

Form A Screener Questionnaire Administered on Paper

This study seeks to understand challenges with adopting and using EHRs and the help that practices that provide primary care services, like yours, have received to meet those challenges. The survey should be completed by the person most familiar with EHR selection, implementation, and use in your practice. This may be you, another clinician, practice manager, nurse, Information Technology staff, or another employee.

It should take you about 5 minutes to answer these questions. All the information you provide will be kept confidential.

Please answer each question as best you can by placing a check mark or an X to the left of the answer you choose. Sometimes you will be asked to skip a question. When this happens, an arrow to the right of the answer choice will tell you what question to skip to.

For example:

Yes → **Go to Question 3**
 No → **Go to Question 3**
