## National Initiative for Cybersecurity Careers and Studies (NICCS) Training Catalog Course Form

The **NICCS Cybersecurity Training Catalog** is a central repository of cybersecurity training providers and available training courses for the Nation. Your submissions will help us build a robust listing of available cybersecurity courses. Using the directions below, please complete the form on the next tab, and then submit the form to NICCS@hq.dhs.gov.

(Prior to your submission, please ensure you have already submitted the **NICCS Portal Provider Form**. Every provider is asked to submit an application; however, you will notice there is a streamlined process allowing you to bypass fields if your organization already possesses certain criteria.)

Note: A Training Provider can opt out of the NICCS Training Catalog and have their course content removed simply by emailing NICCS@hq.dhs.gov.

Each row should consist of one (1) training item. Training Name Enter the training name. Enter a brief description of the training. Additionally, please include the following: cost and duration of the course. Include the training delivery format, examples: live session, online course, webinar, etc. Lastly, enter any additional National Cybersecurity Workforce Framework Specialty Areas associated with this training other than the primary Specialty Area (descripted below). Training Catalog Number Enter your training catalog number for the training that will be entered into each row. Training PURL Enter the training URL. This should be the location at which an individual can register for the course. Training Purpose Select the training training the voltant of development, functional development, and management development. National Cybersecurity Framework Specialty Area Workforce Framework located here www.nist.gov/nice/framework/. Training can have up to five (5) mapped Specialty Areas. Intended Audience Select the intended audience for the training. Select between federal employee, academia, general public, or other. Learning Objective(s) Enter the learning objectives. Select the training proficiency level which corresponds to each Framework Specialty Area. Proficiency Level 0 'No Proficiency': This training is intended for someone with insufficient knowledge, skill, or ability level necessary for use and the application in simple work situations. Knowledge, skill, or ability level provided would be similar to the knowledge, skills, or abilities necessary for use and the application in simple work situations. Knowledge, skill, or ability level i 'Basic': This training is intended for individuals who need the basic knowledge, skills, or abilities for independent use and application in straightforward, routine work situations with limited need for direction. Proficiency Level 1 'Basic': This training is intended for individuals who need advanced knowledge, skills, or abilities for independent use and application i	Column Name	Τ
