## Attachment F—Feedback Tool (Web Version)

## CDC Water Toolkit: Use and Feedback

### Introduction

Form approved OMB No. 0920-0879 Expiration date: 04/30/2017

#### Welcome!

We are seeking feedback about your experience using the Increasing Access to Drinking Water in Schools toolkit ("Water Toolkit") that was developed by the Center for Disease Control and Prevention's School Health Branch (CDC/SHB)

We are seeking your input given the role you play in coordinating school-based strategies as part of State Public Health Actions/1305. This data collection is intended for State Health Department or Department of Education/Public Instruction staff only.

Your feedback will help us improve the resources we make available to help support students' access to clean and safe drinking water as part of a healthy school nutrition environment.

Completing this online assessment is voluntary and takes approximately 11 minutes.

As you go through the questionnaire, please respond to the questions from your individual perspective and not that of your department as a whole, unless otherwise indicated.

It is recommended that you finish the data collection in one session, but you have the option to save responses and resume later. Partially completed responses can be saved by closing your browser, and restarted by clicking on the link to the questionnaire for up to 3 weeks after you initially begin.

Please complete the questionnaire by [May date], 2015.

Your privacy is very important to us. The CDC will not publish or share any identifying information about individual respondents with CDC or any partner organizations etc. There are no known risks or direct benefits to you from participating or choosing not to participate in this assessment, but your answers will help the CDC tailor the resources they develop to improve their relevance to you and your efforts to make drinking water more accessible in schools.

If you have questions or feedback about this assessment, please contact Sarah Sliwa at ssliwa@cdc.gov.

To begin, please click next.

Public reporting burden of this collection of information is estimated to average 11 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer: 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333: ATTN: PRA (0920-0879).

# CDC Water Toolkit: Use and Feedback \*2. At which department do you work? C Department of Health Department of Education/Department of Public Instruction 3. For your state's work to implement the school-based strategies for State Public Health Actions/1305, which agency works directly with the local education agencies (LEAs)? Department of Health Department of Education/Department of Public Instruction 4. Which of the following best describes how you work with LEAs as part of State Public Health Actions/1305? Through a contract or MOU between the Department of Public Health and Department of Education/Department of Public Instruction, the DOE/DPI does 100% of the school health related work plan activities. Through a contract or MOU between the Department of Public Health and Department of Education/Department of Public Instruction, the two departments partner to complete the school health related work plan activities. The State Dept. of Health has a designated School Health contact who does 100% of the school health related workplan activities directly with our targeted LEAs. The State Dept. of Health has a designated School Health contact who primarily works indirectly with LEAs through partnerships and subcontracts. Other (please specify) 5. As part of the Healthy Hunger-Free Kids Act (HHFKA), schools participating in the National School Lunch and School Breakfast programs are required to make plain drinking water available in the cafeteria at no cost during school meal times. Beyond this requirement, some LEAs are taking actions to make plain drinking water more accessible to students throughout this the school day (e.g., allowing water bottles in classrooms, updating water fountains). Which of the following best describes efforts around water access in the LEAs you work with as part of 1305? Our efforts are focused on meeting the HHFKA requirements around drinking water. We are working with some LEAs on efforts to increase access to drinking water throughout the school day. I am not sure how we are working with LEAs around promoting students' access to drinking water.

CDC Water Toolkit: Use and Feedback
6. You indicated you are working with LEAs to increase access to water *throughout the school day*, please specify how many LEAs are working on this.

C 2. Disagree somewhat	
3. Agree somewhat	
4. Agree strongly	

CDC Water Toolkit: Use and Feedback
Utility of the Water Toolkit
18. What do you like the most about the "Water Toolkit"? (Select up to 3)ÿ  Overview of policies related to water
Needs assessment checklist  Planning questions  Evaluation questions
Stakeholder Interview guide Strategies to overcome challenges
Water testing diagram Other (please specify)
19. Please describe any changes that you've noticed or heard about in your targeted LEAs after working through the steps outlined in the "Water Toolkit."
20. If you have suggestions for making the "Water Toolkit" more useful for you, including any content or resources you'd like to see addressed, please enter them here.

CDC Water Toolkit: Use and Feedback
Resources and Support
21. With whom are you partnering/working on efforts to increase students' access to water in schools?
war and the second seco
22. What other tools or resources have you accessed to help you in your work to increase students' access to water in schools?
None None
Crink Up
Rethink Your Drink
Take Back the Tap
Water Works: A Guide to Improving Water Access and Consumption in Schools to Improve Health and Support Learning
Keep It Flowing: A Practical Guide to School Drinking Water Planning, Maintenance & Repair
Prevention Research Center/Harvard School of Public Health Water Access Audit Tool
Other (please specify)
23. What other resources, training/professional development, and/or technical assistance would help you in your work to increase access to water in schools?

CDC Water Toolkit: Use and Feedback
Thank you!
Thank you for taking time to complete this questionnaire!
Your responses will help CDC to improve the usefulness of its products to increase access to water in schools.
