Pipeline Safety: Transportation of Hazardous Liquids by Pipeline: Recordkeeping and
Accident Reporting
Docket Number: PHMSA-2013-0061
OMB Control No. 2137-0047

INTRODUCTION

The Pipeline and Hazardous Materials Safety Administration (PHMSA) requests approval from the Office of Management and Budget (OMB) for an extension and amendment of a currently approved collection entitled “Pipeline Safety: Transportation of Hazardous Liquids by Pipeline: Recordkeeping and Accident Reporting” (OMB Control No. 2137-0047). The current expiration date for this information collection is January 1, 2014. The change to this information collection is necessary to revise the Hazardous Liquid Accident Report (PHMSA F 7000-1) and to incorporate the collection of data currently collected under OMB. Control Number 2137-0598.

Part B. Collections of Information Employing Statistical Methods.

This information collection does not employ statistical methods.

1. Describe potential respondent universe and any sampling selection method to be used.

There is no potential respondent universe or any sampling selection method being used.

2. Describe procedures for collecting information, including statistical methodology for stratification and sample selection, estimation procedures, degree of accuracy needed, and less than annual periodic data cycles.

There are no procedures for collecting information, including statistical methodology for stratification and sample selection, estimation procedures, degree of accuracy needed, and less than annual periodic data cycles.

3. Describe methods to maximize response rate.

There are no methods to maximize the response rate.

4. Describe tests of procedures or methods.

There are no tests of procedures or methods.

5. Provide name and telephone number of individuals who were consulted on statistical aspects of the information collection and who will actually collect and/or analyze the information.

There were no individuals consulted on statistical aspects of this information collection.
