Implementation of Title I/II Program Initiatives

Teacher Survey

Spring 2014

Paperwork Reduction Act of 1995

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Your response to this collection is voluntary. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Education, 400 Maryland Ave., SW, Washington, DC 20210-4537 or email ICDocketMgr@ed.gov and reference the OMB Control Number XXXX-XXXX. Note: Please do not return the completed survey to this address.

Notice of Confidentiality

Information collected for this study comes under the confidentiality and data protection requirements of the Institute of Education Sciences (The Education Sciences Reform Act of 2002, Title I, Part E, Section 183). Responses to this data collection will be used only for statistical purposes. The reports prepared for the study will summarize findings across the sample and will not associate responses with a specific district or individual. We will not provide information that identifies you or your district to anyone outside the study team, except as required by law.

Introduction

The **Implementation of Title I/II Program Initiatives** study will examine the implementation of policies promoted through the Elementary and Secondary Education Act (ESEA) at the state, district, and school levels, in four core areas: state content standards, assessments, school accountability, and teacher evaluation. The study will serve as an update on implementation of the Title I and Title II provisions since the last national assessment that concluded in 2006. The study includes surveys of officials from all state education agencies and district officials, school principals, and core academic and special education teachers from nationally representative samples. The United States (U.S.) Department of Education, Institute of Education Sciences (IES) is sponsoring this study.

- Your responses are critical to drawing lessons about the implementation of ESEA.
- All survey results will be presented as aggregate findings and no individual schools or teachers will be named or otherwise identified in any study reports or other communications that use survey data.
- We will survey a new sample of teachers from your school at a later date so we can examine changes occurring in the school over time.

The study, including this survey, is being conducted by Westat and its partners, Mathematica Policy Research and edCount.

DEFINITIONS FOR USE THROUGHOUT THIS SURVEY:

Summative assessments are state- or district-mandated tests that are intended to measure students' knowledge and skills at (or near) the end of a school year or course relative to grade-level content standards.

Diagnostic assessments are assessments that measure students' knowledge and skills at interim points during the school year to provide timely feedback on their progress toward grade-level content standards so that instruction can be adjusted or other support can be provided.

Student achievement growth is the change in student achievement for an individual student between two or more points in time. Two types of student achievement growth measures are common:

1. **Value added measures (VAMs)** or **student growth percentiles (SGPs)** apply complex statistical methods to calculate achievement growth for a teacher's own students based on districtwide or statewide standardized assessments. VAMs and SGPs can also be calculated for teacher teams, for grades, or for schools.
2. **Student learning objectives (SLOs)** or **student growth objectives (SGOs)** are achievement targets for a teacher's own students, determined by each individual teacher at the beginning of the school year (often in consultation with the school principal) based on the teacher's assessment of the students' starting achievement levels. SLOs/SGOs may relate to students' scores on standardized assessments, or to teacher-developed tests, performance tasks, or other customized assessments of student learning.

Standardized assessments are assessments consistently administered and scored for all students in the same grades and subjects, districtwide. These might include required state summative assessments, assessments purchased from testing companies, or district-developed assessments that are administered districtwide.

Arts Education is defined as visual arts, music, dance, and drama or theatre.

WEB PROGRAMMING NOTE: SOME TEXT IN THIS SURVEY WILL BE CUSTOMIZED AS FOLLOWS DEPENDING ON WHETHER THE TEACHER IS IN A SCHOOL IN A STATE THAT ADOPTED THE COMMON CORE STATE STANDARDS (CCSS) FOR ENGLISH LANGUAGE ARTS (ELA) OR MATH.

IF THE TEACHER IS IN A SCHOOL IN A STATE THAT ADOPTED THE CCSS IN ELA OR MATH, DISPLAY "COMMON CORE STATE STANDARDS (CCSS) FOR ELA OR MATH" OR "CCSS" WHERE NOTED.

IF THE TEACHER IS IN A SCHOOL IN A STATE THAT DID NOT ADOPTED THE CCSS IN ELA OR MATH, DISPLAY "CURRENT STATE CONTENT STANDARDS FOR ELA OR MATH" OR "CURRENT STATE CONTENT STANDARDS" WHERE NOTED.

Section 1. State Content Standards

[WEB PROGRAMMING NOTE: IF THE TEACHER IS IN A SCHOOL IN A STATE THAT ADOPTED THE COMMON CORE STATE STANDARDS (CCSS) IN ENGLISH LANGUAGE ARTS (ELA) OR MATH, DISPLAY THE FOLLOWING TEXT:

Many states have recently adopted the Common Core State Standards (CCSS) —that is, content standards for English language arts (ELA) and math that are shared across these states. The CCSS also may be known as your state's recently revised college and career ready standards in ELA and math, core academic standards in ELA and math, or something similar. Since your state may have its own name for the CCSS, in this survey we refer to these standards simply as the Common Core State Standards or CCSS. Other states have substantially revised their own state content standards for ELA and math in recent years. This section includes questions about materials, professional development, and resources your district has used to support the implementation of the Common Core State Standards (CCSS) for English language arts (ELA) or math.

[WEB PROGRAMMING NOTE: IF THE TEACHER IS IN A SCHOOL IN A STATE THAT DID NOT ADOPT THE CCSS IN ELA OR MATH, DISPLAY THE FOLLOWING TEXT:

Many states have recently adopted the Common Core State Standards (CCSS) —that is, content standards for English language arts (ELA) and math that are shared across these states. Other states have substantially revised their own state content standards for ELA and math in recent years. This section includes questions about materials, professional development, and resources your district has used to support the implementation of the current state content standards for English language arts (ELA) or math.

Teacher Survey

1-1. During this school year (2013-14), is your teaching fully aligned with the [COMMON CORE STATE STANDARDS (CCSS) FOR ELA OR MATH/ CURRENT STATE CONTENT STANDARDS FOR ELA OR MATH], partially aligned with the standards, or have you not incorporated the standards into your teaching yet?

Section 2. Assessments

In this section of the survey, we will ask about materials or professional development that you have received to help with assessment activities, and how you use information from assessments.

2-1. During this school year (2013-14), have you done any of the following to prepare students for required state summative assessments in English language arts (ELA) and/or math?

	SELECT ONE RESPONSE IN EACH ROW	
	YES	NO
a. Strengthened coursework in areas with statewide assessments.....	1	0
b. Taught test-taking skills to students.....	1	0
c. Provided opportunities for students to take practice statewide assessments on paper.....	1	0
d. Provided opportunities for students to take practice statewide assessments online.....	1	0
e. Identified students likely to score below state proficiency levels for additional help.....	1	0

Next we will ask about the use of a student-level data system. By student-level data system, we mean any technology-based tool that provides school leaders and teachers with data that can be used to monitor the achievement of individual students.

2-2. During this school year (2013-14), do you have electronic access to a student-level data system that includes any of the following types of data for students in your classes?

Check box if you do not have electronic access to a student-level data system and skip to 2-4
