

# GAF Permit Log

**GAF Permit Log:** Upon retention of a GAF halibut, the charter vessel guide must immediately record on the GAF permit log:

- ◆ Date that GAF was caught and retained
- ◆ Length of GAF. Halibut lengths are measured to the nearest inch in a straight line (not following the curve of the body) from the anterior-most tip of the lower jaw with the mouth closed to the extreme end of the middle of the tail.
- ◆ Record the electronic report confirmation number on the GAF permit log.

	Date GAF halibut landed	Length of GAF (inches)	GAF Electronic Report Confirmation No.		Date GAF halibut landed	Length of GAF (inches)	GAF Electronic Report Confirmation No.
