection and include costs, if applicable, for:

- **Employee labor and materials for developing, printing, storing forms**
- **Employee labor and materials for developing computer systems, screens, or reports to support the collection**
- **Employee travel costs**
- **Cost of contractor services or other reimbursements to individuals or organizations assisting in the collection of information**

¹ This amount covers the entire life cycle; however, these costs are the initial start up costs. Other cumulative costs and materials are included in the agency burden rate (2009) of 7% associated with routine employee labor costs.

² GS-11, Step 1, average position, based on OPM 2013 GS Pay Scale.

³ Forest Service national burden rate of 7% (2013).

⁴ The computer system already existed for Federal Financial Assistance. Additional costs and materials are included in the agency burden rate (2013) of 7% associated with routine employee labor costs.

⁵ Based on 6700 federal and non-federal financial assistance instruments (Forest Service totals, 2013).

15. Explain the reasons for any program changes or adjustments reported in items 13 or 14 of OMB form 83-I.

Forest Service is requesting a total of 49,751 burden hours which is an increase from the previous OMB approved 39,352 burden hours. This revised estimate reflects the total annual burden on the public to develop grant and agreement proposals, scope of works, budgets and budget justifications, and administrative activities related to requesting, accepting, and spending Federal dollars under the associated statute and regulatory requirements.

Annualized burden estimates increased due to the incorporation of Standard Forms (8,622 burden hours), optional administrative form to report performance (8,586 burden hours) due to the expiration of the PPR forms, and new information collections and reporting related to USDA Office of Inspector General Audit (1,143 burden hours). At the same time, total estimate decreased due to better accounting of the average number of awards and agreements executed on a yearly basis and the average number of responses per partner in a given year.

16. For collections of information whose results are planned to be published, outline plans for tabulation and publication.

Results of this information collection will not be published

17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.

Paperwork Reduction Act, 44 USC 3512(a)(1), as implemented at 5 CFR 1320.6(a)(1) states that agency-specific forms must be approved by OMB and display the OMB control number to be binding on our partners. Since Forest Service specific agreements may last up to 5 years, and 10 years for Stewardship Agreements, the Forest Service requests that the expiration date not be included on OMB approved templates incorporated under this information collection. Our concern is that our partners may believe that the agreements are no longer binding upon the OMB expiration date. Alternatively, if the OMB expiration date must be included on all of the agency-specific agreements, we suggest that modifying all Agency-specific agreements with our partners upon renewal of this information collection may be excessively burdensome on our partners.

18. Explain each exception to the certification statement identified in item 19, "Certification Requirement for Paperwork Reduction Act."
