

Saltwater Recreational Fishing Attitudes and Preferences Survey

HAWAII

NOAA
FISHERIES
Pacific Islands Region

The National Marine Fisheries Service (NMFS) is conducting a survey about **saltwater** recreational fishing and recreational fisheries management.

NMFS is the federal agency responsible for the stewardship of marine fishery resources and their habitat, and works together with state agencies to manage fish stocks so that anglers have quality opportunities to participate in recreational fishing. NMFS is conducting this survey to improve our understanding of anglers' expectations and how they may be changing with fishing conditions. Responses to this survey will provide a basis for more informed decision-making for fisheries managers and to determine recreational anglers' preferred management approaches.

Your responses are strictly confidential and will not be associated with your personal identity.

We are interested in hearing from Hawaii's non-commercial fishermen. In this survey, "non-commercial fishing" means fishing that is not conducted for profit, but for sport, pleasure, subsistence, cultural or traditional reasons. We understand that many people who consider themselves non-commercial fishermen also hold a Commercial Marine License and/or sell some fish to offset expenses.

This first section asks about your fishing activities and how you view yourself as a fisherman.
