SUPPLEMENTARY INFORMATION: In the **Federal Register** of January 4, 2013 (78 FR 694), the Consumer Product Safety Commission published a notice in accordance with provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) to announce the agency's intention to seek extension of approval of the collection of information required in the Standard for the Flammability (Open Flame) of Mattresses Sets, 16 CFR part 1633. No comments were received in response to that notice. Therefore, by publication of this notice, the Commission announces that it has submitted to the OMB a request for extension of approval of that collection of information without change.

The Mattress Open-Flame standard is intended to reduce unreasonable risks of burn injuries and deaths from fires associated with mattresses, particularly those initially ignited by open-flame sources, such as lighters, candles, and matches. The Mattress Open-Flame standard prescribes a test to minimize or delay flashover when a mattress is ignited. The standard requires manufacturers to test specimens of each of their mattress prototypes before mattresses based on that prototype may be introduced into commerce.

The Mattress Open-Flame standard requires detailed documentation of prototype identification and testing records, model and prototype specifications, inputs used, name and location of suppliers, and confirmation test records, if establishments choose to pool a prototype. This documentation is in addition to documentation already conducted by mattress manufacturers in their efforts to meet the mattress cigarette standard under 16 CFR part 1632. CPSC staff estimates that there are 571 establishments producing conventional mattresses and 100 establishments producing nonconventional mattresses in the United States, for a total of 671 firms affected by this standard. CPSC staff estimates the recordkeeping requirements to take about 4 hours and 44 minutes per establishment, per qualified prototype. Although some larger manufacturers reportedly are producing mattresses based on more than 100 prototypes, most mattress manufacturers base their complying production on 15 to 20 prototypes.

Assuming that establishments qualify their production with an average of 20 different qualified prototypes, recordkeeping time is estimated to be 94.7 hours (4.73 hours × 20 prototypes)

per establishment, per year. (However, pooling among establishments or using a prototype qualification for longer than 1 year will reduce this estimate). Accordingly, the annual recordkeeping time cost to all mattress producers is estimated at 63,521 hours (94.7 hours × 671 establishments). The hourly compensation for the time required for recordkeeping is \$27.64 (U.S. Bureau of Labor Statistics, "Employer Costs for Employee Compensation," June 2012, Table 9, total compensation for all sales and office workers in goods-producing, private industries: <http://www.bls.gov/ncs>). Total estimated costs for recordkeeping are approximately \$1.7 million (63,521 hours × \$27.64). The estimated annual cost of information collection requirements to the federal government is approximately \$717,954.

Secretary, Consumer Product Safety Commission.

Title of Collection: Fiscal Operations Report for 2012-2013 and Application to Participate for 2014-2015 (FISAP) and Reallocation Form.

OMB Control Number: 1845-0030.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: State, Local, or Tribal Governments, Private Sector.

Total Estimated Number of Annual Responses: 4,258.

Abstract: The data submitted electronically in the Fiscal Operations Report and Application to Participate (FISAP) through FISAP on the Web is used by the Department of Education to determine the institution's funding need for the award year and monitor program effectiveness and accountability of fund expenditures. The Reallocation form is part of FISAP on the Web. The Higher Education Amendments (HEA) requires that if an institution anticipates not using all of its allocated funds for the Perkins, Federal Work Study (FWS), and

Federal Supplemental Education Opportunity Grant (FSEOG) programs by the end of an award year, it must specify the anticipated remaining unused amount to the Secretary. In addition to renewing the expiration date, references to dates and award years dates have been updated on the forms and in the instructions for both documents. The FISAP form has been revised to use technology to gather existing data electronically from other sources requiring less data entry.
