Request for Change for 0920-0956

Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery

The Centers for Disease Control and Prevention (CDC) requests a nonmaterial change to 0920-0956, Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery, due to the Centers for Disease Control and Prevention Information Collection Review Office's error in submitting burden estimates for the original generic clearance request to the Office of Management and Budget (OMB). As stated in the Information Collection Request, CDC requested 10,250 respondents and 5,250 burden hours annually for this collection. When the information was entered into the Information Collection Request, Review and Approval System (ICRAS), those annual numbers were entered, and approved by OMB. CDC now realizes that the burden estimates entered should have covered all three years of information collection, that is, three times what was requested and granted.

CDC requests that 20,500 respondents and 10,500 hours are added to the collection, to total what we estimate will be required for three years under this generic information collection.
