

Daily Novel and Pandemic Influenza A Virus State Case Status Summary Update

State: _____ **Report for** __/__/____ *

Non-ill contacts under observation**

Previous total	New	Reclassified due to illness	Released after 7 days of observation and no illness	Current total under observation

Suspect cases* currently under investigation**

	Previous total	New Suspects	Current total under investigation
Outpatient		Cumulative number	
Hospitalized			
Dead			
Recovered			
TOTAL			

Probable cases***

Confirmed cases***

	Previous total A(H5) positive cases		New A(H5) positive cases		Cumulative total	
	All positives	Positive pending CDC confirmation	All positives	Positive pending CDC confirmation	All positives	Positive pending CDC confirmation
Outpatient – ill						
Hospitalized						
Dead						
Recovered						
TOTAL						

* The reporting period is a calendar day (midnight to midnight). Reports should be faxed to CDC each day by noon Eastern time. The fax number is 1-888-232-1322.

**Contact is defined as a family/household member, a person from the same facility (day care, LTCF), or a person in close contact (within 1 meter for ≥1 hour) of a suspect, probable, or confirmed case. Also, included as a contact would be a passenger traveling in the same compartment as a suspect, probable, or confirmed case (i.e., airplane, bus, or train compartment) ; any passenger, regardless of distance from case.

***Case definitions:

Suspect - A clinically compatible illness for whom H5N1 laboratory confirmation is pending and whose exposure is under investigation. Examples of persons whose exposures are under investigation are:

- . A clinically compatible case with an epidemiologic link to a confirmed case
- . A clinically compatible case testing positive for influenza A
- . A clinically compatible case with travel to area with confirmed cases

Public reporting burden of this collection of information is estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-0004).

- . Severe atypical pneumonia in a previously healthy person < 65 years of age
- . A person who is suspected of having pandemic influenza

Probable - A clinically compatible illness with an epidemiologic link to a confirmed H5N1 case and for whom no specimen suitable for testing was obtained.

Confirmed - A clinically compatible illness with H5N1 laboratory confirmation at CDC or at approved state health department laboratory.
