**i3. (Hello, my name is [NAME] and I'm calling from Mathematica Policy Research, a research company in Princeton, New Jersey.) I'm calling you about the PACT study you joined when you applied to the [GRANTEE PROGRAM] program about a year ago. You may have received a letter recently to let you know that we would be calling you for a follow-up interview for our study. I'd like to interview you today.**

The interview will take about 45 minutes and you will receive \$25 for completing the interview. Your participation in the survey is voluntary. You do not have to answer any questions that make you uncomfortable.

To help us protect your privacy, we have obtained a Certificate of Confidentiality from the National Institutes of Health. With this Certificate, the researchers cannot be forced to disclose information that may identify you, even by a court subpoena, in any federal, state, local, civil, criminal, legislative, administrative, or other proceedings. The researchers will use the Certificate to resist any demands for information that would identify you, with one exception. The Certificate of Confidentiality does not prevent the researchers from disclosing information that would identify you as a participant in the research project if you tell the interviewers anything that suggests you are very likely to harm yourself, that you are planning to hurt another person or child, or that someone is likely to harm you.

You should understand that a Certificate of Confidentiality does not prevent you, or a member of your family, from voluntarily releasing information about yourself or your involvement in this research.

You may or may not benefit from participating in this study.

Because we want to get your opinion, it is important that you answer the questions without help from anyone else. Of course, you can share what you said with others after we have completed the interview.

This interview may be recorded so my supervisor can monitor the interview and make sure that the questions are asked correctly. These recordings will be destroyed when the study is completed.
