**General notes for QDS programmer** (additional programming notes are located throughout the questionnaire):

- 1) Use version 2.6.1 of QDS.
- 2) Every question requires a response to move forward in the application unless otherwise noted.
- 3) Use the following values: .D = 8, .R = 7, NA = 6.
- 4) For all “other-specify” variables in “check all that apply” questions, use the “other” variable name (which should end in “O”) and add an “S” on the end. If the variable name becomes too long, then drop the letter immediately preceding the consecutive letter at the end of the **main part** of the variable name. For example, if the “other” variable is named “*KINDG\_9O*” (where *KIND* is the stem variable name and *G* denotes the lettered response option) the “specify” variable should be named “*KING\_9OS*”
- 5) QDS programming notes are not included in the application; they are merely there to help with coding.
- 6) Interviewer instructions and inconsistency checks are notes for the interviewers, but may also include coding instructions.
- 7) The QDS codebook should have a brief description of the variable. This includes all calculated variables.
- 8) Calculate questionnaire version number using variable name **VERSION**. This must be updated every time a change is made in the application.
- 9) Calculate QDS version number using variable name **QDSVERN3**. This documents the QDS version used to create the QAD file. For 2013 cycle the value is 2.6.1.
- 10) Calculate data collection cycle using variable name **CYCYR**. CYCYR = 2013.
- 11) For all date variables also create an automatic variable that is a copy of the date variable. For example, if the variable for date was called DATE, then the automatic variable would look like: a. variable name: TXFORM, b. type of date: String Expression, c. numeric calculation/string expression: DATE
- 12) Label module sections in the codebook. Use the Table of Contents for guidance.
- 13) PDP start date is January 1, 2013.
- 14) PDP end date is April 30, 2013.
- 15) Calculate the time to conduct an interview from D1 to C20 (i.e., exclude Preliminary Information and Interview Completion sections).
- 16) Calculate time to conduct each module.
- 17) Do not include the Response cards and calendars in the QDS program.
- 18) Distinguish between English and Spanish versions of the questionnaires.
- 19) The maximum size of text values is 100 except for E5 which is 200.

## Demographics (D)

**SAY:** “I’d like to thank you for taking part in this interview. Remember that all the information you give me will be confidential and your name won’t be recorded in the survey responses. The answers to some questions may seem obvious to you, but I need to ask you all of the questions.”

**SAY:** “You have chosen to complete the interview over the telephone. Before we begin, I would like to remind you that there is a set of response cards that I will ask you to refer to throughout the course of the interview. These response cards will be needed for some of the questions you will be asked during the interview. The set of cards contains a calendar, some pictures, and text to help guide you through the response options for some of the questions. Each card is labeled. Please keep this set of response cards nearby so you can use them when needed. I will let you know which questions require response cards and the label that corresponds to the card that is needed.”
