II. What guidance does this PR Notice provide?

This final PR Notice provides guidance to the registrant concerning how EPA intends to implement web-distributed labeling under this voluntary system. Shorter, relevant labeling could be clearer and easier for the user to understand, improving compliance with pesticide labeling requirements and thereby protecting human health and the environment from unintentional misuse of pesticides. Web-distributed labeling would also allow for more rapid updates to pesticide labeling, meaning risk mitigation measures and new uses can reach the user more quickly than under the current paper-based system. First, the PR Notice defines terms used related to web-distributed labeling in this notice. It includes suggested language that registrants can use on the labeling affixed to or accompanying the pesticide container to reference the web-distributed labeling portion of labeling. It recommends content, function, and security for the Web site associated with a product's web-distributed labeling. Finally, the PR Notice suggests a process by which registrants can request that a product's labeling include web-distributed labeling and outlines what information EPA expects to receive.

III. Do PR Notices contain binding requirements?

The PR Notice discussed in this notice is intended to provide guidance to EPA personnel and decision makers and to pesticide registrants. While the requirements in the statutes and Agency regulations are binding on EPA and the applicants, this PR Notice is not binding on either EPA or pesticide registrants, and EPA may depart from the guidance where circumstances warrant and without prior notice. Likewise, pesticide registrants may assert that the guidance is not appropriate generally or not applicable to a specific pesticide or situation.
