Web Assessment Notification Email

Greetings,

As part of an ongoing effort to improve CDC's Prevention Status Reports (PSRs), the Office for State, Tribal, Local and Territorial Support (OSTLTS) is undertaking an assessment, *CDC Prevention Status Reports: User Satisfaction and Impact*. The goal of this assessment is to determine reach, user satisfaction, usefulness, and impact of the PSRs. The PSRs are comprised of:

- **Reports by Topic** – Ten individual topic-specific reports for each state ([Click here for an example](#)).
- **State Report** – a report for each state that combines all ten topic-specific reports for that state ([Click here for an example](#)).
- **State Summary** – a report for each state that shows individual state ratings for each PSR public health policy and practice indicator ([Click here for an example](#)).
- **National Summary** – a national report that shows the percent of states rated green, yellow, or red for each PSR public health policy and practice indicator ([Click here for an example](#)).

As part of this assessment, the National Network for Public Health Institutes (NNPHI) is working with CDC to gather feedback on the PSRs from state health department officials and staff. You have been identified as an important potential user of the PSRs and your feedback is important for the purposes of this assessment. We seek to gather feedback particularly from the state health official, senior deputy health official, and program managers or staff for each of the 10 PSR health topic areas.

Information gathered during this assessment will help CDC deliver more effective support for your efforts to advance evidence-based public health policy and practice.

We estimate it will take approximately 15 minutes to complete the questionnaire.

You can access the web-based assessment here: [INSERT LINK HERE].

Please complete the assessment by {DATE}.

If you have any questions about this specific web-based assessment, please contact us at psreports@nnphi.org. If you have any questions about the overall project, please contact Garry Lowry at gel2@cdc.gov. Thank you for your participation.

Sincerely,

Prevention Status Reports Assessment Team
