SURVEY ON MULTIDISCIPLINARY TREATMENT PLANNING FOR LUNG CANCER

Thank you for participating in the Multidisciplinary Treatment Planning Survey for the NCI Community Cancer Centers Program (NCCCP). This survey is being conducted by the National Cancer Institute (NCI) to understand how NCCCP sites conduct multidisciplinary treatment planning, a feature of multidisciplinary care, and to gain insight into the variety of ways it is structured and implemented for different types of cancers.

This survey is designed to solicit information about the multidisciplinary treatment planning services being planned for **lung cancer** patients at your facility. This cancer was chosen because your facility has reported multidisciplinary care experience in this area. This survey is intended to obtain information at the **organizational** level and not at the physician or specialty level.

As the Quality of Care Lead at your facility, you have been identified as the most appropriate respondent to complete this survey. We encourage you to consult with other colleagues at your Cancer Center to accurately respond to these questions. There are no right or wrong answers. Your responses will help expand existing knowledge of multidisciplinary treatment planning for cancer and inform future research in cancer care delivery.

SURVEY ON MULTIDISCIPLINARY TREATMENT PLANNING FOR LUNG CANCER

Burden Statement and Consent Page

OMB No.: 0925-XXXX

Expiration Date: xx/xx/20xx

Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. **An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.** Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: NIH, Project Clearance Branch, 6705 Rockledge Drive, MSC 7974, Bethesda, MD 20892-7974, ATTN: PRA (0925-XXXX). Do not return the completed form to this address.

Your participation in this study is voluntary. You can decide not to be in the study, and that will not affect your status in the NCCCP. You will not be paid for doing this study.

Your privacy is very important to us. Your name and facility will not be linked to your answers & will not show up on any reports about this study. Instead, a code number will be assigned to your survey. Your responses will be kept secure to the extent provided by law and will only be accessible to the study team. All responses will be reported in aggregate.

Although your participation in this research may not benefit you personally, it will help us understand how NCCCP sites conduct multidisciplinary treatment planning.

There are no risks to individuals or organizations participating in this survey.

If you have questions about this study or to opt out, please contact Lead Investigator, Dr. Irene Prabhu Das at 240-276-6799 or prabhudasi@mail.nih.gov. If you have any questions about your rights as a participant in this study or any concerns or complaints, please contact the National Cancer Institute's OMB Project Clearance Liaison at 301-480-0541 or horovitchkelly@mail.nih.gov.

I have read and understand the above information. By clicking the "Next" button below, I consent to participate voluntarily in this survey.

SURVEY ON MULTIDISCIPLINARY TREATMENT PLANNING FOR LUNG CANCER

Survey Instructions

Please review ALL the instructions before beginning the survey.

For purposes of this survey, multidisciplinary treatment planning is described as a coordinated approach that brings together multiple cancer specialists as well as other clinicians and professionals to plan the appropriate treatment and other integral services for a cancer patient once a confirmed diagnosis is made (e.g., through surgery or biopsy). Therefore, multidisciplinary treatment planning occurs before initiating the required complex, multi-modality therapies.

- It is important that you consult with colleagues at your Cancer Center if you are unable to answer questions that may be administrative in nature and/or may not apply to your specialty. You may choose to print and share the survey to obtain the responses to some or all of the questions. Once you obtain the responses you need, you can then **complete the survey online. No written surveys will be accepted.**
- If your facility has a formal written policy, standard operating procedures, or a performance evaluation tool for multidisciplinary care (other than the NCCCP MDC Assessment Tool), please obtain access to them in advance to help complete the survey.
- We encourage you to answer all of the questions so that we can best understand multidisciplinary treatment planning at your facility and adequately represent it in the survey results.
- Your responses will be kept secure to the extent provided by law. Final results will not identify your facility site. Only aggregate results of this survey will be used. Neither you nor your facility will be linked to the final results.
- The survey should take no more than one hour to complete. This includes time to consult with your colleagues and team to respond to the survey questions. Your responses will be saved as you complete the survey. You do not have to complete the survey in one sitting. However, please save this web link used to access the survey, as you will need to click on the link again to access the survey if you chose to complete it at another time.

SURVEY ON MULTIDISCIPLINARY TREATMENT PLANNING FOR LUNG CANCER

A. OVERVIEW OF MULTIDISCIPLINARY TREATMENT PLANNING FOR CANCER CARE

10%

For the following questions, please think about **typical lung cancer cases** at your Cancer Center.

For purposes of this survey, **multidisciplinary treatment planning** is defined as a coordinated approach that brings together multiple cancer specialists as well as other clinicians and professionals to plan the appropriate treatment and other integral services for a cancer patient once a confirmed diagnosis is made (e.g., through surgery or biopsy). Therefore, multidisciplinary treatment planning occurs before initiating the required complex, multi-modality therapies.

1. Please choose the statement that best describes how the treatment planning approach for lung cancer patients at your facility compares with the survey's definition of multidisciplinary treatment planning.

- The survey definition of multidisciplinary treatment planning exactly describes the treatment planning approach for lung cancer patients at my facility.
- The survey definition of multidisciplinary treatment planning describes some but not all aspects of the treatment planning approach for lung cancer patients at my facility.
- The survey definition of multidisciplinary treatment planning does not at all describe the treatment planning approach for lung cancer patients at my facility.
- Other (please specify)

2. What is the multidisciplinary treatment planning approach for lung cancer patients called at your facility?

- Multidisciplinary Conference
- Multidisciplinary Clinic
- Multidisciplinary Team
- Tumor Board
- Tumor Conference
- Cancer Conference
- Other (please specify)

3. Once a patient is definitively diagnosed with lung cancer, would you describe the multidisciplinary treatment planning as prospective?

- Yes
- No
- A mixture of prospective and retrospective
- Other (please specify)

4. How frequently does your facility hold multidisciplinary treatment planning meetings for lung cancer cases, either in-person or virtually?

- Four times per month/Weekly
- Three times per month
- Two times per month
- Once a month
- As needed
- Other (please specify)

SURVEY ON MULTIDISCIPLINARY TREATMENT PLANNING FOR LUNG CANCER

A. OVERVIEW OF MULTIDISCIPLINARY TREATMENT PLANNING FOR CANCER CARE

6. Why are patients not invited? (CHECK ALL THAT APPLY)

- Medical providers would not be able to speak as freely in the presence of the patient.
- Our facility lacks the infrastructure to accommodate patient attendance.
- It is an inefficient use of time to include the patient.
- There are concerns about legal liability/accountability for decisions regarding a patient's treatment.
- The discussion may be too overwhelming or confusing for the patient.
- Medical providers aren't able to bill for time spent with patients in these discussions.
- There are concerns that inviting patients may compromise the privacy of their health information.
- Other (please specify)

SURVEY ON MULTIDISCIPLINARY TREATMENT PLANNING FOR LUNG CANCER

B. INITIAL CASE PRESENTATION

16. Does your facility have guidelines indicating when the initial case presentation should be scheduled once cancer is diagnosed?

- Yes
- No
- Under development

17. Would your facility be willing to share a copy of your initial case presentation guidelines?

- Yes (The researchers will contact you)
- No
- Don't know

18. Once patients have a confirmed lung cancer diagnosis, who decides if the case needs to be presented? (CHECK ALL THAT APPLY)

- Medical Oncologist
- Surgical Oncologist
- Radiation Oncologist
- General Surgeon
- Site-Specific Cancer Specialist
- Pathologist
- Nurse Practitioner/Physician Assistant
- Patient/Nurse Navigator
- No one person or role decides, any team member can present a case
- No one person or role decides, all cases presented
- Other (please specify)

19. When is the initial case presentation for confirmed cancer cases typically held?

- After definitive cancer diagnosis and before multi-modality therapy is initiated
- Sometime after multi-modality therapy is initiated
- A mixture of both
- Some other time (please specify)

E. POST-MEETING FOLLOW-UP

67%

44. Which specialists or other professionals, who were not part of the initial case presentation, have participated in subsequent meetings about lung cancer cases? (CHECK ALL THAT APPLY)

- Site-Specific Cancer Specialist
- Primary Care Physician
- General Surgeon or Surgical Specialist
- Pathologist
- Palliative Care Specialist
- Clinic Nurse
- Clinical Trials Nurse/Research Nurse/Clinical Research Associate
- Nurse Practitioner/Physician Assistant
- Social Worker/ Psychologist
- Patient/Nurse Navigator
- Genetics Counselor
- Clergy
- Dietitian
- Speech, Occupational, or Physical Therapist
- Pain Management Specialist
- OBGYN
- Other (please specify)

For the following questions, please think about your entire multidisciplinary care process for lung cancer cases not just the multidisciplinary treatment planning meeting.

45. A treatment plan is a comprehensive, formal plan prospectively outlining anticipated treatment approaches. Is a comprehensive, formal treatment plan typically developed for individual lung cancer patients?

- Yes
- No

Prev

Next

SURVEY ON MULTIDISCIPLINARY TREATMENT PLANNING FOR LUNG CANCER

E. POST-MEETING FOLLOW-UP

46. Do lung cancer patients typically receive a copy of the comprehensive, formal treatment plan?

- Yes
- No
- Other (please specify)

47. Is a copy of the comprehensive, formal treatment plan typically included in the patient's medical record?

- Yes
- No
- Other (please specify)

48. Do primary care physicians typically receive a copy of the comprehensive, formal treatment plan?

- Yes
- No
- Other (please specify)

49. A treatment summary retrospectively summarizes the treatments that the patient has received. Is a treatment summary typically developed?

- Yes – A comprehensive summary of all cancer treatments is developed (includes radiation, chemotherapy, and/or surgery)
- Yes – A treatment-specific summary is developed where only some treatments are documented (e.g. only radiation therapy or only chemotherapy is documented)
- No treatment summary is developed

I. CLOSING QUESTIONS

65. Please indicate which of these reflects your experience in responding to the survey questions:

- I answered the questions on my own without consulting anyone.
- I consulted with the other colleagues in the Cancer Center before I responded to the questions.
- I requested someone else to answer the questions.
- I worked with another person to complete the survey together.

66. What is your specialty?

- Medical Oncologist
- Surgical Oncologist
- Radiation Oncologist
- Surgeon
- Pathologist
- Radiologist
- Registered Nurse
- Other Cancer Specialist or Medical Specialty (please specify)

67. Are you employed by your Cancer Center or in private practice?

- Cancer Center only
- Private practice only
- Both
- Other (please specify)

68. Please indicate your cancer center's current CoC accreditation cancer program category.

- Academic Comprehensive Cancer Program
- Community Cancer Program
- Comprehensive Cancer Program
- Integrated Network Cancer Program
- Other (please specify)

69. What is your cancer center's annual case volume for the most recent year?

70. Please identify the total number of licensed beds in the hospital affiliated with the NCCCP site.
