

SUPPORTING STATEMENT

**A. Justification:**

1. Sections 90.35 and 90.175 require third party disclosures by applicants proposing to operate a land mobile radio station. If they have service contours that overlap an existing land mobile station they are required to obtain written concurrence of the frequency coordinator associated with the industry for which the existing station license was issued, or the written concurrence of the licensee of the existing station.

The Commission is requesting an extension for this submission in order to obtain the full three year clearance from the Office of Management and Budget (OMB).

Statutory authority for this collection of information is contained in Sections 4(i), 11, 303(g), 303(r), and 332(c)(7) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 161, 303(g), 303(r), 332(c)(7).

This collection of information does not affect individuals or households; thus, there are no impacts under the Privacy Act.

2. These requirements will be used by Commission personnel in evaluating the applicant's need for such frequencies and to minimize the interference potential to other stations operating on the proposed frequencies.
3. Prior to finalizing rule makings the Wireless Telecommunications Bureau conducts an analysis to ensure that improved information technology cannot be used to reduce the burden on the public. This analysis considers the possibility of obtaining and/or computer-generating the required data from existing data bases in the Commission or other federal agencies.
4. This agency does not impose a similar information collection requirements on the respondents. There is no similar data available.
5. In conformance with the Paperwork Reduction Act of 1995, the Commission is making an effort to minimize the burden on all respondents, regardless of size. The Commission has limited the information requirements to that absolutely necessary to deter against possible abuses.
6. This information is collected only once, upon initial application for a station license. Accordingly, less frequently collections are not feasible.
7. Current data collection is consistent with the guidelines in 5 CFR 1320.
8. The Commission initiated a 60-day public comment period which appeared in the Federal Register on September 25, 2013 (78 FR 59028) seeking comment from the public on the

information collection requirements contained in this collection. No comments were received as a result of the Notice. A copy of the Federal Register Notice is attached.

9. Respondents will not receive any gifts or payments.
10. There is no need for confidentiality with this collection of information.
11. This does not address any private matters of a sensitive nature.
12. Data farmed from our ULS database labeled “attachment description information” yielded a list of filings for each year, that contained attachments described as concurrence type attachments which typically are letters of concurrence from licensees or frequency coordinators. These figures provide us with an estimate of the application count of 2,500 applications each year being filed, which may require letters of concurrence.

We estimate that it would take each respondent 1 hour to obtain written concurrence of the frequency coordinator associated with the industry for which the existing station license was issued, or the written concurrence of the licensee of the existing station.

Number of respondents: 2,500.

Number of annual responses: 2,500.

Frequency of response: One time and third party disclosure requirements.

Annual hour burden per respondent: 1 hour.

**Total Annual Burden Hours: 2,500 hours.**

13. Estimate of cost to respondents: None.
14. Estimate of cost to the Federal Government: None.
15. The Commission has adjustments/decreases to this information collection as follows: 4,841 to the respondents, 4,841 to the number of annual responses and 4,841 to the annual burden hours which are due to the Commission over estimating the number of respondents and burden to this collection previously.
16. The data will not be published for statistical use.
17. We do not seek approval to not display the expiration date for OMB approval of the information collection.
18. There were no exceptions to the Certification Statement.

**B. Collections of Information Employing Statistical Methods:**

No statistical methods are employed.
