TITLE OF INFORMATION COLLECTION:

CDC Spanish Homepage Survey

PURPOSE:

The Digital Media Branch (DMB) recently launched a responsive design homepage for the English version of www.CDC.gov. The new responsive design website allows an optimal viewing experience regardless of the visitor’s viewing device (mobile phones, tablets, desktops, etc.).

DMB is currently working on updating the En Espanol homepage for CDC.gov (<http://www.cdc.gov/spanish/>). Since this homepage was refreshed a few years ago, CDC web audiences have changed and technologies (specifically mobile) have resulted in different web usage patterns and web site needs. As the “face” of CDC.gov for Spanish-speaking populations, it is important that the CDC.gov keep up with these changing requirements and remain current in its design and information architecture.

In order to ensure the homepage is meeting its audiences’ needs and allows CDC.gov users to find public health information quickly and efficiently, a survey needs to be administered to access target users’ information needs as these needs have changed since the last redesign effort. The survey would be voluntary and potential participants would be recruited when they visit the current CDC.gov En Espanol homepage (<http://www.cdc.gov/spanish/>). The data collected will inform directly on improvements to the homepage as it is redesigned.

There are 2 versions of this survey. One is a desktop version (for people taking the survey on a desktop/laptop) and a mobile version (for people taking the survey on a smartphone or tablet). In addition, the survey is available in English and Spanish depending on the preference of the volunteer.
