

Request for Approval under the “Generic Clearance for the Collection of Routine Customer Feedback” (OMB Control Number: 1545-2256)

TITLE OF INFORMATION COLLECTION: eAuthentication Usability Study

PURPOSE:

The purpose of this study is to assess the usability of and user satisfaction with IRS eAuthentication. eAuthentication includes a start page, email verification, a personal information form, out of wallet questions and a security profile. The participant’s performance with each page of the form will be recorded and evaluated. Measures such as time on task, task success, participant understanding of content, help and error text will be captured.

Collecting this data will provide the study with:

- Behavioral observations and insights into the user experiences
- Insights into design solutions to improve and strengthen the user experience
- Benchmark information on the current experience that can be used as a guide for future online developments.

No PII will be used in this study. Participants will be provided with fake credentials and an email address created for the study, and the out of wallet questions will not be provided.

DESCRIPTION OF RESPONDENTS:

We will recruit individual taxpayers representing a wide spectrum of online behavior. Participants will be individuals who have filed taxes at least once, and typically spend at least 20 hours a month online. By setting a low threshold we hope to avoid participants who are not likely users of our online services and yet allow the study to reach out to diverse groups of taxpayers. We will conduct two rounds, each with 30 participants.
