1/ Any false statement or misrepresentation may result in a fine of not more than \$10,000, or imprisonment for not more than 5 years, or both (18 U.S.C. 1001).

2/ The term "on average" shall be calculated by adding the producer's or importer's pounds from the preceding calendar year with the pounds estimated for the calendar year the exemption is being claimed and dividing by two. For example, if a producer's or importer's pounds from the preceding year was 450,000 pounds and the pounds estimated for the calendar year the exemption is being claimed is 500,000 pounds, then the total "on average" pounds would be 475,000.

Certification of Exemption Application Instructions

The term "on average" shall be calculated by averaging an applicant's estimated production or importation for the fiscal year for which an exemption is being claimed with the applicant's production or importation in the preceding fiscal year. For example, if the applicant has estimated production for the fiscal year for which an exemption is claimed to be 450,000 pounds and the applicant's actual production in the preceding fiscal year was 500,000 pounds. The total for these two years is 950,000 pounds making the applicant's "on average" production 475,000 pounds. Such a volume of production will make the applicant eligible to claim an exemption from assessments.

The Mushroom Council may require persons receiving an exemption from assessments to provide reports on the disposition of their mushrooms. All persons shall be liable for paying assessments on total production or importation should their "on average" production or importation exceed 500,000 pounds. Any person who desires to renew their exemption from assessments shall reapply to the Mushroom Council for another certificate of exemption. Please type or print this application.
