Title: Passenger and Crew Manifest (Advance Passenger Information System)

OMB Number: 1651–0088

Form Number: None

Abstract: The Advance Passenger Information System (APIS) is an automated method in which U.S. Customs and Border Protection (CBP) receives information about passengers and crew onboard inbound and outbound international flights before their arrival in or departure from the United States. APIS data includes biographical information for international air passengers arriving in or departing from the United States, allowing the data to be checked against CBP databases.

The information is submitted for both commercial and private aircraft flights. Specific data elements required for each passenger and crew member include: full name; date of birth; gender; citizenship; document type; passport number; country of issuance and expiration date; and alien registration number where applicable.

APIS is authorized under the Aviation and Transportation Security Act, Public Law 107–71. Under this statute, the transmission of passenger and crew manifest information is required even for flights where the passengers and crew have already been pre-screened or pre-cleared at the foreign location for admission to the United States. APIS is required under 19 CFR 122.49a, 122.49b, 122.49c, 122.75a, 122.75b, and 122.22.

Respondents submit their electronic manifest either through a direct interface with CBP, or using eAPIS which is a web-based system that can be accessed at <https://eapis.cbp.dhs.gov/>.

Title: Distribution of Continued Dumping and Subsidy Offset to Affected Domestic Producers.

OMB Number: 1651–0086.

Form Number: None.

Abstract: This collection of information is used by CBP to make distributions of funds pursuant to the Continued Dumping and Subsidy Offset Act of 2000 (CDSOA). 19 U.S.C. 1675c (repealed by the Deficit Reduction Act of 2005, Pub. L. 109–171, § 7601 (Feb. 8, 2006)). This Act prescribes the administrative procedures under which antidumping and countervailing duties assessed on imported products are distributed to affected domestic producers (ADPs) that petitioned for or supported the issuance of the order under which the duties were assessed. The amount of any distribution afforded to these domestic producers is based upon certain qualifying expenditures that they incur after the issuance of the order or finding up to the effective date of the CDSOA's repeal, October 1, 2007. This distribution is known as the

continued dumping and subsidy offset. The claims process for the CDSOA program is provided for in 19 CFR 159.61 and 159.63.

A notice is published in the **Federal Register** in June of each year in order to inform claimants that they can make claims under the CDSOA. In order to make a claim under the CDSOA, CBP Form 7401 may be used. This form is accessible at <http://www.cbp.gov/xp/cgov/toolbox/forms/> and can be submitted electronically through <https://www.pay.gov/paygov/forms/formInstance.html?agencyFormId=8776895>.

Current Actions: This submission is being made to extend the expiration date with a change to the burden hours as a result of updated estimates of the number of CDSOA claims prepared on an annual basis. There are no changes to the information collected.

A. Overview of Information Collection

Title of Proposal: Quality Control for Rental Assistance Subsidy Determinations.

OMB Approval Number: 2528-0261.

Type of Request: Regular.

Form Number: N/A.

Description of the need for the information and proposed use: The Department is conducting under contract a study to update its estimates of the extent and type of errors associated with income, rent, and subsidy determinations for the 4.3 million households covered by the Public Housing and Section 8 housing subsidies. The Quality Control process involves selecting a nationally representative sample of assisted households to measure the extent and types of errors in rent and income determinations, which in turn cause subsidy errors. On-site tenant interviews, file reviews, third-party income verifications, and income matching with other Federal data are conducted. The data obtained are used to identify the most serious problems and their associated costs. HUD program officers are then responsible for designing and implementing corrective actions. In addition to providing current estimates of error, results will be compared with those from previous years' studies. These comparisons will indicate whether corrective actions initiated since the 2000 study have been effective and if changes in priorities are needed.

The first QC study was completed in 1996 and found that about one-half of the errors measured using on-site tenant interviews and file reviews could not be detected with the 50058/50059 from data collected by the Department, which is why HUD and other agencies have determined that on-site reviews and interviews are an essential complement to remote monitoring measures. The 2000 study showed that the calculation errors detectable with 50058/50059 data had decreased, probably because this information was increasingly subject to automated computational checks. HUD has initiated a program of corrective actions and increased monitoring since 2000 and recent studies of tenant certification and recertification actions showed significant error reductions in income and rent determinations.

Future studies are planned on an annual basis, as required by legislation. Program monitoring and income matching policies being implemented may eliminate the need for an independent, statistically valid measure of program errors provided by the current study design, but such procedures have yet to be fully implemented and evaluated. The Improper Payments Act of 2002 requires that the Department report on the error measurements annually. This proposed
