

**Peace Corps -- Office of Medical Services  
Report of Physical Examination  
(PC-OMS-1790S)  
OMB Control No. 0420-0549**

**SUPPORTING STATEMENT**

**Section A. Justification**

1. The Peace Corps Act states that “[t]he President may enroll in the Peace Corps for service abroad qualified citizens and nationals of the United States (referred to in this Act as “volunteers”). The terms and conditions of the enrollment ... of volunteers shall be exclusively those set forth in this Act and those consistent therewith which the President may prescribe ...” 22 U.S.C. 2504(a). Eligibility requirements for the Peace Corps have been prescribed in 22 C.F.R. Part 305. Among those eligibility requirements is one relating to medical status. An Applicant “must, with reasonable accommodation, have the physical and mental capacity required of a Volunteer to perform the essential functions of the Peace Corps Volunteer assignment for which he or she is otherwise eligible and be able to complete an agreed upon tour of service, ordinarily two years, without undue disruption due to health problems.” 22 C.F.R. 305.2(c). All applicants for service must undergo a physical examination and a dental evaluation prior to Volunteer service to determine if they meet this medical status eligibility requirement. In addition, under 22 U.S.C. 2504(e), the Peace Corps provides medical care to Volunteers during their service and the information collected will also be used in connection with medical care and treatment during Peace Corps service for applicants who become Volunteers. Finally, the information collected may serve as a point of reference for any potential future Volunteer worker’s compensation claims.<sup>1</sup>

Volunteers serve in 65 developing countries where western-style healthcare is often not available. Volunteers are placed in remote locations where they may suffer hardship because they have no access to running water and/or electricity. They also may be placed in locations with extreme environmental conditions related to cold, heat or high altitude and they may be exposed to diseases not generally found in the U.S. Volunteers may be placed many hours from the Peace Corps medical office and not have easy access to any health care provider. Therefore, a thorough examination of an Applicant’s medical condition is an essential step to determine their suitability for service in Peace Corps.

All Applicants begin the medical part of the application process by completing a comprehensive Health History Form, covered under OMB control number 0420-0510. After completion of the Health History Form and after passing preliminary non-health-related assessments, the Applicant will be “nominated” to a program. This nomination does not guarantee an invitation to serve, but it does hold a place so the Applicant may proceed with the process.

---

<sup>1</sup> The Peace Corps Act states that, except as provided in the Peace Corps Act, Volunteers are not employees for any purpose. 22 U.S.C. § 2504(a). Nevertheless, Volunteers are entitled to receive compensation under the Federal Employees Compensation Act for injuries received during service. 5 U.S.C. § 8142.

Applicants who have certain particularly difficult to accommodate conditions will be evaluated early in the process to determine their ability to perform the essential functions of a Peace Corps Volunteer and complete a tour of service without undue disruption due to health problems, with or without reasonable accommodation. After a review by the Peace Corps pre-service medical staff of the Health History Form and any supplemental forms that the Applicant is required to submit following nomination (covered under OMB control number 0420-0550), the Applicant may be medically pre-cleared. An Applicant who is medically pre-cleared and who accepts an invitation to serve as a Peace Corps Volunteer undergoes a final medical clearance.

All Applicants go through the final medical clearance process including undergoing and submitting a complete physical examination, as documented in a Report of Physical Examination which is covered by this Supporting Statement.

The information contained in the Report of Physical Examination will be used to make an individualized determination as to whether an Applicant for Volunteer service will, with reasonable accommodation, be able to perform the essential functions of a Peace Corps Volunteer and complete a tour of service without undue disruption due to health problems.

2. The information in this form will be used by the Peace Corps Office of Medical Services to determine whether an Applicant will, with reasonable accommodation, be able to perform the essential functions of a Peace Corps Volunteer and complete a tour of service without undue disruption due to health problems and, if so, to establish the level of medical and other support, if any, that may be required to reasonably accommodate the Applicant. The information in this form is also used as a baseline assessment for the Peace Corps Medical Officers overseas who are responsible for the Volunteer's medical care. Finally, the Peace Corps may use the information in this form as a point of reference in the event that, after completion of the Applicant's service as a Volunteer, he or she makes a worker's compensation claim under the Federal Employee Compensation Act (FECA).

Applicants' qualifications for service are reviewed in a division of Peace Corps separate from the division that performs the medical clearance review. Those who make a judgment about whether an applicant has the skills to serve as a Volunteer do not have access to medical clearance information about the applicant. Additionally, each applicant receives an individualized assessment of his or her medical conditions. Peace Corps does not have a blanket rule excluding applicants with particular conditions. Applicants who are medically disqualified receive an explanation why they were not medically cleared, and they have the opportunity to appeal the clearance decision to the Pre-Service Review Board. Medical clearance decisions are not permanent, and applicants who are not medically cleared may reapply.

3. Applicants will gain access to the form via a secure online portal. Applicants will have to download the form for their health care provider to complete. The completed form can be scanned and uploaded back into the Applicant's secure Peace Corps online portal or they can be faxed or mailed to the Peace Corps Office of Medical Services. The Peace Corps anticipates that most Applicants will submit the form electronically and that only those with no electronic access will submit a paper version.

4. There is no similar information available to the Peace Corps. This form is the only agency form that collects this particular information concerning an Applicant's baseline physical examination. The information obtained through the Report of Physical Examination is needed for all Applicants who have accepted an invitation to serve. The use of other forms to obtain medical information regarding an individual Applicant, either during the medical pre-clearance process or during the final clearance process, will vary depending on the Applicant's unique health history.

5. This information does not have a significant impact on small businesses or other small entities.

6. Under Section 5(e) of the Peace Corps Act, 22 U.S.C. 2504(e), "applicants for enrollment shall receive such health examinations preparatory to their service ... as the President may deem necessary or appropriate." A complete physical examination is necessary in order to determine if an Applicant will, with reasonable accommodation, be able to perform the essential functions of a Peace Corps Volunteer and complete a tour of service without undue disruption due to health problems and, if so, the accommodation that is needed. If the Peace Corps lacked the medical information contained in the Report of Physical Examination, the Peace Corps would be unable to make such a determination.

7. There are no special circumstances. Collection will be conducted consistent with 5 C.F.R. 1320.6 guidelines.

8. The agency's 60-Day notice was published in the Federal Register on December 2, 2013, 78 FR 7712. No public comments were received during the 60-day period. The 30-Day notice was published February 10, 2014, 79 FR 72124.

9. No payment or gift is provided to Applicants applying for Peace Corps service. However, in accordance with the authority provided in 22 U.S.C. 2504(e), the Peace Corps reimburses Applicants for some of the expenses that they incur for medical examinations that they undergo in connection with the Peace Corps Volunteer application process. In addition to the physical examination itself, Applicants can be reimbursed for basic lab work, including testing for tuberculosis and HIV.

Reimbursement is subject to overall limits and may not cover all costs incurred by the Applicant in connection with the medical evaluation. Depending on the age and gender of an Applicant, there are different requirements for evaluation. For example, all women are required to provide Pap exam results and all Applicants who are 50 years of age or older are required to submit results of an electrocardiogram and colon cancer screening. Because there are different requirements for medical evaluations based on gender and age, the reimbursement limits vary based on those factors:

Females under 50 may be reimbursed up to \$165  
Females 50 and older may be reimbursed up to \$290  
Males under 50 may be reimbursed up to \$125  
Males 50 and older may be reimbursed up to \$175

In addition, Applicants are reimbursed only to the extent that they are not otherwise reimbursed by their insurance companies. Peace Corps is seeking Paperwork Reduction Act approval for these forms.

10. Applicants are informed that the medical information they provide will be maintained in accordance with the Privacy Act. Applicant medical records are included in a sub-system of the Peace Corps' Privacy Act System of Records: Volunteer Applicant and Service Records System (PC-17). The collection and storage of this information also complies with the Health Insurance Portability and Accountability Act (HIPAA). The Peace Corps' internal rules ensure the confidential protection of medical information consistent with the Privacy Act and HIPAA. Applicants are informed of their rights under HIPAA before completing the forms.

11. Questions of a sensitive nature are asked solely from a medical perspective and the information gathered is used to determine whether the Applicant will, with reasonable accommodation, be able to perform the essential functions of a Peace Corps Volunteer and complete a tour of service without undue disruption due to health problems. This information also assists the Peace Corps in determining what is needed in order to provide adequate medical support to the Applicant during service. Failure to answer truthfully could result in disqualification from Peace Corps service. Failure to submit a completed Report of Physical Examination at the time of invitation will result in disqualification from Peace Corps service. The Peace Corps complies with the medical confidentiality requirements of the Privacy Act and HIPAA. However, all Applicants are required, as a condition of processing their applications and of Peace Corps service, to sign an Authorization for Peace Corps Use of Medical Information under which the Applicant permits the Peace Corps to use the Applicant's protected health information to determine the Applicant's eligibility for the Peace Corps and as necessary for administration of the Peace Corps program.

12. Estimates of hour burden:

Only an Applicant who has accepted an invitation to serve as a Peace Corps Volunteer will receive the Report of Physical Examination, instructing the Applicant to see a licensed physician and undergo a general medical examination, inclusive of laboratory testing, and to submit the results to the Peace Corps. Based on the number of Volunteers projected to receive invitations to serve in the next year, it is estimated that 4,000 Applicants annually will receive this form. This number may be higher or lower depending on the actual number of Applicants who accept an invitation.

Based on phone interviews with nine current Peace Corps applicants undergoing the medical evaluation process, it is estimated that the time associated with the Applicant downloading the form, driving to and from the physician's office and scanning and uploading, faxing or mailing the completed form will be 45 minutes. This is made up of an average driving time to and from the physician office of 35 minutes and an additional 10 minutes to download the form and to scan and upload, fax or mail the completed form to the Peace Corps. It is estimated that it will take both the Applicant and the physician 45 minutes for the office visit, during which the Applicant will be examined by the physician and the physician will complete the form. The

estimate of the total annual hour burden to each Applicant completing the information on this form, inclusive of the time to go to and from the physician, being examined by the physician and waiting for the physician to complete the form and the associated paperwork retrieval and return, is therefore 1 hour 30 minutes. The estimate of the total annual hour burden to each Applicant's physician completing the information on this form is 45 minutes.

The estimate of total annual hour burden range to all physicians and Applicants completing the information on this form is 3,000 hours of physician time (4,000 Applicants x 45 minutes) and 6,000 hours of Applicant time (4,000 Applicants x 90 minutes).

13. The estimate of total annual cost burden to Applicant respondents resulting from collection of the information in this form is the total cost of the medical examination, including lab tests, that exceeds the maximum Peace Corps reimbursement, which is discussed in response to question 9. The Peace Corps is unable to estimate this overall cost due to the variety of fees that physicians and other health professionals charge and due to the unknown value of insurance reimbursements.

14. Estimated annual cost to the Federal Government.

Pre-service Nurses are on the FS-4 pay scale but each has a different pay step depending on experience. For this reason, we are using the mid-range FS-4 hourly rate of \$36 an hour, which is \$46 an hour with benefit costs included. Physicians and mental health professionals are paid at the FS-1 pay scale with a mid-range rate of \$68 an hour, which is \$86 an hour with benefit costs included.

It is estimated that 4,000 Applicants will be required to submit the Report of Physical Examination to the Peace Corps. It is estimated that it will take a nurse 60 minutes to review the Report of Physical Examination. The nurse review of the Report of Physical Examination does not require consultation with a physician. The estimated cost for nurse review is \$184,000 (4,000 Applicants x 60 minutes x \$46/hr) .

If an Applicant would like to appeal an adverse decision, there is an appeal process. The reviewing nurse organizes all the medical information and presents it to an appeal board that is composed of at least one physician and at least four registered nurses (one each from the pre-service, in-service, post-service and quality improvement units). Historically, an average of eight nurses and two physicians have participated in appeal board reviews. For mental health cases, at least one mental health professional also participates in the appeal process, with an average of two mental health professionals attending each appeal process. Last year, there were 43 appeals. It is estimated that the number of appeals will remain at approximately this level and that half will involve mental health issues; however, both of these numbers may vary from year to year. Each appeal takes the appeal board approximately 20 minutes for review and voting. In addition, the reviewing nurse averages 2 hours to compile the information that is presented to the appeal board. The estimate of total annual burden to the Peace Corps cost of handling all appeals is \$13,616, as follows:

<b>Staff</b>	<b># of Staff</b>	<b>Amount of time per appeal</b>	<b># of appeals per year</b>	<b>Hourly rate</b>	<b>Annual Appeal Cost</b>
Reviewing nurse	1	140 minutes (2 hours preparation and 20 minutes presenting)	43	\$46	\$4,615
Nurses	8	20 minutes	43	\$46	\$5,275
Physicians	2	20 minutes	43	\$86	\$2,465
Mental Health professionals	2	20 minutes	22	\$86	\$1,261

For those Applicants who become Volunteers, the information in this form will also be used by Peace Corps Medical Officers overseas in providing medical care during the Volunteer's service. The costs associated with the receipt and review of this information is indeterminate based on the wide range of Peace Corps Medical Officer hourly rates and the time associated with review of the Report of Physical Examination in individual cases. It is understood that this is part of an everyday job requirement for all the Peace Corps Medical Officers in the field and reviewing these forms in no way increases the costs to the Federal Government. If Peace Corps Medical Officer did not have the information in this form, they would have to acquire the information through some other means, which would add to their daily workload.

15. There are no changes to report.

16. This information will not be quantified or published.

17. The Agency is not seeking approval to conceal or omit the expiration date for OMB approval of the information collection.

18. The agency is able to certify compliance with all provisions under Item 19 of OMB Form 83-I.

**Section B. Collection of Information Employing Statistical Methods**

This collection of information does not employ statistical methods.
