E. MIGRATORY BIRD SPECIAL PURPOSE - UTILITY
(Migratory Bird Treaty Act, 50 CFR 21.27)

Note: A Federal Migratory Bird Special Purpose - Utility permit is required for utilities to collect, transport and temporarily possess migratory birds found dead on utility property, structures, and rights-of-way. Utilities include communications, electric, wind, solar, and other power generation and transmission entities. Permits will be issued to the utility project; companies contracted to conduct the permitted work may act as subpermittees under the utility's permit. A Migratory Bird Special Purpose – Utility permit may be valid for up to 3 years.

Wind energy and other utilities may refer to the U.S. Fish and Wildlife Service Land-Based Wind Energy Guidelines and the Eagle Conservation Plan Guidance, Module 1 – Land-based Wind Energy, Version 2 at <http://www.fws.gov/windenergy/index.html> for information on structured, science-based processes for addressing wildlife conservation concerns at wind facilities, including recommendations for post- construction mortality monitoring protocols. Your permit will require reporting of migratory bird mortalities either electronically or in written form. These data, including but not limited to, project name, species, and date discovered, may be made available to the public.

**** This permit does not authorize the lethal take or injury of migratory birds nor absolve the permittee from liability for such take. ****

For collecting activities relating to pre-construction surveys, please use Service form 3-200-7 (Scientific Collecting; <http://www.fws.gov/forms/3-200-7.pdf>) .

Please provide the information requested below on a separate sheet of paper. You should be as thorough and specific as possible in your responses.
