

Supporting Statement – Part A
Medical Necessity and Claims Denial Disclosures under MHPAEA
(OMB Control No. 0938-1080)

A. Background

Enacted on October 3, 2008, the Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act of 2008 (MHPAEA), Public Law 110-343, amended the Employee Retirement Income Security Act of 1974 (ERISA), the Public Health Service Act (PHS Act), and the Internal Revenue Code of 1986 (Code). MHPAEA expanded existing parity requirements between medical and surgical (med/surg) benefits and mental health benefits and also provided that substance use disorder benefits fall within the parity requirements of the statute. The law requires that group health plans and group health insurance issuers offering both med/surg and mental health or substance use disorder (MH/SUD) benefits ensure that they do not apply any more restrictive financial requirements (e.g., co-pays, deductibles) and/or treatment limitations (e.g., visit limits) to MH/SUD benefits than those requirements and/or limitations applied to substantially all med/surg benefits.

Under certain circumstances, MHPAEA requires plan administrators and health insurance issuers (plans and issuers) to provide one of two disclosures regarding MH/SUD benefits--one on providing criteria for medical necessity determinations and the other providing the reason for denial of claims reimbursement.

Medical Necessity Disclosure under MHPAEA

MHPAEA section 512(b) specifically amends the Public Health Service (PHS) Act to require plans or issuers to provide, upon request, the criteria for medical necessity determinations made with respect to MH/SUD benefits to current or potential participants, beneficiaries, or contracting providers. The Interim Final Rules Under the Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act of 2008 (75 FR 5410, February 2, 2010) and the Final Rules under the Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act of 2008 implement 45 CFR 146.136(d)(1), which sets forth rules for this disclosure. CMS oversees non-Federal governmental plans and health insurance issuers.

Accordingly, any plan or issuer that receives a request from a current or potential plan participant, beneficiary, or contracting health care provider must provide that party with a *Medical Necessity Disclosure under MHPAEA*. CMS, however, is not proposing that plans or issuers use a specific form.

Claims Denial Disclosure under MHPAEA

MHPAEA section 512(b) specifically amends the PHS Act to require plans or issuers to supply, upon request, the reason for any denial of payment for MH/SUD services to the participant or beneficiary. The Interim Final Rules Under the Paul Wellstone and Pete Domenici Mental Health

Parity and Addiction Equity Act of 2008 (75 FR 5410, February 2, 2010) and the Final Rules under the Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act of 2008 implement 45 CFR 146.136(d)(2), which sets forth rules for providing reasons for denial of payment. CMS oversees non-Federal governmental plans and health insurance issuers.

Accordingly, any plan or issuer that receives a request from a participant or beneficiary must provide that individual with a *Claims Denial Disclosure* within a reasonable time. CMS is not proposing that plans or issuers use a specific form.

However, 45 CFR 146.136(d)(2) specifies that such plans or issuers will be in compliance with the MHPAEA claims disclosure requirement if they provide the notice in a form and manner consistent with ERISA requirements found in 29 CFR 2560.503-1. The ERISA regulation requires plans to provide a claimant who is denied a claim with a written or electronic notice that contains the specific reasons for denial, a reference to the relevant plan provisions on which the denial is based, a description of any additional information necessary to perfect the claim, and a description of steps to be taken if the participant or beneficiary wishes to appeal the denial. The regulation also requires that any adverse decision upon review be in writing (including electronic means) and include specific reasons for the decision, as well as references to relevant plan provisions. CMS is not requiring ERISA notice per se but providing a safe harbor: a *Claims Denial Disclosure* that meets ERISA requirements will comply with MHPAEA claims denial requirements. Other forms of disclosure may meet the requirements of 45 CFR 146.136(d)(2) as well.

The Patient Protection and Affordable Care Act, Pub. L. 111-148, was enacted on March 23, 2010, and the Health Care and Education Reconciliation Act of 2010, Pub. L. 111-152, was enacted on March 30, 2010. They are collectively known as the “Affordable Care Act”. The Affordable Care Act reorganizes, amends, and adds to the provisions of part A of title XXVII of the PHS Act relating to group health plans and health insurance issuers in the group and individual markets. The Affordable Care Act adds section 715(a)(1) to ERISA and section 9815(a)(1) to the Code to incorporate the provisions of part A of title XXVII of the PHS Act into ERISA and the Code, and to make them applicable to group health plans and health insurance issuers providing health insurance coverage in connection with group health plans. The Affordable Care Act extended MHPAEA to apply to the individual health insurance market and redesignated MHPAEA as section 2726 of the PHS Act.¹ Additionally, section 1311(j) of the Affordable Care Act applies section 2726 of the PHS Act to qualified health plans (QHPs) in the same manner and to the same extent as such section applies to health insurance issuers and groups health plans. Additionally, the Department of Health and Human Services (HHS) final regulation regarding essential health benefits (EHB) requires health insurance issuers offering non-grandfathered health insurance coverage in the individual and small group markets, through an Exchange or outside of an

¹ MHPAEA requirements apply to both grandfathered and non-grandfathered health plans. See section 1251 of the Affordable Care Act and its implementing regulations at 26 CFR 54.9815-1251T, 29 CFR 2590.715-1251, and 45 CFR 147.140. Under section 1251 of the Affordable Care Act, grandfathered health plans are exempted only from certain Affordable Care Act requirements enacted in Subtitles A and C of Title I of the Affordable Care Act. The provisions extending MHPAEA requirements to the individual market, and requiring that qualified health plans comply with MHPAEA were not part of these sections.

Exchange, to comply with the requirements of the MHPAEA regulations in order to satisfy the requirement to cover EHB.²

B. Justification

1. Need and Legal Basis

It is necessary for plans and issuers to provide criteria for medical necessity determinations as well as the reason for denying specific claims that involve MH/SUD conditions. One of MHPAEA's central goals is to require parity in the treatment of MH/SUD and med/surg benefits on the part of plans and issuers offering both kinds of benefits. The two disclosures require plans and issuers to provide, respectively: (a) the bases upon which decisions are made regarding whether to allow particular treatments or referrals to certain experts for particular MH/SUD conditions; and (b) the reasons that individuals in fact specific situations have had their individual MH/SUD claims denied. These disclosures may make it much easier to see whether plans are making such decisions regarding MH/SUD conditions on par with med/surg decisions. Furthermore, providing beneficiaries and participants with more knowledge about how plans operate may enable them to access not only more, but more efficient treatment for their MH/SUD conditions--thus knocking down barriers to MH/SUD care.

Statute

Below is an excerpt of the appropriate statutory language found in MHPAEA which also indicates the changes made to the PHS Act.

Subtitle B—Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act of 2008

* * *

SEC. 512. MENTAL HEALTH PARITY.

(b) AMENDMENTS TO PUBLIC HEALTH SERVICE ACT.—Section 2705 of the Public Health Service Act (42 U.S.C. 300gg–5) is amended—

(1) in subsection (a), by adding at the end the following:

“(4) AVAILABILITY OF PLAN INFORMATION.—The criteria for medical necessity determinations made under the plan with respect to mental health or substance use disorder benefits (or the health insurance coverage offered in connection with the plan with respect to such benefits) shall be made available by the plan administrator (or the health insurance issuer offering such coverage) in

² See 45 CFR §§147.150 and 156.115 (78 FR 12834, February 25, 2013).

accordance with regulations to any current or potential participant, beneficiary, or contracting provider upon request. The reason for any denial under the plan (or coverage) of reimbursement or payment for services with respect to mental health or substance use disorder benefits in the case of any participant or beneficiary shall, on request or as otherwise required, be made available by the plan administrator (or the health insurance issuer offering such coverage) to the participant or beneficiary in accordance with regulations.

2. Information Users

Medical Necessity Disclosure

Upon request, plans and issuers must provide a *Medical Necessity Disclosure*. Receiving this information will enable potential and current participants and beneficiaries to make more educated decisions given the choices available to them through their plans and may result in better treatment of their MH/SUD conditions. MHPAEA also requires that plans and issuers provide the *Medical Necessity Disclosure* to current and potential contracting health care providers. Because medically necessary criteria generally indicates appropriate treatment of certain illnesses in accordance with standards of good medical practice, this information should enable physicians and institutions to structure available resources to provide the most efficient health care for their patients.

Claims Denial Disclosure

Upon request, plans and issuers must explain the reason that a specific claim is denied. Most practically, participants and beneficiaries need this information to determine whether they agree with the decision and, if not, whether to appeal. As with the *Medical Necessity Disclosure*, the *Claims Denial Disclosure* may also enable patients to better understand how to navigate their insurance benefits to find the best treatment available for their MH/SUD conditions. For instance, a participant may learn what diagnostic tests will or will not be covered for his or her specific condition, or how often he or she may access that test per year. A beneficiary may learn there is a more appropriate provider that could treat his or her MH/SUD condition. Section 146.136(d)(3) of the final rule clarifies that PHS Act section 2719 governing internal claims and appeals as implemented by 45 CFR §147.136, covers MHPAEA claims denials and will require that, when a non-quantitative treatment limitation (NQTL) is the basis for a claims denial, that the plan or issuer must provide the processes, factors and strategies used in developing the NQTL.

3. Use of Information Technology

The regulation does not restrict plans or issuers from using electronic technology to provide either disclosure.

4. Duplication of Efforts

MHPAEA amended ERISA and the Code in addition to the PHS Act. Accordingly, both the

Department of Labor (DOL) and the Department of the Treasury (the Treasury) will require plans and issuers to provide, upon request, medical necessity and claims denial disclosures as well. However, because only CMS oversees non-Federal governmental health plans and individual plans, there will be no duplication of effort with the DOL and the Treasury.

In some circumstances, states may require substantially similar information to be provided to insured persons. However, no duplication would occur because CMS requires no one particular form and the same information disclosure may be used to satisfy duplicative or overlapping requirements.

5. Small Businesses

Group health plans and health insurance coverage offered by non-grandfathered small employers will incur costs to comply with the provisions of this final rule. There are an estimated 59,000 public, non-Federal employer group health plans with 50 or fewer participants sponsored by state and local governments that were previously exempt and will now be required to comply with these requirements.

6. Less Frequent Collection

The information collection requirements (ICRs) arise in connection with the occurrence of individual claims for benefits and consist of third-party notices and disclosures. While no information is reported to the Federal government, if the plans and issuers do not provide the two disclosures or provide those disclosures less frequently, then the Federal policy goals underlying MHPAEA would be thwarted. Access to information about reasons for denials and medical necessity criteria enables participants, beneficiaries, and health care providers to better utilize health care resources which in turn may result in better treatment for MH/SUD conditions. At the very least, these disclosures make it easier to see whether plans are making decisions about MH/SUD conditions in parity to those made regarding med/surg conditions.

7. Special Circumstances

Medical Necessity Disclosure

There are no special circumstances.

Claims Denial Disclosure

The proposed regulation provides that plans and issuers must make the *Claims Denial Disclosure* to participants and beneficiaries “available within a reasonable time.” It is possible plans and issuers may interpret this time frame to be fewer than 30 days; however, this is not a requirement.

Furthermore, 45 CFR 146.136(d)(2) provides a safe harbor under which plans and issuers will be in compliance if they provide the notice in a form and manner consistent with ERISA requirements found in 29 CFR 2560.503-1. The ERISA regulation imposes special timing

requirements for the handling of claims under group health plans. Depending on circumstances indicating the urgency of the need for a claims decision, group health plans may be required to notify claimants about health benefit claim determinations in fewer than 30 days.

First, for claims involving “urgent care,” the regulation requires, in general, that claimants be notified of health benefit determinations “as soon as possible, but not later than 72 hours after receipt of the claim by the plan. . . .” (29 CFR 2560.503 1(f)(2)(ii)). In cases involving urgent care where the health claim is a request to extend the time period or number of treatments of ongoing medical care, this period is 24 hours (29 CFR 2560.503 1(f)(2)(ii)(B)).

Second, for “pre-service” claims, the regulation requires that claimants be notified of health benefit determinations “within a reasonable period of time appropriate to the medical circumstances, but not later than 15 days after receipt of the claim by the plan” (29 CFR 2560.503 1(f)(2)(iii)(A)). Pre-service claims involve plan requirements that a claimant obtain approval from the plan prior to receiving health care services or products in order to maintain eligibility for benefits.

Third, for “post-service” health benefit claims, the regulation requires notification of an adverse benefit determination “within a reasonable period of time, but not later than 30 days after receipt of the claim.” Even though 30 days is the maximum response time for these claims, a plan must provide a determination sooner if it is reasonable to do so. Disability benefit claims are subject to a similar construct, except that the maximum response time is 45 days.

Appeals of denied claims must be decided within similar, short time limits.

These timing requirements are reasonably related to important policy objectives in an area of important public concern. For example, the shortest time frame for “urgent care” claims applies only under circumstances in which delay could seriously jeopardize the life or health of the claimant or the ability of the claimant to regain maximum function, or where delay would subject the claimant to severe pain. The next shortest time frame applies under circumstances in which medical care, while not urgent, has not been provided to a claimant who needs treatment for a medical problem and where the plan itself requires pre-approval of the medical care before providing coverage. Post-service health claims and disability claims also involve important concerns relating to the sick and disabled, but under these circumstances plans may take at least 30 days to respond if it is reasonably necessary to do so. Another reason why these time frames are important is that these notices relate to the payment of money by a plan to claimants to whom fiduciary responsibilities are owed. Without enforcement of reasonable deadlines, payors could be given a financial incentive to delay the payments, and this would likely be inconsistent with appropriate fiduciary standards. Finally, these time frames for health and disability claims are generally consistent with industry standards and with the requirements of other regulators such as state insurance departments. Section 146.136(d)(3) of the final rule clarifies that PHS Act section 2719 governing internal

claims and appeals as implemented by 45 CFR §147.136, covers MHPAEA claims denials and will require that, when a non-quantitative treatment limitation (NQTL) is the basis for a claims denial, that the plan or issuer must provide the processes, factors and strategies used in developing the NQTL. This applies to non-federal governmental plans and to health insurance issuers in both the group and individual market.

8. Federal Register/Outside Consultation

A Federal Register notice was published on May 31, 2013 (78 FR 32661), providing the public with a 60-day period to submit written comments on the ICRs. No comments were received.

9. Payments/Gifts to Respondents

No payments or gifts are associated with these ICRs.

10. Confidentiality

These disclosures require plans and issuers to provide information to participants and beneficiaries, and in the case of the *Medical Necessity Disclosure*, the contracting provider. Issues of confidentiality between third parties do not fall within the scope of this information collection request.

11. Sensitive Questions

These ICRs involve no sensitive questions.

12. Burden Estimates (Hours & Wages)

As discussed earlier, the final regulations retain the disclosure provisions for group health plans and health insurance coverage offered in connection with a group health plan. In addition, these disclosure provisions are extended to non-grandfathered insurance coverage in the small group market through the EHB requirements and to the individual market as a result of the amendments to the PHS Act under the Affordable Care Act. The burden estimates below have been updated to reflect this change. The burden estimates have also been updated based on recent data on labor and mailing costs. We generally used data from the Bureau of Labor Statistics to derive average labor costs (including fringe benefits) for estimating the burden associated with the ICRs.

CMS estimates that approximately 93 percent of large group health plans administer claims using third party providers. Furthermore the vast majority of all smaller employers usually are fully insured such that issuers will be administering their claims. It is estimated that approximately 94.9 percent of claims are processed by issuers and third party providers. Therefore, a remaining 5.1 percent of claims are processed in-house. For group health plans

that administer claims in-house and for issuers of plans in the individual market, the burden is reported as an hour burden. For plans that use issuer or third party providers, the costs are reported as capital costs in the next section.

Medical Necessity Disclosure

CMS is unable to estimate³ with certainty the number of requests for medical necessity criteria disclosures that will be received by plan administrators. As a start, CMS has assumed that there are approximately 30.3 million participants covered by 82,324 state and local government plans that are subject to the MHPAEA disclosure requirements. Estimating that each plan affected by the rule will receive one request means that plans will need to provide 82,324 *Medical Necessity Disclosures*. (This 82,324 figure only anticipates the number of *Medical Necessity Disclosures* that will be requested in and of themselves; below we calculate additional *Medical Necessity Disclosures* that may be asked for conjunction with requests for *Claims Denial*.) We assume that it will take a medically trained clerical staff member five minutes to respond to each request at a wage rate of \$26.85 per hour. This results in an annual hour burden of 350 hours and an associated equivalent cost of \$9,394 for the 4,199 requests handled by plans in-house.

In the individual market there will be an estimated 18 million enrollees in plans offered by 418 issuers offering coverage in multiple states. Assuming that, on average, each issuer will receive 1 request in each state in which it offers coverage, there will be a total of 2,641 requests in each year. The annual burden to issuers for sending the *Medical Necessity Disclosures* is estimated to be 220 hours with an associated equivalent cost of \$5,909.

Claims Denial Disclosure

CMS estimates that for group health plans, there will be approximately 30.9 million claims for MH/SUD benefits with approximately 4.6 million denials that could result in a request for an explanation of reason for denial. CMS has no data on the percent of denials that will result in a request for an explanation, but assumed that ten percent of denials will result in a request for an explanation (463,533 requests). CMS estimates that a medically trained clerical staff member will require five minutes to respond to each request at a labor rate of \$26.85 per hour. This results in an annual hour burden of nearly 1,970 hours and an associated equivalent cost of nearly \$52,895 for the approximately 23,640 requests completed by plans.

In the individual market, under similar assumptions, the Department estimates that there will be approximately 18.4 million claims for mental health or substance use disorder benefits with approximately 2.75 million denials that could result in a request for explanation of denial. Assuming ten percent of denials result in such a request, it is estimated that there will be about 275,400 requests for an explanation of reason for denial, which will be completed with a burden of approximately 22,950 hours and equivalent cost of approximately \$616,208.

³ Please note that the numbers throughout are approximations and may not round precisely.

Medical Necessity Disclosures requested along with Claims Denial Disclosures

When requesting an explanation as to why their specific claims have been denied, participants may request copies of the relevant medical necessity criteria. While the Department does not know how many notices of denial will result in a request for the criteria of medical necessity, the Department assumes that, for group health plans, ten percent of those 463,533 requesting an explanation of the reason for denial will also request the criteria of medical necessity. CMS estimates that a medically trained clerical staff member may require five minutes to respond to each request at a labor rate of \$26.85 per hour. About 2,364 of those disclosures will be completed in-house with an hour burden of 197 hours and equivalent cost of approximately \$5,289.

In the individual market, under similar assumptions, the Department estimates that there will be about 27,540 requests for medical necessity criteria, which will be completed with a burden of about 2,295 hours and equivalent cost of approximately \$61,621.

Delivery Costs

To estimate delivery costs, we will follow an assumption made by DOL: 75 percent of the explanation of denials disclosures and 38 percent of non-denial related requests for the medical necessity criteria will be delivered electronically. Many insurers or plans may already have the information prepared in electronic format, and CMS assumes that requests will be delivered electronically resulting in a de minimis cost.

Reversing the above percentages of documents sent estimated to be sent electronically, we assume that 25 percent of *Claims Denial Disclosures* and 62 percent of *Medical Necessity Disclosures* will be delivered in a paper format. Additionally, we are anticipating that the 25 percent of the *Medical Necessity Disclosures* requested by individuals who have also requested a *Claims Denial Disclosure* will be sent to those participants and beneficiaries in the same manner as the *Claims Denial Disclosure*--in other words, 25 percent will be sent in a paper format. CMS assumes that it will cost \$0.66 to send out each disclosure. This estimate is based on an average document size of four pages, \$0.05 per page material and printing costs, and \$0.46 postage costs.

Cost per Response: Electronic

We noted above that it would take about five minutes for a medically trained clerical staff member to respond to each response at a labor rate of \$26.85 per hour. This figure would be the same regardless of whether the notices are processed in-house or by issuers or third party providers. Therefore, the cost per response is \$2.24.

Cost per Response: Paper

As noted above CMS assumes that it will cost \$0.66 to send out each paper disclosure. We also estimated the administration cost--for both in-house and third party or issuer processing--to equal \$2.24 per response. Therefore, the total is \$2.90 per paper response. For group health plans processing notices in-house, the total cost of delivery of about 9,104 notices is estimated to be approximately \$6,009. In the individual market, the total cost of delivering about 77,372

notices is estimated to be approximately \$51,066.

Table 1 below details calculations related to notices processed in-house and Table 2 details calculations related to notices processed by issuers in the individual market.

Table 1. Hour Burden Estimates: Disclosures Processed In-House

1.a. Hour Burden Estimates: Medical Necessity Disclosures Processed In-House					
Notice Type and Method of Distribution	Number of Notices	Labor Hours	Cost per Hour	Estimated Labor Costs	Paper, Printing & Postage Costs
<i>Medical Necessity Disclosure</i>	4,199	350	\$26.85	\$9,394	
38% sent electronically	1,595	133	\$26.85		
62% sent by paper at \$0.66 per notice	2,603	217	\$26.85		\$1,718
<i>Medical Necessity Disclosure (provided with Claims Denial Disclosure)</i>	2,364	197	\$ 26.85	\$5,289	
75% sent electronically		148	\$ 26.85		
25% sent by paper at \$0.66 per notice		49	\$ 26.85		\$390

Approximate Total Notices	305,581				
Approximate Total Annual Burden Hours		25,465			

13. Capital Costs

For group health plans that use issuer or third party providers, the costs incurred to prepare and send disclosures are reported as capital costs in this section.

Medical Necessity Disclosures

As in section 12, CMS is unable to estimate with certainty the number of requests for medical necessity criteria disclosures that will be received by plans and issuers; but CMS has assumed that, on average, each plan affected by the rule will receive one request, meaning plans will need to provide about 82,324 *Medical Necessity Disclosures*.

CMS estimates that approximately 93 percent of large plans administer claims using third party providers. Furthermore the vast majority of smaller employers usually are fully insured such that issuers will be administering their claims. For plans whose claims are administered by issuers or third party providers, the costs are reported as cost burden. It is estimated that approximately 94.9 percent of claims are processed by issuers and third party providers. For purposes of the estimate, we assume that it will take a medically trained clerical staff member five minutes to respond to each request at a wage rate of \$26.85 per hour. Therefore, we estimate about 78,126 disclosures will be processed through a third-party service provider or issuer and result in a cost burden of approximately \$174,806. Assuming that 62 percent of the disclosures will be sent in paper format, there will be additional cost of nearly \$31,969 in materials and postage costs.

Claims Denial Disclosures

Using assumptions similar to those used for the ERISA claims procedure regulation, CMS estimates that there will be approximately 30.9 million claims for MH/SUD benefits with approximately 4.6 million denials that could result in a request for an explanation of reason for denial. CMS has no data on the percent of denials that will result in a request for an explanation, but assumed that ten percent of denials will result in a request for an explanation (463,533 requests).

For purposes of the estimate, we assume that it will take a medically trained clerical staff member five minutes to respond to each request at a wage rate of \$26.85 per hour. We estimate that nearly 439,893 claims will be processed through an issuer or a third-party provider, which results in a cost burden of approximately \$984,261. Assuming that 25 percent of the disclosures will be sent in paper format, there will be additional cost of nearly \$73,582 in materials and postage costs.

Medical Necessity Disclosures requested along with Claims Denial Disclosures

We estimate that when requesting an explanation as to why their specific claims have been denied, 10 percent participants will request copies of the relevant medical necessity criteria. Therefore, approximately 43,989 disclosures will be processed by an issuer or a third-party provider and will result in a cost burden of \$98,426. Assuming that 25 percent of the disclosures will be sent in paper format, there will be additional cost of nearly \$7,258 in materials and postage costs.

Table 3 below details calculations related to notices. (Please see section 12 above of this Supporting Statement for many assumptions made in calculations.).

Table 3. Cost Burden Estimates: Disclosures Processed By Issuers Or Third Party Providers

3.a. Medical Necessity Disclosures Processed By Issuers or Third Party Providers					
Notice Type and Method of Distribution	Number of Notices	Estimated Labor Costs	Paper, Printing & Postage Costs	Total Cost (Number of Notices x \$2.24)	Total Cost (Number of Notices x \$2.90)
<i>Medical Necessity Disclosure</i>	78,126	\$174,806			
38% sent electronically	29,688			\$66,426	
62% sent by paper at \$0.66 per notice	48,438		\$31,969		\$140,348
Medical Necessity Disclosure (provided with Claims Denial Disclosure)					
	43,989	\$98,426			
75% sent electronically	32,992			\$73,820	
25% sent by paper at \$0.66 per notice	10,997		\$7,258		\$31,865
3.b. Claims Denial Disclosures Processed By Issuers or Third Party Providers					
Notice Type and Method of Distribution	Number of Notices	Estimated Labor Costs	Paper, Printing & Postage Costs	Total Cost (Number of Notices x \$2.24)	Total Cost (Number of Notices x \$2.90)
<i>Claims Denial Disclosure</i>	439,893	\$984,261			
75% sent electronically	329,920			\$738,196	
25% sent by paper at \$0.66 per notice	109,973		\$72,582		\$318,648

14. Cost to Federal Government

There are no costs to the Federal government.

15. Changes to Burden

The burden increased by approximately 25,782 hours and capital costs increased by approximately \$198,964 because the disclosure requirements are extended to non-grandfathered insurance coverage in the small group market through the EHB requirements and to the individual markets, and due to an increase in mailing costs.

16. Publication/Tabulation Dates

There are no publication or tabulation dates associated with these ICRs.

17. Expiration Date

There is no expiration date for these ICRs.

18. Certification Statement

There are no exceptions to the certification.
