BOX AG1A

The next questions are about **traditional cigars, cigarillos**, and **filtered cigars**. These products go by lots of different names, so please use these descriptions and photos to understand what they are.

Traditional cigars contain tightly rolled tobacco that is wrapped in a tobacco leaf. Some common brands of cigars include Macanudo, Romeo y Julieta, and Arturo Fuente, but there are many others.

SHOW GENERIC IMAGE OF TRADITIONAL CIGARS

BOX AG1B

Cigarillos and **filtered cigars** are smaller than traditional cigars. They are usually brown. Some are the same size as cigarettes, and some come with plastic or wood tips. Some common brands are Black & Mild, Swisher Sweets, Dutch Masters, Phillies Blunts, Prime Time, and Winchester.

We next ask about smoking tobacco in a **hookah**, which is a type of water pipe. It is sometimes also called a "narghile" pipe. From now on, we will use "hookah" to refer to a water pipe or narghile pipe that is often used to smoke tobacco.

There are many types of hookahs. People often smoke tobacco in hookahs in groups at cafes or in hookah bars. The picture below shows a typical hookah.

The next questions ask about **smokeless tobacco** which you put in your mouth. Frequently you chew, suck or spit while using smokeless tobacco, although there is no need to do so for some types. Snus, for instance, is a type of smokeless tobacco that comes in a small pouch that you put inside your lip.

There are many kinds of smokeless tobacco, such as snus pouches, loose snus, moist snuff, dip, spit, and chewing tobacco. Common brands include Redman, Levi Garrett, Beechnut, Skoal, Grizzly, Nordic Ice and Copenhagen.

The next questions ask about another type of tobacco called **dissolvable tobacco**. You don't smoke dissolvable tobacco products – they are made of finely ground flavored tobacco that dissolves in your mouth.

Dissolvable tobacco products come in a variety of shapes, including small round pellets, thin sticks and flat strips. Some common brands are Ariva, Stonewall, and Camel Orbs, Sticks or Strips.

Create a variable, INTVDATE, to record the date that the Phase II screener was completed.

Create a derived variable, called ACHIEVEDAGE, as follows:

IF AM0001 ^=DK/RF, use a standard algorithm to determine his/her year of age on the date that the Phase II screener was completed, using the DOB entered into AM0001.

IF AM0001=DK/RF and AM0002 ^=DK/RF, then use the age entered into AM0002.

IF AM0002=DK/RF and AM0003 ^=DK/RF, then use the following values for ACHIEVEDAGE:

    IF AM0003=1, then ACHIEVEDAGE=17

    IF AM0003=2, then ACHIEVEDAGE=21

    IF AM0003=3, then ACHIEVEDAGE=27

    IF AM0003=4, then ACHIEVEDAGE=30

Create a derived variable called Phase2Complete, as follows:

Phase2Complete = 1 (Yes) if

{ [AM0001 <> -8, -7 OR AM0002 <> -8, -7] AND
  [(ACHIEVEDAGE > 17 YEARS) OR AM0003 = 2, 3, 4] AND

    (AD1002=1 AND AD1003=1 AND AD1004=1,2,-7, -8)] }

The second stage sampling algorithm will be run here. After the sampling algorithm is run, do the following:
DEFINE: EVER USER CIG = YES (1) IF AC1002=1; = NO (2) IF AC1002=2, DK/R.

For respondents that are ever users of cigarettes (EVER USER CIG = 1): go to cigarette section, then to sections (in order) for the other products they use (if any). Then for respondents who are dual or poly users, go to polyuse section, for all others go to nicotine dependence section. Complete remaining sections in order.

For respondents that have never used cigarettes (EVER USER CIG = 2): go to sections (in order) for the product or products they use. Then for respondents who are dual or poly users, go to polyuse section, for all others go to nicotine dependence section. Complete remaining sections in order.

Create a summary screen displaying responses to all questions used in the Phase 2 sampling algorithm and/or in setting tobacco use-defined groups. Allow respondent either to 1) confirm in a master checkbox that there are no changes (can mean either all correct or does not wish to answer any remaining missing questions), or 2) check individual items for correction/filling any still-missing data.

For the master checkbox, label it as "Check here if you do not want to make any {more} changes."
[DISPLAY{more} IF RESPONDENT MAKES ANY CHANGES AND IS ROUTED BACK TO THIS BOX FOR CONFIRMATION AGAIN.

For any DK or RF response, display response as "Not answered".

For each item checkbox, label as "Check here to change" (if valid data) or "Check here to answer" (if missing).

Route the questionnaire back to each checked question and allow respondent to change answer. Save original answers in a history variable for each question. Apply the same missing probes or logic checks to any revisited question as specified for the initial administration of the question, e.g., probe for DK or Ref, but only once each.

After respondent has been routed through any checked items, display the summary screen again and allow further iterations until the respondent checks the master box.

Do not run the Phase 2 sampling algorithm until the respondent checks the master approval box.
