

SUPPORTING STATEMENT
Export Sales Reporting Requirement Regulation
7 CFR Part 20

1. CIRCUMSTANCES THAT MAKES THE COLLECTION OF INFORMATION NECESSARY. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection. Attach a copy of the appropriate section of each statute and regulation mandating or authorizing the collection of information.

The information collection requirements contained in 7 CFR Part 20 (the Regulation) are necessary to implement the mandatory export sales reporting requirements of §602 of the Agricultural Trade Act of 1978, as amended (7 U.S.C. 5712). Commodities subject to the export sales reporting requirements are listed in Appendix 1 of the Regulation, and the Secretary has authority to designate additional commodities. U.S. Exporters are required to report to the Foreign Agricultural Service (FAS) information on: (1) the quantity of a reportable commodity to be sold to a foreign buyer; (2) the country of destination; and (3) the marketing year of shipment. Data reported is aggregated and published in compilation form to protect business confidential information submitted.

2. PURPOSE AND ACTUAL USE OF AN INFORMATION COLLECTION. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.

The export sales reporting system provides commodity market participants with information about commodity export commitments, and is one means by which USDA seeks to insure fairness and soundness in commodity marketing.

The system requires that sales for export be reported to the Secretary on a daily basis for wheat, corn, grain sorghum, barley, oats, soybeans, and soybean meal for sales of 100,000 metric tons, or more in one day to one destination, and 20,000 tons or more for soybean oil. Weekly reporting is required for all sales activity, regardless of quantity, and for above commodities as well as cotton, beef, rice, cattle hides and skins, pork, and other minor oilseed products. The following are the currently approved reporting forms:

For limited sales, identified as optional origin sales, the exporter uses form FAS-97 Rev. 11-01, Report of Optional Origin Sales.

Weekly export sales and shipment activities are reported by the exporter using the form FAS-98 Rev. 11-01, Report of Export Sales and Exports.

Quarterly reports providing selected data on individual sales contracts are submitted using the form FAS-99 Rev. 11-01, Contract Terms Supporting Export Sales and Foreign Purchases.

For activity involving commodities that have been shipped from the U.S., but are unsold or have not been allocated to an existing sales contract, the reporting exporter uses the form FAS-100 Rev-11-01, Report of Exports for Exporters' Own Account.

The total outstanding contracts identified on the quarterly report are used as an internal check to ensure exporters have included all sales activity on their weekly "FAS-98" reports.

Information collection: In general, exporters are required to regularly report to the FAS specific information on commodity shipments within specific time limits. The information to be reported is maintained during the normal course of conducting business and does not add additional recordkeeping requirements on respondents. The information collection is needed by the administrative officials, because it provides up-to-date market data for making rational export policy decisions to prevent market disruptions. USDA, in turn, reports this information to the public so that all market participants can be aware of such sales and can evaluate the effects of exports on supply and demand estimates of production, prices, and sales.

3. USE OF AUTOMATED, ELECTRONIC, MECHANICAL OR OTHER TECHNOLOGICAL COLLECTION TECHNIQUES. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of technology, e.g., permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also, describe any consideration of using information technology to reduce burden.

The Department streamlined an electronic reporting system for collection of information on export sales for all reportable commodities. All exports use USDA's eAuthentication system to gain access and submit their reports electronically via a secure Internet website. In the event of extenuating circumstances, exporters are able to submit reports via secure facsimile.

4. EFFECTS TO IDENTIFY DUPLICATION. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in item 2 above.

The information collection does not duplicate information or data available elsewhere. Export data collected under other programs cannot be modified for purposes of this program, but can be used to verify the accuracy of data submitted. As part of the reporting process, reported sales for exports are offset with the actual shipment quantities leaving an "outstanding balance", or a weekly "snapshot" of the commitments to export U.S. agricultural commodities. The shipment data are summarized for the marketing year and recorded in the weekly publication as "Accumulated Exports." Other programs with different data that may be compared with the accumulated exports are collected by the Grain Inspections, Packers and Stockyards Administration (GIPSA), and the Bureau of the Census. Using the GIPSA inspection data individual shipments of grains inspected may be compared with the exports reported on the form "FAS-98" to ensure proper identification of quantity and country of destination. Similarly, the U.S. export data collected and summarized by the

U.S. Census Bureau on the “Shipper’s Export Declaration” provide both quantity and value of U.S. commodities actually being exported. Currently, the U.S. Census Bureau export data is available approximately 45 days after the month of shipment. Export sales data are available the week following the sales transaction. Shipment data is a no-cost result of the balance sheet reporting system, which produces the weekly outstanding commitment figures.

5. IMPACT ON SMALL BUSINESSES. If the collection of information impacts small businesses or other small entities (Item 5 of OMB Form 83-1), describe any methods used to minimize burden.

The data reported is maintained as a part of the normal course of export contracting business activity including small businesses. However, most of the data collected does not originate in firms defined as small business.

6. CONSEQUENCES IF THE INFORMATION COLLECTION IS NOT CONDUCTED. Describe the consequence to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.

The frequency of data collection and reporting are stipulated by law and authorized under § 602 of the Agricultural Trade Act of 1978, as amended. If such information were collected less frequently, the Department would not be in compliance with the statutes and not fulfilling the objectives of the export sales reporting program. If markets are to work for the benefit of producers, in addition to processors and exporters, then producers need more timely information as export sales are actually made.

7. EXPLAIN ANY SPECIAL CIRCUMSTANCES THAT WOULD CAUSE AN INFORMATION COLLECTION TO BE CONDUCTED IN A MANNER: Requiring – reporting more than quarterly; response to a collection in less than 30 days; submission of more than an original and two copies of documents; record keeping for more three years, additional statistical surveys and classifications; submission of proprietary confidential information.

This information collection is conducted in a manner consistent with 5 CFR 1320.5. Weekly reporting is required by § 602 of the Agricultural Trade Act of 1978, as amended, and daily reporting is required for certain commodities under the Regulation. Under the authorizing statute, individual reports remain confidential and are released in compilation form each week following the week of reporting. Data collected are identified as proprietary trade secrets, maintained in locked files, and are only available for use under the reporting program.

8. FEDERAL REGISTER NOTICE REQUIRED BY 5 CFR 1320.8(D) AND EFFORTS TO CONSULT WITH PERSONS OUTSIDE THE AGENCY REGARDING THE INFORMATION COLLECTION.

On June 25, 2012 (Vol. 77 No. 122) the agency published a proposed rule. The agency received eight comments and they were addressed in the Final rule.

On March 19, 2013 (Vol.78 No. 53) the agency published the final rule.

The “Notice of Request for Extension of a Currently Approved Information Collection” was published in the Federal Register on August 23, 2013, Volume 78, Number 164, and Pages 52497-52498. No comments were received.

9. PAYMENT OR GIFTS TO RESPONDENTS.

Respondents do not receive any payment or gifts for participation in the reporting program.

10. ASSURANCE OF CONFIDENTIALITY FOR RESPONDENTS.

Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.

Under the authorizing statute, individual reports are to remain confidential and be released in compilation form each week following the week of reporting. Export Sales Reporting personnel are extremely sensitive to the confidentiality requirements outlined in § 602 of the Agricultural Trade Act of 1978, as amended. Data collected are identified as proprietary, are maintained in locked files, and are only available for use under the reporting program.

11. JUSTIFICATION FOR QUESTIONS OF A SENSITIVE NATURE.

No questions of this nature are requested under this regulation.

12. ESTIMATE OF THE HOUR BURDEN OF THE INFORMATION COLLECTION.

Estimate of Burden of Collecting Export Sales Data

Form	Num of Respondents	Resp Per Respondent	Total Annual Responses	Hours Per Response	Total Hours
FAS-97	4	26.5	106	.5	53
FAS-98	380	240.5	91,390	.5	45,695
FAS-99 ^{1/}	220	15.0	3,300	.5	1,650
FAS-100	13	78.3	1,018	.5	509
TOTAL	380 ^{2/}	252.1 ^{3/}	95,814	.5	47,907

^{1/} The FAS-99 form is not required for smaller firms with fewer records and which typically do not carry outstanding sales from week to week. The number of FAS-99 forms has declined due to a reduction in the required frequency of FAS-99 submissions.

^{2/} Total number of respondents is better reflected in the total for the FAS-98 form since this represents the number of firms actively reporting to export sales on a weekly basis. The number of respondents for the FAS-97, FAS-99, and FAS-100 forms are subsets of the FAS-98 number.

^{3/} Total responses per respondent is an average calculated using total number of respondents (FAS-98) and total annual responses (All Forms).

The public annual reporting burden for this collection of information is estimated to average 126.1 hours per respondent for a total of 47,907 hours of total annual burden hours. The average salary is equivalent to an estimated \$25 per hour. Therefore, the total annualized cost to U.S. exporters is \$1,197,675 (47,907 hours x \$25/per hour).

13. ESTIMATE OF DOLLARS SPENT FOR CAPITAL START UP COSTS.

There are no capital start-up costs.

14. ESTIMATE OF DOLLAR COST TO THE FEDERAL GOVERNMENT.

Any additional costs to the Federal sector will be marginal since the compilation and processing of reports will be absorbed through current resources and with existing staff. The estimate of cost for the export sales reporting program is \$361,000 based on the following breakdown:

Salary Costs:

Program Manager (GS-14)	\$112,000
Marketing Specialist (GS-13)	\$95,000
Marketing Specialist (GS-13)	\$85,000
Program Specialist (GS-09)	<u>\$51,000</u>
Total Salaries	\$343,000

Other Costs:

Travel	\$8,000
Printing/Mailing/Supplies	<u>\$10,000</u>
Total Costs	\$361,000

15. REASONS FOR PROGRAM CHANGES OR ADJUSTMENTS IN ITEM 13/14 OR OMB FORM 83-1.

There is a change in estimates annual burden, responses, and respondents from the currently approved information collection. The number of respondent increased from 340 to 380 and the number of responses from 85,915 to 95, 814 and the burden hours from 42,947 to 47,907. The reason for the increases is due to the addition of pork to the Export Sales Reporting Program.

16. PLANS FOR TABULATION AND PUBLICATION OF THE INFORMATION

COLLECTION. For collection of information whose results will be published, outline plans for tabulation, and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the entire project, including beginning and ending dates of the collection of information, completion of report publication dates, and other actions.

Section 602 of the Agricultural Trade Act requires that individual data collected be compiled and published in compilation form each week following the week of reporting. The report is made available to the public in hard copy form and on the Foreign Agricultural Service's Internet homepage, normally on Thursday morning at 8:30 A.M., Eastern Time. Key users of export sales data include market analysts in USDA, other government agencies, land grant colleges and universities, trade associations, private firms involved in exports and in the domestic commodity markets, analytical service firms, and news services.

17. REASONS FOR SEEKING APPROVAL NOT TO DISPLAY THE EXPIRATION DATE. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.

The Department maintains a large stock of forms to provide to exporters to meet the continuous daily and weekly deadlines. It would be extremely cost inefficient to destroy the stock of forms and reproduce them with a later expiration date. Accordingly, we are asking for permission not to display the expiration date for:

Form FAS-97 Rev. 11-01, Report of Optional Origin Sales.

Form FAS-98 Rev. 11-01, Report of Export Sales and Exports.

Form FAS-99 Rev. 11-01, Contract Terms Supporting Export Sales and Foreign Purchases.

Form FAS-100 Rev. 11-01, Report of Export for Exporter's Own Account.

18. EXCEPTIONS TO THE CERTIFICATION STATEMENT IN ITEM 19 ON OMB FORM 83-1.

There are no exceptions.

B. COLLECTION OF INFORMATION EMPLOYING STATISTICAL METHODS

The collection of data does not employ statistical methods.
