<p>The High School Longitudinal Study of 2009 (HSL:09) is a nationally representative, longitudinal study of more than 20,000 ninth graders in 944 schools who will be followed through their secondary and postsecondary years. The main study students were re-surveyed in 2012 when most were high school 11th graders. The study focuses on understanding students' trajectories from the beginning of high school into postsecondary education or the workforce and beyond. What students decide to pursue when, why, and how are crucial questions for HSL:09, especially, but not solely, in regards to science, technology, engineering, and math (STEM) courses, majors, and careers. This submission amends the clearance obtained on April 19, 2013, and May 22, 2013, for the 2013 Update of HSL:09 sample members who were in 9th grade in the fall of 2009 (OMB# 1850-0852 v. 11 and 12), and requests approval to include an additional item from the High School Longitudinal Study of 2009 (HSL:09) 2013 Update full interview in the 2013 Update abbreviated interview, to be implemented this fall: the name of the last high school attended by the sample member. Among other things, the information about high school attendance/completion will be used for collecting high school transcripts in 2013-2014.</p>
