

As you may know, the U.S. census is conducted every 10 years. This is your opportunity to provide input to the U.S. Census Bureau as we consider new ways to make it easier for people to participate in the census and other government surveys while maintaining or improving the quality of Census Bureau data.

The Census Bureau is considering using data that private businesses and other government organizations already collect about individuals and households to answer certain questions instead of asking people to answer these questions on a survey.

EACH SAMPLED RESPONDENT RECEIVES ONLY ONE OF THE FOLLOWING QUESTIONS:

1. If you could save 10 minutes by allowing the Census Bureau to gather the number of household members at your address from other Federal government agencies, would you agree to letting the Census Bureau get that information, or would you prefer to spend the 10 minutes doing a survey?
2. If you could save 30 minutes by allowing the Census Bureau to gather the number of household members at your address from other Federal government agencies, would you agree to letting the Census Bureau get that information, or would you prefer to spend the 30 minutes doing a survey?
