(1) Describe the purpose of this DoD information system or electronic collection and briefly describe the types of personal information about individuals collected in the system.

To evaluate applicant qualifications for selection to participate in the JAGC; to evaluate applicant performance in the JAGC internship/externship program; to evaluate and improve the JAGC application and selection process; to conduct predictive analysis for internal management purposes; to manage the officers of the JAGC since the Judge Advocate General is statutorily required to make a recommendation on the assignment of all active-duty JAGC officers; to determine qualifications of an officer to receive a JAGC designation and to be certified as a trial or defense counsel; to determine the rotation dates and release from active-duty dates of JAGC officers, as well as the date new officers will be available for duty; to prepare JAGC strength plans for submission to the Office of the Chief of Naval Operations; and to obtain an officer's preference for duty assignment, as well as eligibility for consideration for postgraduate education and overseas assignments. Certain information is promulgated to all active-duty JAGC officers in an annual publication known as the Directory of Navy Judge Advocates. The information is promulgated in the directory for general informational purposes within the JAGC, including provision of position (billet) availability information to officers contemplating rotation. Information obtained from predictive analysis command evaluations are separate and distinct from evaluations required in accordance with Navy Regulations (i.e., officer fitness reports). The data will not be used to impact judge advocates' evaluations or fitness reports in any way.

(2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

The perceived threats are primarily computer hackers, disgruntled employees, state-sponsored information warfare, and acts of nature (e.g., fire, flood, etc.). All systems are at risk because they may be vulnerable to unauthorized intrusion and hacking. There are risks that JAGPERS information could be compromised. Because of this possibility, appropriate security and access controls listed in this PIA are in place. Since JAGPERS operates on the NMCI Network, there is a risk that security controls could be disabled for maintenance and other purposes. The risk would be that the security controls would not be reset. All systems are vulnerable to "insider threats." JAGPERS managers are vigilant to this threat by limiting system access to those individuals who have a defined need to access the information. There are defined criteria to identify who should have access to this system. These individuals have gone through extensive background and employment investigations.

The computer system uses PKI authentication and using TLS/SSL 3 to encrypt data. PII data is stored in SQL Server which is access restricted to Database Administrator/Manager. Backed up data is encrypted

with a complex decipher password. PII will be redacted by data owner before making it available to requestor. Security training is provided on a continuous basis to keep users alert to the security requirements. Visual effects are used as constant reminders to ensure users always remain aware of their responsibilities. Physical security is addressed by placing servers that contain privileged information in a secure and protected location, and to limit access to this location to individuals who have a need to access the servers.

h. With whom will the PII be shared through data exchange, both within your DoD Component and outside your Component (e.g., other DoD Components, Federal Agencies)? Indicate all that apply.
